SP-ALPR

WHO READS YOUR LICENSE PLATE?

An independent look at Sun Prairie's plate reader cameras

What they do

Cameras on poles and in police cars photograph passing plates and log the plate, the time and the place. Data is kept for a set time.

What is changing

The city plans to switch from Flock to Axon Outpost cameras. As of Nov. 4, 2026, no contract has been approved and no vote date has been posted.

What is still open

The Chief has made promises about retention, audits and sharing. They are statements, not contract terms, because no contract has been released.

Final city budget approval

Nov. 17. Ask whether the Axon contract is part of that vote.
