5. License Plate Reader Cameras (Flock → Axon)

The community report, meetings with Chief Warych, policies, contracts, costs and how other cities have decided.

Community Report (October 8, 2026)

Automated License Plate Readers in Sun Prairie

Program overview • Policy & oversight • Contract & cost • Wisconsin comparison • How to participate

Prepared by — Zack Mark — independent; not affiliated with the City of Sun Prairie or the Sun Prairie Police Department

Last updated — October 8, 2026

Information current through — Flock usage log through Sept. 21, 2026 (25 new items since May 22, 2026); the signed 2023 Flock agreement, order form, and insurance exhibit; Oct. 7, 2026 Public Safety Committee meeting materials (agenda, Axon budgetary estimate, Chief's legal memo); news reports through Oct. 8, 2026

Important notice: This is an independent, unofficial community summary compiled from public records, policy documents, and published news reports, with research and drafting assistance from an AI tool (Claude). It is not a City of Sun Prairie or Police Department publication, and it is not legal, financial, or investment advice. See Section 17 for full disclaimers and sources, including more on the AI assistance used.

Language access: A summary, FAQ, and how-to-participate section are also available in Español and Hmoob near the end of this document.

Executive Summary

Sun Prairie Police have used Flock Safety license plate reader (ALPR) cameras since December 2023 — nine cameras today, six owned by the department and three donated by Woodmans. The department credits the system with stolen-vehicle recoveries and help in missing-person, shooting, and homicide cases, and says it follows written Policy F-18 (30-day retention, documented searches, alert verification, audits, and no federal sharing without a court order or the Chief's approval).

The city will not renew Flock (six cameras end Dec. 31, 2026; three end Mar. 31, 2027) and plans to move to Axon Outpost cameras in 2027. Chief Kevin Warych briefed the Public Safety Committee on October 7, 2026 on the Axon Outpost transition; this was a staff report, not a vote, and no contract has been approved yet. A non-binding Axon budgetary estimate obtained since that meeting puts the proposed 9-camera system at roughly $235,389 over a

10-year term (May 2027–April 2037, about $23,539/year) — details in Section 7. The change follows a wave of Wisconsin communities dropping or restricting Flock.

Open questions residents are raising: cost versus benefit, how success is measured, audit transparency, data-sharing scope, contract control, and whether the program could expand without public approval. Notably, Axon markets Outpost as combining plate reading with live video streaming and vehicle-attribute recognition, unified through its Fusus platform — the budgetary estimate obtained so far only itemizes ALPR/"Vehicle Intelligence" hardware and software, with no Fusus or livestreaming line item, but that is not confirmation those capabilities are excluded from the final contract. Section 14 explains how to take part.

1. Overview & Camera Network

Sun Prairie Police Department (SPPD) has used squad-mounted plate readers since roughly 2009 and a fixed Flock Safety camera network since December 4, 2023. Cameras photograph passing plates and vehicles and check them against agency-authorized "hotlists" (stolen vehicles, wanted persons, AMBER Alerts). Trained personnel can also search stored reads for documented investigations.

The network has 9 cameras: 6 owned by SPPD (term ends December 31, 2026) and 3 donated by Woodmans (term ends March 31, 2027).

249,284

unique plate reads (last 30 days) 1,510

hotlist hits (last 30 days) 186

search sessions (last 30 days)

Source: SPPD Transparency Portal, updated July 10, 2026. Hotlist sources: NCIC, NCMEC AMBER Alert, Wisconsin DOJ.

2. Key Dates

Date — Event

Sept. 8, 2023 — Date written into the Flock Master Services Agreement. The signature page shows it was signed Oct. 6, 2023 (for SPPD by then-Chief Michael Steffes; for Flock by its General Counsel), and the agreement takes effect on mutual signature

Dec. 4, 2023 — Flock camera network installed and in use

Mar. 3, 2026 — SPPD ALPR Policy F-18 last updated

July 10, 2026 — SPPD transparency portal updated; briefing with Chief Kevin Warych

Sept. 15, 2026 — City Council approves 2026 Capital Improvement Plan, cited in SPPD's announcement of the switch

Mid-Sept. 2026 — City announces it will not renew Flock and will pursue Axon Outpost

Sept. 23, 2026 — Senate subcommittee hearing; 13 national ALPR principles released

Sept. 22, 2026 — Axon issues a non-binding "Rough Order of Magnitude" budgetary estimate (Quote Q-932192-001) to SPPD, expiring Nov. 30, 2026

Oct. 7, 2026, 7 p.m. — Public Safety Committee meeting held — Chief Kevin Warych gave an informational report on the Axon Outpost transition (agenda item did not say "consideration/possible action"); no vote was taken. The Chief also submitted a memo to the committee summarizing ALPR-related court decisions.

Dec. 31, 2026 — Term ends for the 6 department-owned Flock cameras

Jan. 1, 2027 — Flock retention scheduled to drop to 7 days (per department notes)

Mar. 31, 2027 — Term ends for the 3 Woodmans-donated cameras

Apr.–May 1, 2027 — Per the Sept. 22 Axon estimate, equipment shipping/installation and the start of the 10-year billing term (if the contract is signed on these terms)

2027 — Planned start of Axon platform

3. How the System Has Been Used

From SPPD's internal tracking of notable outcomes (December 2023 – September 2026):

Stolen vehicle recoveries

Dozens of hits leading to recovered vehicles, several tied to weapons or drug seizures, and one possible link to a Madison homicide investigation (May 2024).

Missing persons & homicide cases

In a January 2025 case, a missing person's vehicle was captured before and after her disappearance; her body was later found near Flock cameras and a suspect was charged with first-degree intentional homicide. A September 2026 Sun Prairie shooting and a March 2026 Madison attempted homicide were also aided by camera hits.

Retail theft, fraud & robbery

Vehicles identified in shoplifting, credit-card fraud, an armed robbery (Sept. 2025), and a $79,000 ATM "jackpotting" case (Dec. 2025).

Hit-and-runs & fleeing vehicles

Vehicles identified when witnesses gave partial or incorrect plates, including a fatal pedestrian hit-and-run in Green County (Mar. 2026).

Mutual aid

Shared reads assisted Madison, Deforest, Middleton, Verona, Cottage Grove, Dane County, and Green County.

Warrants, domestic cases & threats

Used to locate wanted subjects, domestic-violence suspects, and people who threatened others.

Not every hit ends in an arrest: records also show outdated "stolen" flags, vehicles already recovered, welfare checks, and civil matters. These outcomes come from the department's own summaries and were not independently verified.

Updated log: through September 21, 2026

SPPD's "Flock Utilization & Hits" log, updated through Sept. 21, 2026, adds 25 new notable items since the last update on May 22, 2026. Recent additions include stolen-vehicle hits (June–Sept. 2026), a Sept. 7 attempted-homicide case in Madison where the vehicle hit a Sun Prairie camera, a Sept. 9 Sun Prairie shooting with one suspect taken into custody, and several retail-theft and warrant cases. A handwritten note on the copy reviewed reads "only outcomes": the log lists notable outcomes, not every hit.

What the log does and doesn't show: because it lists only notable outcomes, there is no total of how many alerts were wrong or went nowhere, so a success rate can't be calculated from it. The log itself, though, includes cases where the system's output didn't pan out: a "stolen" flag the originating agency never removed (Dec. 2023); a vehicle ruled out as the suspect vehicle in a fatal hit-and-run (Mar. 2026); an owner who entered the wrong plate as stolen (May 2026); and several stolen-vehicle alerts that turned out to be civil disputes or vehicles the owner had already recovered. Asking for error and false-alert counts is a reasonable request.

4. National Standards: The 13 Principles

At a September 23, 2026 Senate Judiciary Subcommittee hearing, national law enforcement groups (including the International Association of Chiefs of Police, the National Sheriffs' Organization, the National District Attorneys Association, and the National Fusion Center Association) released 13 recommended ALPR principles. SPPD states it follows all 13.

- Written policies on use, access, retention, sharing, and audits
- Permitted uses limited to trained, authorized personnel for legitimate purposes
- Authorized access, removed when no longer needed
- Auditing & accountability, with discipline up to termination for misuse
- Required training for anyone with access
- Documented queries tied to a case number or public-safety purpose
- Verification of plate matches before enforcement action
- Confidentiality of ALPR data from public disclosure
- Meaningful retention balancing investigations and privacy
- Responsible data sharing, with no selling of data
- Equal restrictions on access to non-governmental ALPR data
- Data security requirements for anyone storing ALPR data

The summary sheet provided names 12 of the principles; the 13th was not on the pages reviewed.

5. Local Policy & Oversight (Policy F-18)

SPPD Policy F-18, Automatic License Plate Readers, was last updated March 3, 2026 (first adopted 2010). Key provisions:

- Background checks: CIB and FBI fingerprint checks before anyone gets access.
- Alert verification: officers must visually confirm the plate and verify vehicle status (NCIC/TIME) before enforcement action, and note this in reports.

- Documented searches: every search needs a case number, a standardized incident category, a stated reason, and a lawful objective.
- Retention: 30 days unless needed for an investigation.
- Auditing: a System Administrator compiles periodic audit reports (reads, alerts, deployments, violations); frequency is set in a separate procedure approved by the Chief. Meeting notes indicate audits roughly monthly to weekly.
- Case type and number required: meeting notes say that since about November 2025 every search must carry a case type, case number, and reason. The same notes mention an internal investigation involving misuse; the details were not captured, so that is worth asking about directly.
- How audits work: notes describe audits done monthly (often weekly) with help from the department's records-management system, which flags triggers such as the same plate being searched repeatedly; history is archived. A handwritten note from the July 10 briefing appears to record that no misuse had been found in the prior year. Confirm this with the department before relying on it.
- Camera locations: notes say SPPD picks the locations, with an "equity lens," consistency across the city, and cameras strictly on roadways.
- Privacy safeguards: logged, restricted access; no surveillance without reasonable suspicion of a crime; no monitoring by race, religion, gender, or political affiliation; annual public transparency reports.
- What is captured: plates and vehicles only — no facial recognition, and no detection of people, gender, or race.
- Prohibited uses: immigration enforcement, traffic enforcement, harassment, use based solely on a protected class, and personal use.

6. Data Sharing & Federal Access

- Data may be shared through the department-approved network with designated law enforcement agencies — about 200+ agencies within roughly a 50-mile radius, per the portal and meeting notes.
- No sharing with federal agencies unless required by court order or expressly approved by the Chief.
- Release to non-law-enforcement parties is prohibited without a court order, subpoena, or the Chief's approval; public-records requests go through the department's open-records process.
- SPPD states its data is owned by the department and never sold.
- 287(g) question: notes from the Oct. 7 meeting jot down sharing partners that participate in the restricted 287(g) program with ICE, with a figure of "13–14" written next to it. The notes don't make clear exactly what that number counts, so the precise count and which agencies are involved should be confirmed with the department.
- Under Axon: notes say sharing would run through a formal MOU (agreement with protections) with each agency, and that while Flock is by far the most common system among nearby agencies, Axon's ALPR network is not large. That could mean fewer neighbors to share with.

7. Cost & Vendor Contract

Term — Detail

Agreement — Flock Group, Inc. Master Services Agreement dated Sept. 8, 2023; signature page dated Oct. 6, 2023 (effective on mutual execution)

Term / renewal — 24-month initial term that starts at first installation and validation of the hardware; auto-renews for another 24 months (the "greater of one year or the order-form length") unless either side gives 30 days' notice before the term ends; the city has said it is not renewing

Order form (2023) — 5 Falcon units; $15,000/yr platform fee + $750 one-time setup = $15,750 Year 1; $30,750 over 2 years; Net 30

Current cost (meeting notes) — About $3,000 per camera per year — roughly $18,000/yr for the six department-owned cameras

Retention — 30 days (contract and policy)

Contract terms residents have asked about

- Hardware ownership: Flock owns the physical cameras; the city cannot move or alter them without Flock, and relocation carries a reinstall fee.
- Camera placement: planned jointly, but Flock has final say and can veto a location.
- Data ownership vs. Flock's access: the city owns its data and Flock may not sell it, but the contract lets Flock itself disclose footage to law enforcement or government when legally required or in good faith for legal process, security, fraud, or emergencies — separate from SPPD's own access rules.
- Anonymized data: Flock may use de-identified data to improve its products and train machine-learning models.
- Liability: capped at fees paid in the prior 12 months; Flock disclaims responsibility for "repeat criminal activity" or failure to capture footage.
- Exit: the city may terminate for non-appropriation of funds on 30 days' notice; either side may end the agreement over an uncured material breach.

More fine print from the 2023 Flock agreement

Additional pages of the signed agreement and order form have since been reviewed. Several terms are standard vendor boilerplate, but residents asking "what exactly did the city agree to?" may want to know about them:

- Permitted purpose: the service is licensed "solely for the awareness, prevention, and prosecution of crime, bona fide investigations and evidence gathering for law enforcement purposes." Flock may suspend service if it believes the system is used for anything else.
- Who can log in: only the city's officers, employees, or agents, using city-issued email addresses; the city is responsible for everything its users do. Footage lives with a third-party cloud host, and the contract says Flock may use third parties for hosting and cellular service.
- Retention is Flock's default, not a legal floor: Flock deletes footage on a rolling 30-day basis, and the city is responsible for downloading and archiving anything it needs to keep longer.

- Audio and video language: the agreement's opening recitals describe Flock's platform as capable of capturing "audio, video, image, and recording data," and the definition of Flock Services includes "audio detection." The order form itself lists only the Falcon plate-reader camera, and meeting notes indicate live audio is a Flock capability that SPPD does not use.
- Network features listed on the order form: state and nationwide license-plate lookup across cameras that have opted in, search by "vehicle fingerprint" (make, color, stickers, roof racks), search by full, partial, or temporary plates, unlimited custom hotlists, and real-time NCIC alerts. The packet does not say which of these SPPD has switched on.
- Fees: Flock may change fees for a renewal term with 60 days' notice; unpaid balances can accrue 1% per month, and Flock can suspend service on an undisputed invoice more than 30 days overdue (after 30 days' written notice).
- Support and outages: Flock promises "commercially reasonable" efforts to answer support requests within 72 hours and to repair or replace defective hardware within 7 business days of inspection. Services are provided "as is"; for outages caused by third-party services or maintenance, the city's remedy is extra days added to the term, not a refund.
- Hardware and installs: the city may not move or tamper with cameras, or the warranty is void and the agreement can be terminated for breach. If cameras are lost or damaged, replacement is at a posted reinstall fee. Flock can remove the hardware if the city misses payments.
- Indemnity and insurance: Flock indemnifies the city for patent/copyright claims and for property damage or injury directly caused by its installation, capped at the prior 12 months of fees. Flock must carry general liability ($1M per occurrence / $2M aggregate), umbrella ($10M), professional liability/E&O ($5M), and commercial auto ($1M) coverage, plus cyber liability ($5M).
- "Morality" clause: if the customer or its agents become the subject of an indictment, contempt, scandal, or similar event that would "negatively impact or tarnish Flock's reputation," Flock may terminate on written notice.
- Publicity and feedback: Flock may use the city's name and trademarks in its marketing, and any suggestions or feedback from the city or its users are assigned to Flock, including intellectual-property rights.
- Assignment: either side may assign the agreement without the other's consent to an affiliate or to a buyer or successor in a merger or sale of the business.
- Governing law: the law and courts of the state where the customer is located (Wisconsin). The agreement also says a purchase is not contingent on any promised future features.

Source: Flock Group, Inc. Master Services Agreement, Order Form (Exhibit A), Billing Schedule, and Exhibit B (Insurance), DocuSign envelope ID AF1416CF…; signature page dated Oct. 6, 2023.

A question about dates. The 2023 order form's 24-month term starts at installation (Dec. 4, 2023), which would point to roughly December 2025 for the end of the first term and a renewal term running to about December 2027. The officially reported end dates are Dec. 31, 2026 (six cameras) and Mar. 31, 2027 (three Woodmans-donated cameras), and the order form covers only five cameras, not nine. That suggests later order forms or amendments exist that were not part of the pages reviewed. They are worth asking the city for.

Axon Outpost: the budgetary estimate obtained so far

A document obtained after the Oct. 7 meeting is a formal Axon sales quote (Q-932192-001, issued Sept. 22, 2026, expiring Nov. 30, 2026), addressed to SPPD and Chief Warych and prepared by Axon sales rep Brandon Jones. Axon labels it a "Non-Binding Budgetary Estimate" / "Rough Order of Magnitude" and stamps every page "DRAFT" — it is explicitly not a signed contract and pricing "may vary based on actual configuration and quantities." With that caveat, here is what it shows:

Term — Detail

Program length — 120 months (10 years): contract start May 1, 2027, contract end April 30, 2037

Total contract value — $235,388.97 net (list price $384,137.10; Axon shows a $148,748.13 discount)

Billing — Annual payments of about $23,538.87–$23,538.90, due each April 1 from 2027 through 2036 (10 payments)

Items quoted — 9 × Axon Outpost cameras with poles, solar power kits, battery/charger enclosures, standard and upgrade installation, extended camera warranty and maintenance, plus 9 "Axon Vehicle Intelligence – ALPR License" software licenses ("Outpost TAP Plan," billed as 3 units + 6 units = 9)

Hardware refresh — A Technology Assurance Plan (TAP) includes two mid-contract hardware refreshes — camera and battery-enclosure replacements shipping around April 2032 and April 2037

Two things stand out. First, the 9-camera count matches the current Flock network (6 city-owned + 3 Woodman's-donated), suggesting a like-for-like camera swap rather than an expansion — though this is a quote, not a sited camera-location plan, so exact placement isn't confirmed. Second, every line item on this quote falls under "Vehicle Intelligence" (ALPR hardware, installation, and software licensing); it does not separately itemize Axon Fusus or a livestreaming license. That's a meaningful data point toward "ALPR-only," but it isn't proof Fusus/livestreaming are excluded — a base Outpost camera may support those features without a distinct line item, and this is only a budgetary estimate, not the final statement of work. It's a direct question worth putting to the Chief or Axon (see Section 13).

Source: Axon Enterprise, Inc. Quote Q-932192-001 (Doc ID 75b7dc002558), obtained via Oct. 7, 2026 Public Safety Committee meeting materials.

8. How Wisconsin Communities Compare

Sun Prairie's decision comes amid a statewide reassessment of Flock. In August 2026 Flock announced it was cutting its recommended default retention for identifiable data from 30 days to 7. As reported through late September 2026:

Community — Action — Notes

Sun Prairie — Not renewing Flock; Axon Outpost contract goes to committee Oct. 7 — Keeps ALPR with a new vendor; 30-day retention now, 15–21 days discussed for Axon

Dane County Sheriff — Board pulled Flock funding; contract expired May 31; cameras covered — Board later restored $80,000 to find a new ALPR provider

Stoughton — Council voted unanimously in July to end Flock —

Fitchburg — Ended Flock — Weighing Axon and Motorola; concern over inability to track other agencies' use of its data

Oshkosh — Ended Flock — Police chief learned the system could map vehicle movements, contrary to what a company representative had said (Wisconsin Examiner)

Verona, Monona, Appleton, Sturgeon Bay, UW–Madison — Ended or declined to renew —

Kenosha — Switching to Axon — Similar path to Sun Prairie

Racine / Racine County — Council voted to terminate (mayor broke a 7–7 tie); sheriff removed cameras — Some agencies reported Flock kept data longer than contracts allowed; Flock says records are deleted per customer agreements

Waukesha, Oconomowoc — Waukesha to stop funding after 2026; Oconomowoc ended — A lawsuit challenges Flock use in Waukesha County

Milwaukee Police — Still uses Flock, with new limits — Supervisor-only access, specified case categories, no sharing with outside agencies; the county executive does not plan to renew county funding

Common themes: retention length, access by out-of-area agencies, audit transparency, trust in the vendor, and how much control the city keeps. Sun Prairie is among those leaving Flock but, like Kenosha, continuing ALPR under a different vendor — so the terms of any new contract matter as much as the vendor's name.

9. Open Questions & Concerns

Questions prepared for a July 10, 2026 briefing with Chief Warych, and concerns residents have raised, include:

Vendor selection & success measures: Were alternatives considered before Flock, and how is success measured beyond individual case stories?

Legal review & scope: What Fourth Amendment review was done, and could the system expand without public approval? Courts have generally not found ALPR collection itself illegal, but "mission creep" is a common worry. Chief Warych's Oct. 7, 2026 memo to the Public Safety Committee cited a specific body of case law on this point: Wisconsin's City of Horicon v. Albert (1999) and State v. Folkman (2013); Seventh Circuit decisions United States v. Tuggle (2021), United States v. House (2024), and United States v. Hammond (2021), plus a pending Seventh Circuit ALPR appeal, Scholl v. Illinois State Police (argued Sept. 29, 2026); U.S. Supreme Court precedents United States v. Knotts (1983), United States v. Jones (2012), and Carpenter v. United States (2018); and two 2026 ALPR-specific rulings from other circuits, United States v. Porter (5th Cir.) and Schmidt v. City of Norfolk (E.D. Va.). All of these describe ALPR or similar vehicle-tracking technology as generally not constituting a Fourth Amendment "search" in the cited circumstances — none of them is a ruling on Sun Prairie's program specifically, and Scholl remains pending.

Misuse & stalking risk: Policy calls for investigation of suspected misuse; some residents want to know whether any violations have been found. Notes mention both a mandatory case-type/case-number requirement since Nov. 2025 and an internal investigation involving misuse, and a July 10 note that appears to say no misuse was found in the prior year; the

department can clarify how those fit together. Another open item from the notes: with Flock's automated system, the same plate could be wrongly flagged multiple times, so how will Axon's audits and automatic flagging catch errors?

Cost vs. benefit: Support is strongest for stolen-vehicle recovery and missing-person cases; is the cost proportionate? A non-binding Axon estimate obtained after Oct. 7 puts the proposed system at about $235,389 over 10 years (roughly $23,500/year) — higher than the current Flock cost of about $15,000–$18,000/year, though the Axon figure also bundles two mid-contract hardware refreshes Flock's model didn't include. See Section 7.

Data sharing: With 200+ agencies able to search 30 days of history, residents want clearer public accounting of who has looked at Sun Prairie's data and why.

10. The Move to Axon

Sun Prairie's plan

- The city will not renew Flock. Police will present an Axon Outpost contract to the Public Safety Committee on Oct. 7.
- City officials say the city would own and control its ALPR data, including access and export, and that Axon would consolidate data storage, body-worn cameras, and TASER devices on one platform. Because that platform includes TASERs and body cameras, the vendor relationship is broader than ALPR alone.
- Retention: Flock's is 30 days now (7 days from Jan. 1, 2027 per notes); Axon's is discussed at 15–21 days.
- Axon's own materials describe agency-owned data, tamper-evident audit trails, no automatic federal access, plates-only capture (no facial recognition), and planned tools for flagging unusual searches. These are vendor statements; the contract language is what binds the city.

About Axon Enterprise

Axon Enterprise, Inc. (NASDAQ: AXON) is based in Scottsdale, Arizona. Founded in 1993 as a Taser maker (TASER International until renamed Axon in 2017), it now sells Tasers, body cameras, in-car cameras, digital evidence and records software, and, through its Fusus acquisition, real-time crime center and ALPR technology. It has roughly 4,000+ employees, several billion dollars in annual revenue, and a market value in the tens of billions.

National context: Axon stock and the ICE Taser contract

Separately from Sun Prairie's decision, financial disclosures show an account in President Donald Trump's name bought $1–5 million of Axon stock on February 10, 2026. Two weeks later, on February 24, 2026, U.S. Immigration and Customs Enforcement (ICE) posted a federal contracting-database notice seeking information from vendors for a large Taser purchase.

Details reported on the ICE contract itself:

- Scale: ICE sought about 17,800 new Tasers — up from roughly 4,300 then in the field — specifically T10 models with 10-probe cartridges effective up to 45 feet, plus unlimited cartridges and agent training.
- Value and term: Roughly $220 million over five years.

- Vendor: The notice's technical specifications reportedly matched only Axon's products; Axon is the sole maker of conductive-energy weapons meeting ICE's stated specs. Vendors had until March 13, 2026 to respond, and as of this report it was not publicly confirmed that Axon had been formally awarded the contract.
- Stated justification: ICE said the devices give agents "greater distance to try to de-escalate a hostile situation" and a better chance of a successful probe connection.
- Criticism: Sen. Adam Schiff criticized the spending amid broader growth in ICE's contracting; Diane Goldstein of the Law Enforcement Action Partnership questioned whether Tasers would actually be used to de-escalate and noted the risk of electrical-shock injury.

No charges have been filed and no insider trading has been proven; there is no public evidence the president was involved in the procurement or that Axon knew of the purchase. The White House says the holdings are managed by third parties and denies any conflict. Ethics experts cited in coverage say the concern is the appearance of a conflict, not proven misconduct. This involves a separate federal (ICE) procurement for Tasers — not ALPR cameras, and not Sun Prairie's contract — but residents may consider it relevant context when asking about the vendor the city is choosing for a different product line.

11. Axon Outpost: Beyond Traditional ALPR

Axon's own marketing describes Outpost as more than a plate-reader replacement. Axon says Outpost combines three capabilities in one fixed device: automated license plate recognition, live video streaming, and vehicle-attribute recognition (make, model, color, and features like roof racks, bumper stickers, or missing plates). A companion product, Axon Lightpost, adds the same three capabilities to existing streetlights. Axon says both feed into Axon Fusus, a real-time operations platform that can unify Outpost/Lightpost data with other connected cameras and sensors — Axon's own materials describe this as bringing "visibility across every fixed, mobile, and community-sourced ALPR-enabled camera."

That means the relevant question for Sun Prairie isn't only "is Flock being replaced by another plate reader?" It's which of these capabilities the city is actually purchasing and enabling, and which rules will govern them:

- Will livestreaming and vehicle-attribute recognition be turned on, or only plate reading?
- If vehicle attributes are collected, are they searchable without a known plate, and how long are they retained?
- Is Axon Fusus included in the proposed contract, and if so, what other cameras or data sources could it connect to later?
- Does SPPD's Policy F-18 — written for plate reads — automatically cover livestreaming and attribute recognition, or would it need to be updated?
- What approval (council vote, budget process, policy amendment) would be required before additional cameras or capabilities are added later?

Update: A non-binding Axon budgetary estimate obtained after the Oct. 7, 2026 committee meeting itemizes only ALPR camera hardware and an "Axon Vehicle Intelligence – ALPR

License" for all 9 cameras — it does not list Fusus or a livestreaming license as separate line items. That leans toward "plate reading only" for the configuration priced so far, but a budgetary estimate isn't the final statement of work, and Outpost's base camera hardware may be capable of more than what's separately licensed. See Section 7 for the full cost breakdown.

Sources: Axon product pages for Outpost, Lightpost, and Fusus (axon.com); Axon's 2026 press materials on its expanded ALPR camera lineup; Axon Quote Q-932192-001 (Sept. 22, 2026).

12. Flock & Axon: A Complicated History

Because Sun Prairie is leaving one vendor for the other, it's worth knowing the two companies have a tangled relationship:

- 2020: Axon made a strategic investment in Flock and the companies partnered, offering Flock's fixed ALPR alongside Axon's Fleet in-car systems.
- Ongoing (pre-2025): Flock's Vehicle Fingerprint technology was integrated into Axon Fleet 3, letting Flock-derived evidence flow automatically into Axon Evidence.
- August 28, 2024: the companies agreed to a modestly expanded integration involving Fusus and Flock devices.
- Early-mid 2025: Flock says Axon unilaterally decided to end the API partnership, telling Flock that continued openness was "no longer in Axon's best interests."
- Since July 24, 2025: per Flock, Axon no longer supports new mutual customers, though existing customers may still get some support — Flock says the practical effect on customers is minimal since it opened its own APIs at no cost.

Flock's partner directory still listed an "Axon (Evidence.com)" integration as of this report, which is worth reconciling directly with both companies rather than assuming either description is current. Because Sun Prairie is moving to Axon's own Outpost hardware (not continuing to run Flock alongside Axon), this history mostly matters for one practical question: will Sun Prairie's historical Flock data be transferred, exported, or simply left behind when the Flock cameras come down.

Sources: Flock Safety, "Axon Plans to Sever APIs With Flock" (June 2025); Axon's 2020 partnership announcement.

13. Key Questions for the Committee & Vendors

Status as of Oct. 8, 2026: The Oct. 7 Public Safety Committee meeting was an informational update from Chief Warych, not an action item, and the questions below remain largely open. A non-binding Axon cost estimate (Section 7) partially answers the cost, camera-count, and "is Fusus included" questions, but the city has not published a signed contract, final camera-placement plan, or final retention figure. Beyond the open questions in Section 9, the added complexity of Outpost/Fusus and the Flock-Axon history raise a longer list worth putting to the Public Safety Committee, Axon, and Flock directly. Condensed:

For the Public Safety Committee / SPPD

- How many Outpost cameras, and where? What is the total contract cost and term, including renewal and termination provisions?
- Is Fusus included? Are livestreaming and vehicle-attribute recognition enabled?
- What is the retention period for each data type (plate reads, attributes, video, audit logs), including after contract termination?
- Will historical Flock data be transferred, exported to the city, or left with Flock?
- Who can access the data — other agencies, federal agencies, Axon employees or subcontractors — and is that access logged?
- Can Axon use city data (including de-identified data) for its own product development or AI training?
- Will the city publish annual audit statistics and the full contract, including data-processing and security terms?
- Does Policy F-18 need to be amended to cover the new capabilities, and what approval would future expansion require?

Full, unedited question lists the author prepared for Chief Kevin Warych, Flock Safety, and Axon are available on request via the contact information in Section 13.

14. How to Weigh In

The October 7 meeting, and what comes next

The Public Safety Committee met as scheduled on Wednesday, October 7, 2026 at 7:00 p.m. at City Hall (also available on Zoom). Per the posted agenda, item 6(C) was "Chief report on Axon Outpost as the police department's Automated License Plate Reader (ALPR) technology moving forward" — unlike the ordinance and fundraiser items on the same agenda, it was not listed as a "consideration, discussion, and possible action" item, meaning it was presented as a staff update rather than something the committee voted on. No contract has been approved as of this writing. Future committee and Common Council meetings — where an actual contract would need to be considered and approved — are the places to watch next; check the posted agendas on cityofsunprairie.com or sunprairiemediacenter.com for meeting dates, which had not been announced as of Oct. 8, 2026.

Contact the city

Who — How

City Hall / City Clerk — (608) 837-2511, Mon–Fri 8:00 a.m.–4:30 p.m.; 300 E. Main St., Sun Prairie, WI 53590. The Clerk can tell you which alder district you live in.

Common Council & Public Safety Committee — cityofsunprairie.com — agendas, minutes, and member contact information (Agenda Center)

Sun Prairie Police Department — Chief Kevin Warych; 2598 W. Main St., Sun Prairie, WI 53590 (contact through the city website or main line)

Questions worth asking

- What retention period, exactly, will the Axon contract set — and can it be changed without council approval?
- Who owns the cameras and can decide where they go?
- Will audit results and search reports be published for the public?
- Which agencies will get access, and is federal access barred in the contract itself?
- What are the total cost, contract length, and exit terms compared with Flock?
- How will the city measure whether the cameras are worth the cost?
- What must happen before cameras or capabilities are added?

What happens after October 7?

Because Oct. 7 was an informational report rather than a vote, the committee has not yet made a recommendation on an Axon contract. In Sun Prairie's council-committee structure, a contract of this size would typically need committee review and a recommendation, followed by final approval from the full Common Council, before it's signed. The exact timeline, which meeting(s) a contract vote would appear on, and whether a further public comment period is planned have not been confirmed — worth asking the City Clerk's office or watching upcoming Public Safety Committee and Common Council agendas directly.

15. Glossary

Term — Meaning

ALPR — Automated License Plate Reader — a camera system that photographs plates and checks them against watch lists.

Hotlist — A list of plates flagged for a reason (stolen vehicle, wanted person, AMBER Alert) that triggers an alert when read.

Retention period — How long the system keeps a plate read before automatically deleting it, absent a hold for an investigation.

Flock Safety — The company that has supplied Sun Prairie's current ALPR cameras since 2023.

Axon Enterprise — The company (maker of Tasers and body cameras) that Sun Prairie plans to switch to for ALPR in 2027.

Axon Outpost — Axon's fixed camera product, combining plate reading, live video, and vehicle-attribute recognition.

Axon Lightpost — A version of Outpost's capabilities built to install on existing streetlights.

Axon Fusus — Axon's platform for combining feeds from Outpost/Lightpost with other connected cameras and sensors into one view.

Vehicle-attribute recognition — Identifying a vehicle by features other than its plate — color, make, model, roof racks, bumper stickers, etc.

Vehicle Fingerprint — Flock's version of vehicle-attribute recognition.

NCIC — National Crime Information Center — the FBI's national database of wanted persons and stolen vehicles.

CJIS — Criminal Justice Information Services — the FBI's security standards for handling criminal-justice data.

287(g) — A federal program allowing certain local agencies to perform some immigration-enforcement functions; referenced here because it's one channel by which ALPR data could reach federal immigration authorities.

Open records law — Wisconsin's public-records law, which lets residents request government records — though ALPR data itself is generally treated as confidential and exempt.

Public Safety Committee — The Common Council committee that reviews police- and fire-related proposals before they go to the full council.

Common Council — Sun Prairie's elected city council, which gives final approval to most contracts of this size.

Policy F-18 — SPPD's internal written policy governing ALPR use, access, and retention.

16. Plain-English FAQ

Does this use facial recognition?

No. SPPD and Flock both state the system reads plates and vehicles only, not faces, gender, or race.

Can ICE or other federal agencies see Sun Prairie's data?

Under current policy, no — not without a court order or the Chief's specific approval. Whether that same limit will be written into the Axon contract is one of the open questions in this report.

Does the city own the cameras?

Currently, no — Flock owns the hardware even though SPPD paid for most of it and Woodman's donated three units. Whether Sun Prairie or Axon will own the new cameras hasn't been confirmed.

How long is my car's plate data kept?

30 days under the current policy and contract, unless it's tied to an active investigation. Flock has said it's moving toward 7 days; Axon's proposed retention (15–21 days, per earlier notes) hasn't been finalized in a contract yet.

Is this legal?

Courts have generally not found ALPR data collection itself illegal. That doesn't resolve every question residents have raised about retention length, scope, or oversight — those are policy questions, not settled legal ones.

Could the city add more cameras or capabilities later without another public vote?

That depends on the contract language, which is one of the biggest open questions in this report (see Section 13).

What does this cost?

The 2023 Flock contract ran about $15,000–$18,000 a year depending on which figures you use. A non-binding Axon budgetary estimate obtained after the Oct. 7 meeting puts the proposed 9-camera Outpost system at about $235,389 total over a 10-year term (2027–2037), or roughly $23,500/year — but it's explicitly marked a draft, non-binding estimate, not a signed contract, so the final number could change.

Can I find out if my car's plate has been read?

Not directly — ALPR data is treated as confidential, and routine public-records requests for it are typically denied. You can ask the department directly about its process.

Who do I talk to if I have more questions?

See Section 14, "How to Weigh In," for city contacts, or reach the author of this report directly.

17. Disclaimers & Sources

- Independent and unofficial. The author has no affiliation with the City of Sun Prairie, the Sun Prairie Police Department, Flock Safety, Axon, or any advocacy group. This is not an official publication of any government body.
- Not professional advice. Nothing here is legal, financial, or investment advice. Legal questions (including Fourth Amendment issues) and any reference to Axon stock are informational only.
- Accuracy. Compiled in good faith from documents and reports available as of October 8, 2026. Details may change or contain errors; verify important facts with official sources. Corrections are welcome.
- Department data. Case examples and statistics come from department summaries and the transparency portal and were not independently verified. Notes from a July 10, 2026 briefing are the author's paraphrase, not official statements.
- Reported matters. The Axon stock and ICE contract discussion summarizes published news reports. No wrongdoing is alleged or has been proven.
- Vendor claims. Statements from Flock or Axon are the companies' own descriptions and are not endorsed.
- AI use. The author used an AI assistant (Claude, by Anthropic) to help research, organize, draft, and format this report, including web searches of news coverage and summarization of source documents, and to generate the Spanish and Hmong translations. AI-assisted work can contain errors, omissions, or misinterpretations of source material despite good-faith effort to verify it. This report should be treated as a starting point for independent research, not a substitute for the original policy, contract, and news documents it cites — readers are encouraged to review those directly, especially before relying on any specific figure, date, or quote.

Mar. 3, 2026); Flock Safety Master Services Agreement and Order Form; SPPD Transparency Portal (July 10, 2026); SPPD Flock utilization log (through Sept. 21, 2026); Axon ALPR program brief (Sept. 2026); Axon SEC filings; Axon product pages for Outpost, Lightpost, and Fusus; Axon Quote Q-932192-001 (Sept. 22, 2026); Axon "What Sets Us Apart" ALPR safeguards brief (current as of Sept. 2026); Flock Safety, "Axon Plans to Sever APIs With Flock" (June 2025); City of Sun Prairie, Public Safety Committee meeting notice and agenda (Oct. 7, 2026); Chief Kevin Warych, memo to the Public Safety Committee on ALPR case law (Oct. 7, 2026); City of Sun Prairie website; WMTV 15 (Sept. 16–17, 2026); WKOW; The Star / HNG News; Wisconsin Examiner (Sept. 9, 2026); Urban Milwaukee (Sept. 11, 2026); WISN; Wausau Pilot & Review (Sept. 4, 2026); ACLU of Wisconsin; Wisconsin Watch (May 2026); CNBC (June 29, 2026); Times of San Diego (Mar. 3, 2026); 24/7 Wall St. (June 29, 2026); NOTUS.

18. Revision History

This report has been revised repeatedly as new source documents came in. In the interest of transparency, here's what changed and when (dates approximate, reconstructed from the author's working notes):

Version — Changes

Sept. 26, 2026 — Initial report and slide deck drafted from SPPD's internal Flock utilization logs, the national ALPR hearing and 13 principles, and Axon's public ALPR brochure.

Sept. 26, 2026 — Added Policy F-18 detail, the Flock Master Services Agreement's cost terms, and Transparency Portal statistics (30-day retention, 249,284 reads/30 days, etc.).

Sept. 27, 2026 — Added the full Flock contract's hardware-ownership, liability, insurance, and data-disclosure terms; corrected the camera-ownership description.

Sept. 27, 2026 — Corrected the donor name for 3 cameras from an earlier "Menards" to "Woodmans."

Sept. 27, 2026 — Added background on Axon Enterprise as a company and a national-context section on Axon stock purchases tied to a federal ICE contract.

Sept. 27–28, 2026 — Rebuilt with an executive summary, "How to Weigh In" section, disclaimers, a Wisconsin-communities comparison table, and PDF page numbers; corrected the Chief's name to Kevin Warych; clarified the Oct. 7 meeting had not yet occurred.

Sept. 28, 2026 — Added sections on Axon Outpost's expanded capabilities (livestreaming, vehicle-attribute recognition, Fusus), the Flock–Axon partnership history and 2025 breakup, and a condensed list of key questions for the committee and vendors.

Sept. 28–29, 2026 — Added the glossary, plain-English FAQ, and a note on the post-Oct. 7 process.

Sept. 29, 2026 — Added this revision history and Spanish and Hmong translations of the summary, FAQ, and how-to-participate sections.

Sept. 29, 2026 — Added an explicit AI-use disclaimer describing how an AI assistant was used in researching and drafting this report.

Oct. 8, 2026 — Updated with materials from the Oct. 7, 2026 Public Safety Committee meeting: confirmed the meeting was an informational report (no vote taken); added a non-binding Axon Outpost budgetary estimate ($235,389 over a 10-year term, 9 cameras, no separate Fusus/livestreaming line items); added Chief Warych's memo citing ALPR-related case law; updated cost, key-dates, open-questions, FAQ, and "how to weigh in" sections accordingly.

Oct. 8, 2026 — Added further detail from the signed 2023 Flock agreement (signature date and signer, term mechanics, morality/publicity/feedback/assignment clauses, insurance limits, fee and support terms, audio and network-feature language), the updated Sept. 21 hits log (with a note on what it can't show), and meeting-note details on audits, case-type requirements, camera siting, and MOUs. Flagged a possible mismatch between the 2023 order form (5 cameras, 24-month term from installation) and the currently reported end dates.

Oct. 8, 2026 — Expanded the national-context section with further reported detail on the ICE Taser contract (unit count, five-year/$220 million value, stated justification, and criticism).

19. Resumen en Español

Nota: esta traducción fue generada con ayuda de inteligencia artificial y cubre únicamente el resumen, las preguntas frecuentes y cómo participar — no el informe completo. Si nota algún error, por favor contáctenos.

Aviso importante: Este es un resumen comunitario independiente y no oficial preparado por Zack Mark. No está afiliado con la Ciudad de Sun Prairie, el Departamento de Policía de Sun Prairie, Flock Safety ni Axon Enterprise. Esto no es asesoría legal ni financiera.

Resumen

El Departamento de Policía de Sun Prairie (SPPD) ha usado cámaras lectoras automáticas de placas (ALPR) de la empresa Flock Safety desde diciembre de 2023. Actualmente hay 9 cámaras: 6 propiedad del departamento y 3 donadas por Woodman's. La ciudad no renovará el contrato con Flock y planea cambiar a cámaras Axon Outpost en 2027. El 7 de octubre de 2026, el Jefe Kevin Warych presentó un informe (no una votación) sobre la transición a Axon ante el Comité de Seguridad Pública; aún no se ha aprobado ningún contrato. Un presupuesto preliminar y no vinculante de Axon, obtenido después de la reunión, estima el costo total en aproximadamente $235,389 dólares durante 10 años (2027–2037) para las 9 cámaras.

Preguntas frecuentes

¿Usa reconocimiento facial? No. El sistema solo lee placas y vehículos, no rostros.

¿Puede el gobierno federal (como ICE) ver los datos? Bajo la política actual, no, sin una orden judicial o aprobación específica del Jefe de Policía.

¿Cuánto tiempo se guardan los datos? 30 días bajo la política y el contrato actuales, salvo que estén vinculados a una investigación activa.

¿Es esto legal? Los tribunales generalmente no han determinado que la recolección de datos ALPR sea ilegal, pero persisten preguntas sobre políticas y supervisión.

Cómo participar

- Próximas reuniones: la reunión del 7 de octubre ya ocurrió (solo informe, sin votación); revise las agendas futuras del Comité de Seguridad Pública y del Concejo Municipal en cityofsunprairie.com o sunprairiemediacenter.com para la próxima oportunidad de comentar.
- Oficina del Secretario Municipal (City Clerk): (608) 837-2511.
- Preguntas o correcciones sobre este informe: Zack Mark — zackarymark160@gmail.com • 608-940-7356 • Facebook: Zack Mark.

El informe completo en inglés incluye detalles adicionales sobre la política del departamento, el contrato, y una comparación con otras comunidades de Wisconsin.

20. Lus Qhia Ua Lus Hmoob

Cim tseg: Qhov txhais lus no siv AI pab txhais thiab tsuas yog qhia txog cov ntsiab lus tseem ceeb, cov lus nug feem ntau, thiab yuav ua li cas thiaj tau qhia koj lub suab — tsis yog tag nrho tsab ntawv. Yog tias pom qhov yuam kev, thov qhia rau peb paub. Vim Lus Hmoob yog ib hom lus AI tseem kawm txog, thov kom ib tug neeg paub lus Hmoob zoo rov saib qhov txhais lus no ua ntej siv rau pej xeem.

Ceeb Toom Tseem Ceeb: Qhov no yog ib tsab ntawv tshaj tawm ntawm tus kheej, tsis yog los ntawm Lub Nroog Sun Prairie, Lub Chaw Ua Hauj Lwm Tub Ceev Xwm Sun Prairie, Flock Safety, lossis Axon Enterprise. Zack Mark yog tus sau. Qhov no tsis yog lus qhia txog kev cai lij choj lossis nyiaj txiag.

Kev Piav Qhia Luv

Lub Chaw Ua Hauj Lwm Tub Ceev Xwm Sun Prairie (SPPD) tau siv cov koob yees duab nyeem tsab ntawv tsheb (ALPR) ntawm lub tuam txhab Flock Safety txij Lub Kaum Ob Hlis 2023 los. Tam sim no muaj 9 lub koob yees duab: 6 lub yog SPPD tug, thiab 3 lub yog Woodman's pub. Lub nroog yuav tsis rov txuas daim ntawv cog lus nrog Flock ntxiv, thiab npaj yuav hloov mus siv Axon Outpost xyoo 2027. Rau lub Kaum Hli 7, 2026, Thawj Tub Ceev Xwm Kevin Warych tau qhia (tsis yog pov ntawv xaiv) txog kev hloov mus siv Axon rau Public Safety Committee; tseem tsis tau muaj daim ntawv cog lus raug pom zoo. Ib tsab ntawv qiv nyiaj ntawm Axon uas tsis tau cog lus tseeb, tau txais tom qab lub rooj sib tham, qhia tias nqi them yuav yog li $235,389 nyob rau 10 xyoo (2027–2037) rau 9 lub koob yees duab.

Cov Lus Nug Feem Ntau

Puas siv kev tsim nco ntsej muag (facial recognition)? Tsis siv. Lub kaw lus tsuas nyeem tsab ntawv tsheb thiab lub tsheb xwb, tsis yog ntsej muag neeg.

Tsoom Fwv (xws li ICE) puas pom tau cov ntaub ntawv no? Raws li txoj cai tam sim no, tsis tau — yuav tsum muaj ib tsab lus txiav txim ntawm tus kws txiav txim plaub ntug (court order) los yog tus Thawj Tub Ceev Xwm tso cai tshwj xeeb.

Cov ntaub ntawv khaws ntev npaum li cas? 30 hnub raws li txoj cai thiab daim ntawv cog lus tam sim no, tshwj tsis yog nyob rau hauv kev tshawb nrhiav (investigation) uas tseem tab tom ua.

Qhov no puas raug cai lij choj? Feem coob lub tsev hais plaub tsis tau txiav txim tias kev sau cov ntaub ntawv ALPR yog kev ua txhaum cai, tab sis tseem muaj ntau lo lus nug txog txoj

cai thiab kev saib xyuas.

Yuav Ua Li Cas Thiaj Tau Qhia Koj Lub Suab

Tsab ntawv tag nrho ua lus Askiv muaj ntau cov ntsiab lus ntxiv txog txoj cai, daim ntawv cog lus, thiab kev sib piv nrog lwm lub nroog hauv Wisconsin.

Independent Community Report — Automated License Plate Readers in Sun Prairie • Last updated October 8, 2026 • Prepared by Zack Mark (not affiliated with the City of Sun Prairie or SPPD)

ALPR Tracker Page

License plate readers, Flock to Axon

One place to follow the city's plate reader program: the meetings, the documents, what has been answered and what hasn't. Updated as new records come in.

Independent and unofficial. Run by Zack Mark, who is not affiliated with the City of Sun Prairie or the Sun Prairie Police Department. Zack has met with Chief Kevin Warych several times about Flock and plate reader cameras. Research and drafting were done with help from an AI assistant (Claude), so check anything important against the original documents. Last updated Oct. 8, 2026.

Where things stand

- Mid-Sept. 2026

City won't renew Flock

Switch to Axon Outpost announced

- Sept. 22

Axon price estimate

Non-binding draft, expires Nov. 30

- Oct. 7

Committee briefing

Chief's report. No vote taken.

- Date not set

Committee and Council action

Where a contract would be considered

- Dec. 31 / Mar. 31

Flock cameras expire

6 on Dec. 31, 3 on Mar. 31, 2027

- May 1, 2027

Axon term would start

10 years, if signed as quoted

Cameras

9

6 city-owned, 3 donated by Woodman's. Axon estimate covers 9.

Axon estimate

$235,389

10 years, about $23,539 a year. Draft, non-binding.

Flock today

~$18,000

A year for the six city-owned cameras, per meeting notes.

Plate reads

249,284

In 30 days. 1,510 hotlist hits, 186 searches (portal, July 10).

Latest · Oct. 8, 2026

The Oct. 7 meeting was a report, not a vote

Chief Warych presented an update on Axon Outpost to the Public Safety Committee. The agenda listed it as a report, unlike other items that said "possible action." No contract has been approved, and no date for a vote has been posted.

An Axon estimate dated Sept. 22 lists hardware and an "Axon Vehicle Intelligence ALPR License" for all 9 cameras. It has no separate line for Fusus or livestreaming. That doesn't settle whether those features will be turned on.

Timeline

- Sept. 8 / Oct. 6, 2023

Flock agreement dated and signedDated Sept. 8, signed Oct. 6 by then-Chief Steffes. 24-month terms that renew automatically unless either side gives 30 days' notice.

- Dec. 4, 2023

Flock cameras go live

- Mar. 3, 2026

Policy F-18 last updatedThe police department's written rules for plate readers.

- Mar. 31, 2027

Three Woodman's-donated Flock cameras expire

- Apr.–May 2027

Axon equipment ships, 10-year term begins May 1Per the draft estimate, if signed on those terms.

Questions tracker

All Open Partly answered Answered

Answered

Was there a vote on Oct. 7?

No. The Chief gave a report. The agenda item did not include "possible action."

Answered

How many Axon cameras?

9 in the draft estimate, the same as the current Flock network.

Partly

What will it cost?

The draft estimate says $235,388.97 over 10 years, about $23,539 a year. It is non-binding and could change in a final contract.

Partly

Are Fusus and livestreaming included?

Not itemized in the estimate, which lists only ALPR hardware and software. Axon sells Outpost with those capabilities, so the final setup still needs confirming.

Partly

Can federal agencies access the data?

Axon's materials say there is no automatic or built-in federal access, and that requests go to the agency. SPPD policy requires a court order or the Chief's approval. What the contract says is not yet public.

Partly

Who owns the data and cameras?
Axon says agencies own their data and hardware. The estimate lists hardware, but ownership terms in a final contract haven't been seen.

Partly

How long is data kept?
30 days now. 15 to 21 days was discussed for Axon, and Axon says agencies set their own retention. No final number.

Open

Where will the cameras go?
No location plan has been published.

Open

What happens to historical Flock data?
Whether it is exported, transferred or deleted when the cameras come down.

Open

Which outside agencies can search Sun Prairie's data?
About 200 agencies within roughly 50 miles can today. The Axon sharing list is unknown.

Open

Can Axon use city data to train products?
The Flock contract allowed de-identified use. The Axon terms haven't been published.

Open

Does Policy F-18 cover the new features?
It was written for plate reads. It is unclear whether it covers livestreaming or vehicle-attribute search.

Open

What approval would adding cameras or features need?
Not stated in any public document so far.

Open

Do the Flock contract dates add up?
The 2023 order form covers 5 cameras on a 24-month term from installation. The reported end dates are Dec. 31, 2026 and Mar. 31, 2027 for 9 cameras. Later order forms or amendments probably exist and haven't been seen.

Open

When is the vote, and will the full contract be public?

No date posted. No commitment to publish the contract and data terms.

Source records reviewed

- Oct. 7, 2026Public Safety Committee notice and agenda (posted Oct. 2)
- Sept. 22, 2026Axon Enterprise quote Q-932192-001, non-binding budgetary estimate
- Oct. 7, 2026Chief Warych's memo to the committee on Fourth Amendment cases involving ALPR
- Sept. 2026Axon ALPR safeguards brief and product material for Outpost, Lightpost and Fusus
- Mar. 3, 2026SPPD Policy F-18, Automatic License Plate Readers
- 2023Flock Safety Master Services Agreement and order form

These records are summarized in the report. For a copy of any of them, contact Zack using the details below.

What changed

- Oct. 8, 2026Added a Resources page with the contract, Policy F-18, transparency portal, hits log, Senate principles, question sheets, screenshots and handwritten notes typed out in full, plus a sources list.

- Oct. 8, 2026Added fine print from the signed 2023 Flock contract (signed Oct. 6, 2023; morality, publicity, assignment, insurance, fee and support terms), the hits log through Sept. 21 (25 new items, outcomes only), and notes on audits and case-type rules. Also flagged that the 2023 order form (5 cameras, 24 months from installation) doesn't obviously match the reported Dec. 31, 2026 and Mar. 31, 2027 end dates.
- Oct. 8, 2026Added fuller detail on the ICE Taser contract: about 17,800 Tasers, $220 million over five years, specs reportedly matching only Axon. Separate from the ALPR decision.
- Oct. 8, 2026Added the Oct. 7 meeting materials: agenda, Axon estimate, and the Chief's case-law memo. Report and slides updated.
- Sept. 29, 2026Added a glossary, plain-English FAQ, revision history, Spanish and Hmong sections, and a note on how AI was used.
- Sept. 28, 2026Added sections on Axon Outpost features and the Flock–Axon history.
- Sept. 27, 2026Corrected the Chief's name to Kevin Warych and the camera donor to Woodman's.
- Sept. 26, 2026First version of the report and slides.

Weigh in

Speak or write to the city

- Public comment form for the Public Safety Committee: cityofsunprairie.com/Comments/publicsafetycommittee. It closes 30 minutes before a meeting.
- Written comments on agenda items: sschmidt@cityofsunprairie.com
- City Clerk: (608) 837-2511, Mon–Fri 8 a.m.–4:30 p.m. Ask which alder district you live in and when the vote is.
- Meetings are in Council Chambers, 300 E. Main St., and stream at sunprairiemediacenter.com.

Good questions to ask

- What is the final retention period, and who can change it?
- Will the full contract and data terms be published?
- Is federal access barred in the contract itself?
- Are livestreaming and vehicle-attribute search turned on?
- What approval would adding cameras need?

Briefing Memo (July 10)

SUN PRAIRIE FLOCK ALPR BRIEFING MEMO Meeting with Chief Kevin Warych | July 10, 2026 | Prepared by Zack Mark

Purpose of Meeting

To better understand how the Sun Prairie Police Department uses Flock Safety Automated License Plate Reader (ALPR) cameras, including public safety benefits, privacy implications, oversight, data sharing, accountability, and community trust.

What Sun Prairie Has Communicated So Far

- Sun Prairie uses Flock Safety ALPR cameras. Sun Prairie's public Flock transparency page states that the system is used to help solve and reduce crime and that it captures license plates and vehicle images.
- The transparency page states that the system is not used for traffic enforcement, personal data collection, or surveillance based on race or other protected characteristics.
- The page also states that data is owned by Sun Prairie PD and is never sold to third parties.
- Sun Prairie's transparency page states that audit reports and event logs are accessible to system administrators to help ensure appropriate use.
- In prior communication and public discussion, it has been indicated that Sun Prairie currently has nine cameras in use and that local use of the system is limited. That number should still be confirmed directly in the meeting.

[1] Flock Safety, "Sun Prairie WI PD Transparency Portal," last updated July 8, 2026, https://transparency.flocksafety.com/sun-prairie-wi-pd [2] Prior direct email communication / meeting setup context with Chief Kevin Warych.

Main Public Safety Benefits Raised by Community Members

Residents have shared several examples of why they support Flock cameras and why they view them as a valuable tool:

- recovery of stolen vehicles
- locating missing persons / Silver Alert subjects
- assisting violent crime investigations
- general deterrence / neighborhood safety
- providing investigative leads when time matters

These examples are resident accounts shared in public comments, not independently verified Sun Prairie PD case summaries. They are useful as examples of perceived benefits and community support, but should not be presented as official outcome data unless confirmed by the department.

[3] Public Facebook comments submitted by Sun Prairie residents in response to Zack Mark's July 10 meeting post. [4] Flock Safety, "Privacy & Ethics," describing common ALPR public-safety use cases, https://www.flocksafety.com/privacy-ethics-copy

Major Community Concerns Raised

The strongest concerns from residents were not just about the existence of cameras, but about how the data is governed, shared, and potentially abused.

Privacy / surveillance concerns

- concern that the system can reconstruct patterns of life, including where people go, when they leave, and when they return
- concern that cameras may capture activity near parks, sidewalks, walking routes, and other public spaces

Misuse / stalking / domestic violence concerns

- concern that officers or authorized users could abuse the system to track ex-partners, romantic interests, domestic violence survivors, or other individuals for personal reasons

Data sharing and outside access

- questions about sharing with other Dane County agencies, statewide partners, or federal agencies
- concern about broader network-sharing arrangements and whether local settings could expand over time

Vendor control / future policy changes

- concern about "mission creep," leadership changes, software-setting changes, or contract changes quietly broadening use

Cost / necessity / alternatives

- questions about annual cost, long-term contract cost, alternatives, and whether benefits justify privacy and financial tradeoffs

Reported National / Non-Local Misuse Examples Raised by Residents

One resident posted examples involving misuse of ALPR/Flock-related systems by law enforcement in other jurisdictions. These examples were raised as reasons for concern about abuse and oversight. They were not presented as Sun Prairie incidents, but as examples of what can happen if safeguards fail.

The clearest verified Wisconsin example is Milwaukee: former officer Josue Ayala was publicly reported to have used Milwaukee's Flock system to track a former romantic partner and another individual for personal reasons. Other examples raised by residents from Kansas, Texas, Florida, and Georgia should be independently verified before being cited in any public-facing summary.

[7] FOX6 Milwaukee, report on Josue Ayala Flock misuse case, https://www.fox6now.com/news/milwaukee-police-officer-charged-flock-camera-misuse-case [8] Wisconsin Examiner, report on Milwaukee officer accused of misusing Flock cameras, https://wisconsinexaminer.com/2026/02/26/milwaukee-officer-accused-of-misusing-flock-surveilla

nce-cameras/ [9] WISN 12 News, report on guilty plea / restraining orders in Ayala case, https://www.wisn.com/article/court-grants-restraining-orders-against-ex-cop-who-stalked-ex-with-flock-cameras/71709296

Themes Emerging From Supportive Comments

Even among residents who support Flock, support is often conditional rather than unlimited. Common themes include support when used for serious public safety purposes, comfort with plate capture but not with misuse, greater trust in local leadership than in vendors or broad systems, and strong concern about access controls, especially whether use is logged and whether those logs are actually reviewed.

Themes Emerging From Opposed Comments

Residents opposed to Flock generally framed their objections as concerns about government overreach, private company control of public data, constitutional / Fourth Amendment issues, distrust of future policy changes, and a belief that communities should not expand surveillance infrastructure absent a clear demonstrated need.

Practical Issues to Clarify During the Meeting

- who has access to Sun Prairie's Flock system
- whether dispatchers or non-sworn staff have access
- how often logs are audited
- whether outside agencies can search Sun Prairie data directly
- whether Sun Prairie is opted into any broader network-sharing settings
- whether federal agencies can obtain or access data
- how long data is retained
- where data is stored
- whether Flock itself can access or retain local data
- how camera placement decisions are made
- what measurable outcomes Sun Prairie has seen from the system
- what the annual and long-term cost of the program is

[10] Flock Safety, "Evidence Policy," https://www.flocksafety.com/legal/flock-evidence-policy

Bottom-Line Public Tension Going Into the Meeting

The public divide does not appear to be simply "pro-camera" versus "anti-camera." It is more specific. Some residents see Flock as a valuable public safety tool. Some are not opposed to the technology itself, but want strict limits, strong auditing, narrow access, and transparency. Others oppose the system more broadly because they see it as part of a larger trend toward government surveillance, privatized data collection, and civil-liberties erosion.

That tension is the core of the meeting: What exactly is Sun Prairie doing with the system today, what safeguards exist, and what prevents that use from quietly expanding tomorrow?

Questions for Chief Warych (July 10)

Sun Prairie ALPR Meeting — Zack Mark | Meeting with Chief Kevin Warych | July 10

CORE SYSTEM + USAGE

Purpose & Use

- What are Sun Prairie's primary goals for using Flock ALPR cameras?
- In what specific types of cases is the system actually used (stolen vehicles, violent crime, missing persons, etc.)?
- Since adoption, how many cases has it directly helped solve or significantly advance?

What the System Collects

- What exact data is captured (plate, vehicle image, make/model, timestamps, location)?
- Can the system capture anything beyond license plates (people, patterns, movement tracking)?
- Is there any capability for broader tracking beyond single-event reads?

Camera Placement & Scope

- How are camera locations chosen?
- Are cameras strictly roadway-focused or can they capture nearby public spaces (parks, sidewalks, lots)?

Access & Internal Controls

- Who has access to the system (officers, dispatchers, civilians)?
- What training is required before access is granted?
- Are searches logged and routinely audited?
- How often are audits conducted and what do they review?

DATA, SHARING, COST, SAFEGUARDS

Data Sharing

- Does Sun Prairie share or allow access to other agencies in Dane County or beyond?
- Can outside agencies search Sun Prairie data directly, or must they request it?
- Is Sun Prairie opted into any broader Flock network or data-sharing system?
- Can federal agencies access or request this data? Under what conditions?

Data Storage & Retention

- Where is data stored (cloud, vendor system, local control)?
- How long is data retained before deletion?
- Who controls retention policies—Sun Prairie or Flock?
- Is deleted data permanently removed?

Oversight & Misuse Prevention

- What safeguards exist to prevent misuse (e.g., personal tracking or unauthorized searches)?
- Has any misuse ever been identified?
- What happens if misuse occurs?
- Are all users (including dispatch) included in auditing?

Cost & Accountability

- What is the annual cost of the system?
- What does the City actually pay for (hardware, software, data access, storage)?
- Were alternative vendors considered before selecting Flock?
- How is success measured beyond anecdotal cases?

Legal / Policy Framework

- What legal review was done before adoption?
- How are Fourth Amendment/privacy concerns addressed in policy?
- Could this system be expanded in scope without public approval?
- What safeguards prevent "mission creep" over time?

COMMUNITY INPUT

Residents have raised:

- Privacy and surveillance concerns
- Data sharing transparency
- Misuse and stalking risks
- Strong support based on stolen vehicle recovery and missing persons cases
- Questions about long-term cost vs benefit

Closing Question

- What do you think the public most misunderstands about this system, and what concern do you think is actually valid?

Chief Warych Meeting Brief & Notes (August 17)

SUN PRAIRIE POLICE DEPARTMENT — Chief Kevin Warych Meeting Brief Prepared by: Zackary Mark. Purpose: Public safety • Transparency • Accountability • Staffing • Future priorities

Why This Meeting

Following our previous conversation about Flock ALPR technology, I wanted to better understand the broader public-safety challenges facing Sun Prairie and how SPPD is preparing for the future.

My goal is to understand how the department balances effective policing, limited resources, transparency, and community trust.

Key Data

Police Department — 2026 budget

- 86 total positions
- 63 sworn positions
- 23 civilian positions

Calls for Service

The City reports calls for service increased 13.5% from 2020–2024, averaging 70+ calls per day. The City has identified increasing demands involving mental-health calls and transports, complex investigations, crimes involving children, cyber/digital evidence, and violent crime.

Staffing

The City has previously identified recruitment and retention as challenges and has cited staffing shortages as affecting proactive policing and community engagement.

Crime — SPPD 2024 Annual Report

- 335 crimes against persons
- 321 assault offenses
- 62 aggravated assaults
- 175 drug/narcotic offenses
- 28 weapons-law violations

These numbers should be considered alongside population growth, reporting patterns, and enforcement activity.

Questions & Meeting Notes

1. Staffing

Q: How many of the department's authorized positions are currently filled? Notes: 61 of 63 sworn (fully staffed = 63). Sworn vacancies: 2. Civilian vacancies: 1.

Q: What positions are hardest to recruit or retain? Notes: Officers; qualifications.

2. Recruitment & Retention

Q: What are the biggest reasons people choose not to join or leave SPPD? Notes: Personal, family, moving, culture. (None in 15 months.)

Q: What is working best to improve recruitment and retention? Notes: Taking care of people; building culture.

3. Call Volume

Q: Calls for service reportedly increased 13.5% from 2020–2024. What is driving that increase, and which types of calls consume the most department resources? Notes: One-year average is increasing. Drivers: population increase, traffic stops, checks, assists, business growth, event growth, mental health needs.

4. Proactive Policing

Q: When staffing is limited, what proactive services are most difficult to maintain? (Examples: community policing, traffic enforcement, school/community engagement, investigations.) Notes: Traffic complaints.

5. Accountability

Q: How does SPPD measure police accountability and officer performance? Notes: April and October evaluations; 6-month at-a-glance; broken-down analytics; data not taken alone; all citizen complaints taken into account and tracked.

Q: What information about complaints, use of force, or department performance is publicly available? Notes: All stats; Annual Report (look this up).

6. Community Trust

Q: How does the department measure whether residents actually trust SPPD? Notes: Community Satisfaction Survey on the website.

Q: What groups or communities do you think SPPD needs to build stronger relationships with? Notes: All communities — through informal leaders; The Star podcast.

7. Mental Health

Q: How is SPPD responding to increasing mental-health-related calls? Notes: Involved in daily work; CARES (paramedic and social worker), about $531 every call; other resources; Journey (resource).

Q: Are there situations where another response model could be more effective than traditional police response? Notes: Officers instead.

8. 2026 Funding

Q: The City proposed a $3.95 million annual levy increase in the April 2026 referendum, which voters rejected. What does that result mean for SPPD's staffing, services, and priorities? Notes: Different growth in services; no growth of even one police officer. SPPD budget is about $12.9 million.

9. Technology

Q: What new technologies do you believe will have the biggest impact on policing over the next five years? Notes: ALPR; AI usage; efficiency first.

Q: How does SPPD evaluate privacy, effectiveness, cost, and potential misuse before adopting technology? Notes: Trust in tech and privacy; rights; retention; viewing; storage; many, many rules followed; open records laws; misuse accountability.

10. Looking Forward

Q: What are the three biggest public-safety challenges Sun Prairie will face over the next 3–5 years? Notes: Public safety is the biggest thing.

1. Staffing — referendum challenge; about 700 people per year of population growth.
2. Budget — tight; 3 years set at $12.9 million; stay under.
3. Mindfulness of community relationships — trust is a forever priority.

Final Question

Q: If you could change one thing about how Sun Prairie approaches public safety over the next five years, what would it be? Notes: Constant listening, evolving, changing and meeting expectations, and building trust. "Human faith will go down for sure."

City of Sun Prairie — 2026 Budget; SPPD — 2024 Annual Report; City of Sun Prairie — 2026 Referendum Information; Previous Flock ALPR Briefing Memo.

Handwritten Meeting Notes (July 10 & Sept. 25)

Zackary's handwritten notes, typed up line by line. Words that couldn't be read are marked [?].

July 10 Meeting — Chief Kevin Warych — Flock/ALPR Camera Use

- Public safety #1
- Compliance rates
- 2009 started
- Saved mounts [?]
- Current: Flock
- The Star newspaper & other vendors
- ALPR for sure
- Looking for new vendors
- Case type & # reason — Nov 2025 mandatory
- Internal investigation w/ misuse
- All patrol access; admin
- Mandatory training
- Locations — equity issue [?]
- Prairie Lakes district
- Consistency
- Strictly roadways
- 30 days retained
- Agencies can look for 30 day history
- Transparency portal
- 200+ agencies
- NO fed
- Indiana (crossed out: surrounding states); auditing
- 50 mile radius
- Audits: once a month audit; once a week usually
- Record management system
- Triggers — same plate
- Historical archived
- Usage protection
- Last 1 year: No, never
- $3K a camera
- $18K yearly
- Engagement great
- Pro-democracy
- Public trust

- Cameras — 4th [Amendment], data/use sharing
- No SP shared data
- Agencies can't share our data
- Stolen vehicle recovery — ALPR help (not for sure)
- Oshkosh City Council ALPR
- Camera "pattern of life" concerns
- Needed in missing person
- Used to be hope, no strategy
- Toll cameras were concerning
- No speeding cameras (illegal)
- Year by year contract

Notes written on the July 10 question sheet

- How long is data retained before deletion? — 30 days
- Where is data stored (cloud, vendor system, local control)? — cloud (circled)
- Who controls retention policies — Sun Prairie or Flock? — Sun Prairie (circled)
- How are Fourth Amendment/privacy concerns addressed in policy? — not illegal
- Could this system be expanded in scope without public approval? — Pending; No

September 25 Meeting — ALPR (Axon vs. Flock)

- Axon vs. Flock
- Flock not being renewed; SPPD moving to Axon
- 12/31 — 6 end
- 3/21 — 3 end (Woodman's)
- 2027 switch to Axon
- Flock — retention to 7 days 1/1/27
- Axon — 15–21 days
- 9 days rotation [?] — detectives
- Flock most common; Axon not big
- MOU w/ each agency — very formal agreement + protection
- Axon has required fields like Flock

Concerns:

- ALPR bad
- Privacy / courts have ruled not illegal
- Data retention / "30 days too long"
  - Open records law
  - Not required to fulfill
  - All requests denied usually
- Data sharing / 220 agencies only w/ restricted 287(g) program w/ ICE (13–14)
- ★ 10/7 Public Safety meeting

- Fitchburg — Outpost cameras
- ★ Only given if permission, time based
- Flock was working proactively w/ fed agencies
- Axon audits (margin: what Axon want[s])
- How will accidents not happen?
- Flock automated system: same license plate ran multiple times wrongly flagged; automatic auditing
- ★ Strong audit system in SPPD
- All reads in file to audit to make sure justified
- Spot check monthly — accountability
- Need reason, otherwise reported
- [?] expansion of data
- Criminal Justice System compliant — Axon
- Public safety packet — Axon
- ALPR ~200 a[gencies]
- No saved cars — wrong tech [?]
- Flock — 50 mile radius
- 9/23 Senate committee ALPR — 13 principles
- SPPD picks location of ALPR
- Live audio — Flock, NOT SPPD
- DOT cameras
- Trust, reputation between companies

Flock Transparency Portal (July 10 printout)

Printout brought to the July 10 meeting.

Sun Prairie WI PD Transparency Portal (Flock Safety) — last updated Fri Jul 10 2026

Overview. The Sun Prairie Police Department uses Flock Safety's Automated License Plate Reader (ALPR) system to help solve and reduce crime in our community. ALPR cameras capture images of license plates and compare them to databases, such as "hotlists" of vehicles associated with crimes or missing persons. This technology allows officers to quickly identify vehicles of interest. The system also allows officers to search past images of vehicles when investigating a crime. To protect privacy, the system is not used for traffic enforcement, personal data collection, or surveillance based on race or other characteristics.

Policies

- What's Detected: License Plates, Vehicles
- What's Not Detected: Facial recognition, People, Gender, Race
- Acceptable Use Policy: Data is used for law enforcement purposes only. Data is owned by Sun Prairie WI PD and is never sold to 3rd parties. Audit reports and event logs are accessible to system administrators to ensure the system is used appropriately.
- Prohibited Uses: Immigration enforcement, traffic enforcement, harassment or intimidation, usage based solely on a protected class (i.e. race, sex, religion), Personal use.
- Access Policy: All system access requires a valid reason and is stored indefinitely.
- Hotlist Policy: Hotlist hits are required to be human verified prior to action.

Usage

- Data Retention: 30 days
- Total Cameras (LPR and other cameras): 9
- Sharing Network: Organizations granted access to Sun Prairie WI PD data (list on the portal)
- Hotlists Alerted On: NCIC, NCMEC Amber Alert, Wisconsin DOJ
- Vehicles detected in the last 30 days (unique plate reads): 249,284
- Number of hotlist hits in the last 30 days: 1,510
- Number of searches (user search sessions) in the last 30 days: 186

Public Recap Posts & Flyer

Posted by Zackary after the July 10 meeting, plus the flyer for the community report.

Meeting summary post, July 10, 2026

Meeting recap graphic, July 10, 2026

Community report flyer (sunprairiealpr.netlify.app)

ALPR Handout & @sunprairiealpr (October 27)

One-page handout, updated October 27, 2026, posted on sunprairiealpr.netlify.app.

Update: later on October 27, Chief Warych answered several of the open questions below in writing: Axon retention will start as a 14-day, three-month trial; there will be no livestreaming; searches will be audited monthly; and a data-sharing MOU will be made public after signing. See his email in Part 6.

Who reads your license plate?

Sun Prairie police use plate reader cameras. The city plans to switch from Flock to Axon. Here is what is known and what is still open.

Four facts:

- 9 cameras today: 6 city-owned, 3 donated by Woodman's
- 30 days: how long plate data is kept now
- May 2027: planned start of Axon
- $235,389: draft, non-binding Axon estimate, 10 years

What the department says (in a FAQ, not a contract):

- The city owns the plate data.
- No federal access, and no sharing with agencies in the 287(g) program.
- Every search is logged with an offense category and a reason.

These are promises, not contract terms. The Oct. 7 meeting was a report, and no vote has been scheduled.

Three questions to ask:

- How long will Axon keep the data, and who can change that number?
- Will those promises be written into the contract, and will the contract be published?
- Will livestreaming or Fusus be turned on, and what approval would adding cameras need?

The site has the full report, the documents, the timeline and a template email to the Mayor. Independent and unofficial; written with help from an AI assistant, so check anything important against the official documents. Figures are from public documents and a draft estimate as of Oct. 27, 2026.

@sunprairiealpr on Instagram

A new account for the license plate reader project (SP-ALPR), started October 27, 2026. Bio: "Independent look at Sun Prairie's license plate readers. Not affiliated with the City or SPPD." Link: sunprairiealpr.netlify.app.

First post (Oct 27), a 57-second video: "Who reads your license plate? Sun Prairie police use plate reader cameras, switching from Flock to Axon in 2027. I put what the contracts say into a plain-English report. Free at sunprairiealpr.netlify.app. Independent project, not affiliated with the City or SPPD. Made with some AI help, so check the official documents. #SunPrairie #Wisconsin #SPPD"

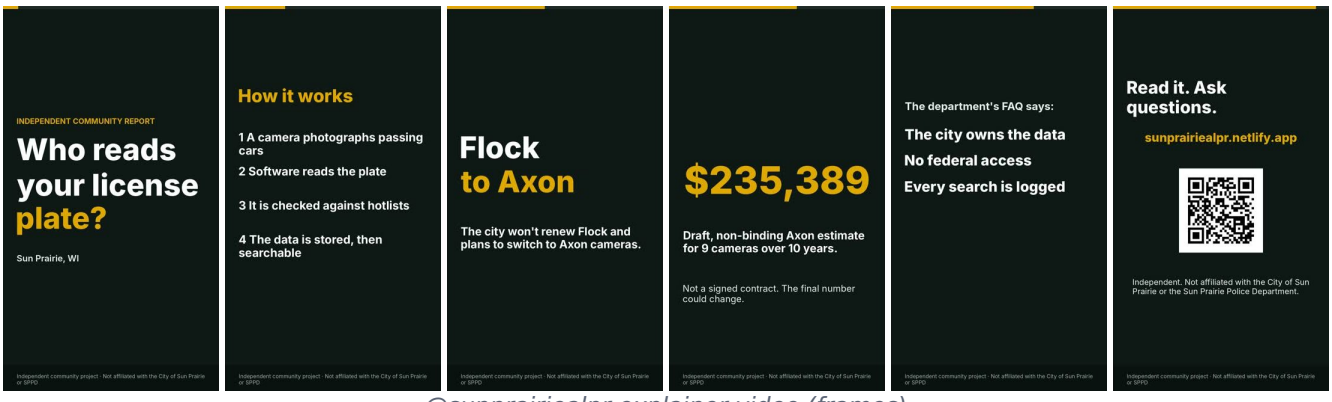

The video walks through: Sun Prairie police use 9 plate reader cameras; how it works (a camera photographs passing cars, software reads the plate, it's checked against hotlists, the

data is stored and searchable); 30 days of data kept today, with the Axon retention period not set yet; Flock to Axon; the $235,389 draft, non-binding Axon estimate for 9 cameras over 10 years; what the department's FAQ says (the city owns the data, no federal access, every search is logged); and "Read it. Ask questions."

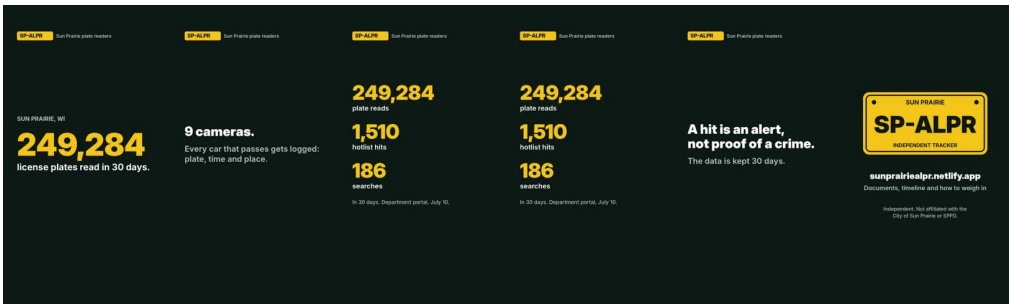

@sunprairiealpr reels (October 29)

Five short reels (about 17–21 seconds each), all ending on the SP-ALPR plate logo, sunprairiealpr.netlify.app, and "Independent. Not affiliated with the City of Sun Prairie or SPPD."

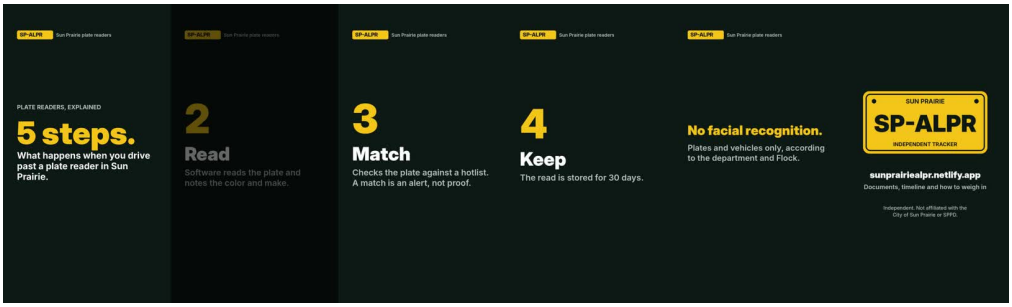

- By the numbers (posted to @sunprairiealpr Oct 29): 249,284 license plates read in 30 days by 9 cameras; 1,510 hotlist hits and 186 searches (department portal, July 10). "A hit is an alert, not proof of a crime." Data kept 30 days.
- 5 steps, explained: what happens when you drive past a plate reader. Capture, read (plate, color and make), match against a hotlist (an alert, not proof), keep for 30 days. No facial recognition, according to the department and Flock.
- The switch: Flock is out, Axon is in, with a planned start of May 2027. $235,389 draft price for 9 cameras over 10 years, about $23.5K a year (draft estimate, non-binding, expires Nov. 30). "Now it's moving with the city budget. Budget meetings are where to speak up."
- 4 promises: the city owns the data, no federal access, no sharing with 287(g) agencies, every search is logged (source: SPPD's Oct. 16 FAQ). "A FAQ is a statement of intent. A contract is what's binding. Put it in the contract."
- Say something, in 3 steps: email the Mayor and the committee (mayor@cityofsunprairie.com); speak at public comment in Council Chambers, 300 E. Main St.; ask your alder where they stand (City Clerk: 608-837-2511). "For, against or undecided. It all counts."

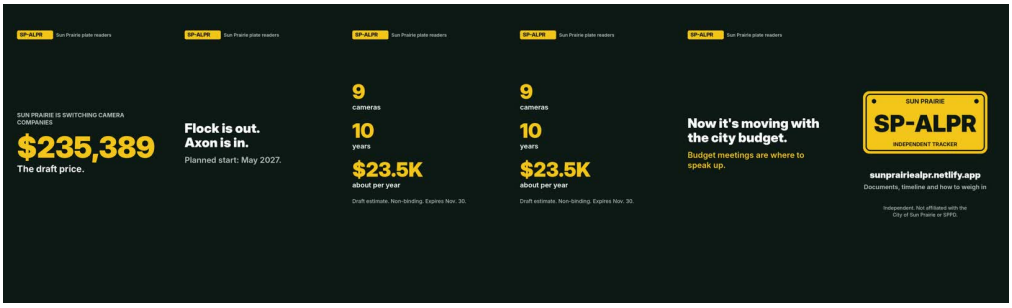

@sunprairiealpr explainer video (frames)

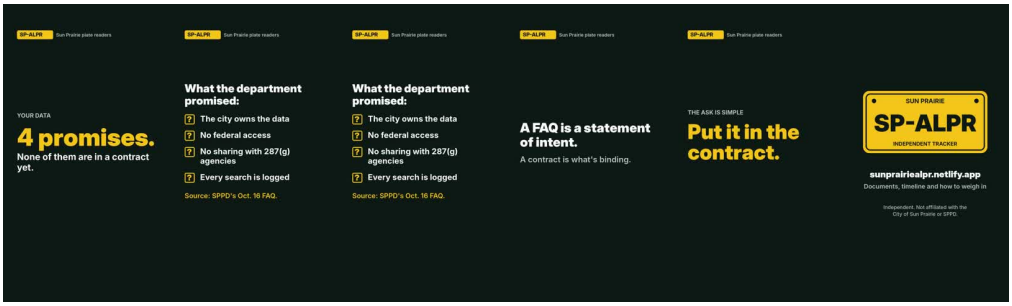

Reel: by the numbers (frames)

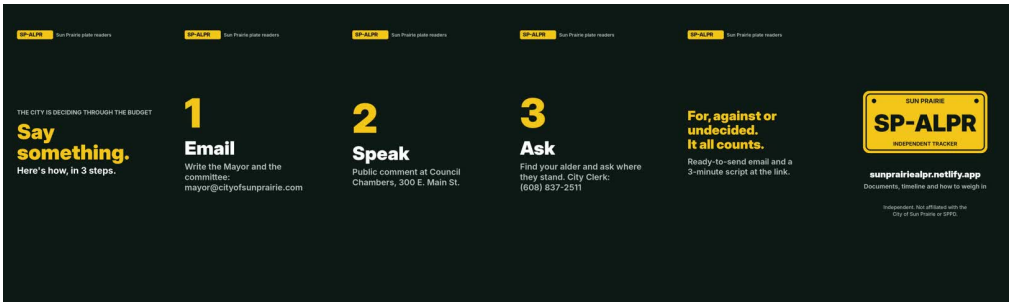

Reel: 5 steps, explained (frames)

Reel: Flock out, Axon in (frames)

Reel: 4 promises (frames)

Reel: say something in 3 steps (frames)

SPPD Policy F-18

SUN PRAIRIE POLICE DEPARTMENT POLICY AND PROCEDURE — Field Operations Policy: AUTOMATIC LICENSE PLATE READERS — POLICY F-18 Updated: March 3, 2026. Reviewed: March 3, 2026. History: Replaces F-18 (12/17/2010); updated 08/11/2014, 10/31/2016, new format 05/06/2025, updated 3/03/2026. 2598 West Main Street, Sun Prairie, WI 53590.

1.1 Policy

The Sun Prairie Police Department (SNPD) utilizes Automated License Plate Readers (ALPR) to enhance public safety, aid in criminal investigations, and improve law enforcement efficiency. ALPR capture infrared images of vehicle license plates, convert them to digital text using Optical Character Recognition (OCR) technology, and match them against databases of license plates of interest. ALPR can alert officers when a match is detected, aiding in identifying stolen vehicles, wanted persons, and other subjects of interest.

This policy governs the use, management, and retention of ALPR data by SNPD personnel, ensuring compliance with privacy laws and safeguarding civil liberties.

1.2 Objective

To provide department members with guidelines on the proper use of the ALPR in their official duties.

1.3 Definitions

- ALPR (Automated License Plate Reader): A system consisting of cameras and technology that captures images of vehicle license plates, converts them to digital text using OCR, and compares them to databases of vehicles of interest.
- OCR (Optical Character Recognition): Technology that identifies printed characters using photoelectric devices and computer software.
- Read: A digital image of a license plate and associated metadata (e.g., date, time, and geographic coordinates) captured by the ALPR system.
- Alert: A visual and/or auditory notice triggered when an ALPR system detects a match between a scanned license plate and a plate of interest in the system's database.
- Hit: A read that matches a license plate on a list of plates related to stolen vehicles, wanted individuals, or other investigatory purposes.
- Hot List: A list of license plate numbers of interest to law enforcement agencies, including, but not limited to, stolen cars, vehicles owned by persons of interest, and vehicles associated with AMBER Alerts. Hot list information can come from a variety of sources, including the National Insurance Crime Bureau and the National Crime Information Center (NCIC), national AMBER Alerts and Department of Homeland Security watch lists. The Department of Transportation can provide lists of expired registration plates, and agencies can interface their own locally compiled hot lists. These lists serve an officer safety function as well as an investigatory purpose.
- Stored ALPR Data: Data, including license plate images, vehicle images, and metadata, obtained by the ALPR system and stored for future querying.

1.4 Procedure

1.4.1 Management and Oversight

1.4.1.1 System Oversight: The Chief of Police shall assign a System Administrator who is responsible for overseeing the ALPR program, including the installation, maintenance, and operation of ALPR units. This individual will also manage system security, data retention, and system audits. 1.4.1.2 Data Retention: ALPR data will be retained for 30 days unless needed for investigative purposes.

1.4.2 Authorized User Access

1.4.2.1 Authorized Personnel: Only authorized department personnel who have received training in the use of ALPR systems may access or operate the system. Unauthorized access or use of ALPR data is strictly prohibited. 1.4.2.2 Login Requirements: Authorized users must log into the ALPR system using their designated credentials. All access will be automatically logged, including the date, time, user identity, and purpose of access. 1.4.2.3 Data Access Logs: The system will automatically record all queries and access to stored ALPR data, including the user, the purpose of the query, and the data retrieved. These logs will be used for auditing purposes. 1.4.2.4 Data Confidentiality: ALPR data is confidential and restricted to legitimate law enforcement purposes. 1.4.2.5 Background Investigations: Personnel authorized to access or use ALPR systems must undergo background investigations, including CIB and FBI record checks by fingerprint identification, before being granted access.

1.4.3 ALPR Usage

1.4.3.1 Alert Verification: Upon receiving an alert, officers must visually verify that the license plate matches the plate read by the ALPR system. Officers must also verify the current status of the vehicle through dispatch or a law enforcement database (e.g., NCIC, TIME) before taking any enforcement action. 1.4.3.2 Documentation of Actions: Any law enforcement actions taken based on an ALPR alert must be documented in a report or citation, including the reason for the stop, the verification process, and any enforcement actions taken. Standardized statement: "The vehicle was identified via the Automated License Plate Reader (ALPR) system. The license plate was visually verified, and the status was confirmed through NCIC/TIME before enforcement action was taken." 1.4.3.3 Reporting Successful Uses: Officers are required to report all successful uses of the ALPR system (e.g., identification of stolen vehicles or wanted persons) to the System Administrator by using the ALPR classification in RMS.

1.4.4 Access to Stored ALPR Data

1.4.4.1 Querying ALPR Data: Authorized personnel may query stored ALPR data only when there is a reasonable belief that the data relates to an active investigation or legitimate law enforcement objective. Authorized users shall document the purpose of all ALPR searches. At a minimum, documentation for each search shall include: (1) A case number — a Sun Prairie or another agency's case number; if none exists yet, a Sun Prairie case number shall be generated. (2) A search type selected from the ALPR system's standardized incident categories (aligned with crime classifications such as NIBRS). (3) A search reason that briefly explains how the search relates to the investigation (e.g., suspect vehicle, victim vehicle, or a vehicle known to have been in the area). (4) A lawful objective tied to a legitimate law

enforcement purpose. ALPR searches shall be conducted and documented in a manner that allows the department to verify the validity of each search and demonstrate compliance.

1.4.4.2 Data Sharing: ALPR data may be shared through the department-approved license plate reader system with designated law enforcement agencies. ALPR data shall not be shared with federal agencies unless required by court order or expressly approved by the Chief of Police.

1.4.4.3 Dissemination to Non-Law Enforcement Agencies: ALPR data shall only be released to law enforcement agencies for legitimate law enforcement purposes. Any request from non-law enforcement entities must go through the department's open records process. Any other release to non-law enforcement agencies, private individuals, or external organizations is strictly prohibited unless required by court order, subpoena, or the chief or their designee.

1.4.5 Maintenance and Auditing

The System Administrator shall be responsible for ALPR auditing and audit-related reporting. Audits shall assess compliance with this policy and applicable law, including review of system access, search activity, documentation of search purpose, and adherence to data retention periods. The System Administrator shall compile periodic ALPR usage and audit summary reports, which may include the number of reads, alerts, successful deployments, and any identified policy violations. The frequency, scope, methodology, and documentation of audits shall be set forth in a separate audit procedure document approved by the chief. Audit records shall be retained in accordance with department record retention requirements.

1.4.6 System Updates and Technology Changes

The department will regularly review its ALPR systems. The System Administrator will be responsible for (1) implementing necessary software or hardware updates; (2) ensuring updates comply with current legal and regulatory standards; and (3) regularly evaluating the system for required modifications to ensure performance and continued compliance with privacy laws.

1.4.7 Privacy Safeguards

1.4.7.1 Restricted Access: Only authorized personnel with a clear law enforcement purpose may access stored ALPR data. All access is automatically logged and subject to regular audits. Any employee becoming aware of a possible violation, including unauthorized access, use, release and/or dissemination of LPR data, shall refer the matter to his or her supervisor. 1.4.7.2 Limited Data Usage: ALPR systems are only used for legitimate law enforcement objectives, including locating stolen vehicles, identifying wanted persons, and supporting criminal investigations. The system shall not be used to, nor is designed to, surveil or track individuals or vehicles without reasonable suspicion of a crime. 1.4.7.3 Non-Discriminatory Use: ALPR technology shall not be used to monitor individuals or groups based on protected characteristics such as race, religion, gender, or political affiliation. 1.4.7.4 Public Transparency: The department will provide annual reports summarizing the use of ALPR systems, including audits. These reports will be made available to the public in accordance with department policies on public records requests.

Flock Audit Procedure

Flock Audit Procedure — Sun Prairie Police Department (updated April 2026)

Internal Audit

- Conducted once a month by the Detective Sergeant.
- The audit will include any flagged searches in the ARAT queue.
- Review of search history or irregularities in system use identified by the Audit Review Assistance Tool (ARAT).
- Email any corrective issues to the involved officer, or to seek clarification.
- Document the search review in the notes section of the ARAT.
- Flock audits of inappropriate searches will be addressed through an internal investigation.

External Audit

- No external audits will be conducted. The information cannot be seen by our agency.
- We rely on other agencies to conduct audits on the use of the system by their officers.

Search data that would flag a search

- Searching the same plate more than 30 days apart
- Searching entirely outside of owned cameras / solely shared cameras
- Searching the same plate with multiple case numbers
- Being the only person searching for one plate and searching for it 10 or more times
- Narrow search window (less than 96 hours), more than 7 times

The audit notes will now be stored on Flock's database by entering notes on flagged searches.

Flock Search Screens

Flock Search Screenshot (March 23, 2026)

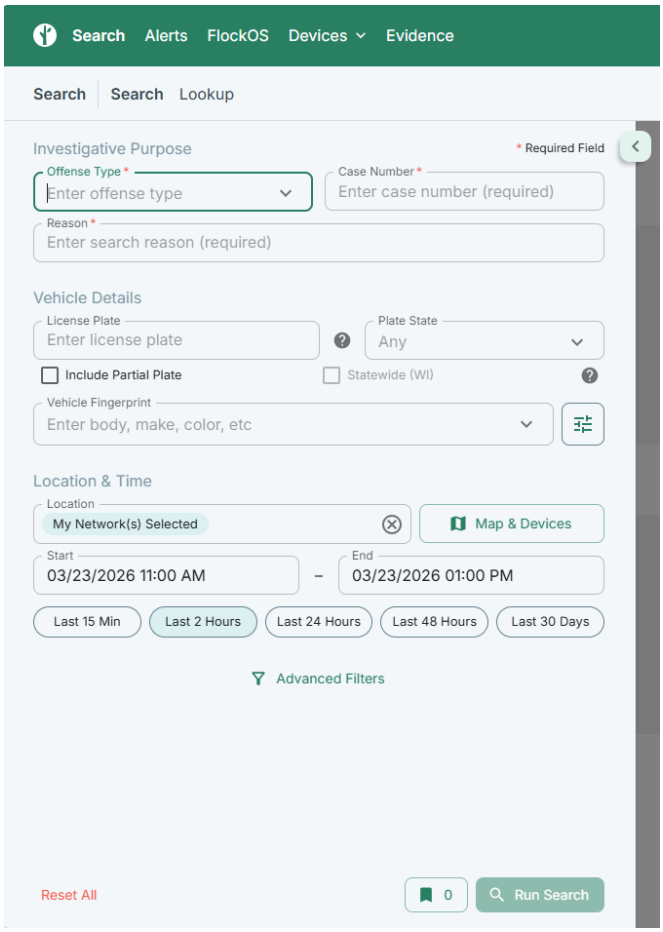

FlockOS search screen (tabs: Search, Alerts, FlockOS, Devices, Evidence):

- Investigative Purpose: Offense Type* (required); Reason* (required search reason); Case Number* (required)
- Vehicle Details: License Plate; Include Partial Plate; Vehicle Fingerprint (body, make, color, etc.); Plate State (Any / Statewide WI)
- Location & Time: Location — "My Network(s) Selected"; Start 03/23/2026 11:00 AM – End 03/23/2026 01:00 PM; quick ranges Last 15 Min / 2 Hours / 24 Hours / 48 Hours / 30 Days
- Map & Devices; Advanced Filters; Reset All; Run Search

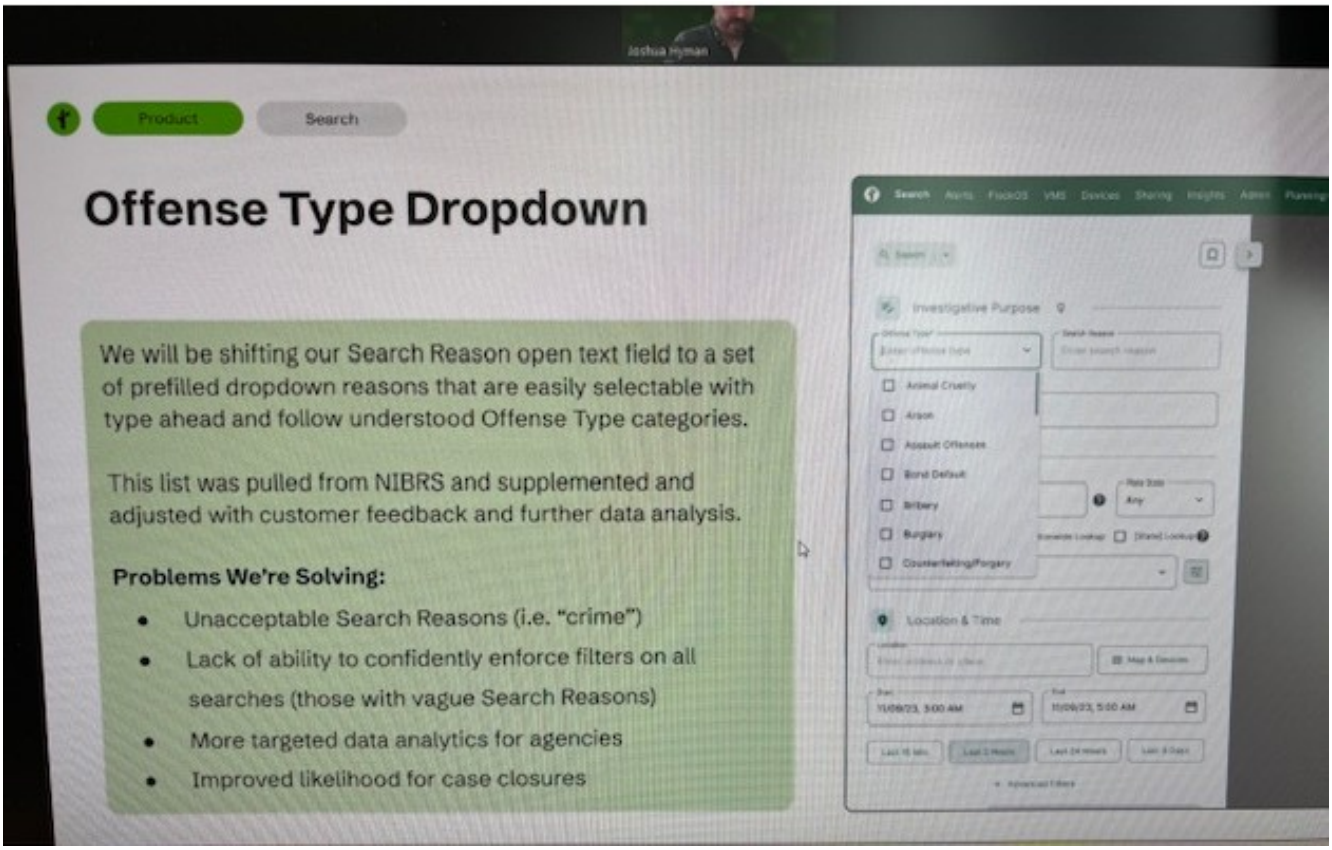

every Flock search requires an offense type, a written reason, and a case number before it can run, and searches can use partial plates and "Vehicle Fingerprint" attributes, not just a full plate.

Flock searches photo (product slide)

Flock product slide titled "Search — Offense Type Dropdown": Flock says it will shift the Search Reason open text field to a set of prefilled dropdown reasons, selectable with type-ahead, that follow understood Offense Type categories. The list was pulled from NIBRS and supplemented with customer feedback and data analysis. Problems Flock says this solves: unacceptable search reasons (i.e. "crime"); lack of ability to confidently enforce filters on all searches (those with vague search reasons). Stated benefits: more targeted data analytics for agencies; improved likelihood for case closures.

Flock search screen, March 23, 2026

Flock Utilization & Hits (up to Sept. 21, 2026)

Sun Prairie Police Department document, printed and annotated by Zackary ("only w/ outcomes" written at the top). Highlighted dates in the original mark the 25 items added since the May 22, 2026 update. A few lines at page edges were cut off in the photos.

Flock Utilization & Hits — By Category — Up to 9.21.2026

25 new notable items since the last update on 5.22.26

Hits on Stolen Vehicles

- 12/12/23 – Hit on stolen vehicle. No users logged in to receive alerts.
- 12/18/23 – Flock hit on stolen vehicle. Vehicle located and stopped. Stolen status had not been removed by originating agency.
- 01/25/24 – Flock hit for a stolen plate (known to be on a stolen vehicle). Hits showed EB Main then WB Main minutes later. Next hit EB so we believed it went to Park Circle. Went to the lot in an unmarked vehicle, set up to watch vehicle and make a plan, vehicle fled and missed road spikes thrown by DASO.
- 02/25/24 – Flock hit on a stolen vehicle. Vehicle located unoccupied. RO contacted and advised that the vehicle had already been located. MAPD contacted to remove it from NCIC.
- 05/28/24 – Flock hit for a stolen vehicle. Vehicle located unoccupied. Two subjects detained nearby and determined to be related. Stolen gun, gun with auto-sear, MJ, and Rx pills seized, stolen vehicle recovered. Possible link for subjects to a Madison homicide.
- 05/28/24 – Hit on stolen plate from TX. Vehicle located, VIN determined to be fake, vehicle listed as stolen from Milwaukee.
- 06/07/24 – Stolen vehicle driving recklessly. Flock camera used to confirm plate.
- 06/18/24 – Flock hit on a stolen vehicle being towed. Officers located the vehicle and returned it to the owner.
- 06/18/24 – Flock alerted to stolen vehicle. Vehicle was located and towed to an impound lot.
- 07/17/24 – Flock alert to a stolen plate. Vehicle was located. Subject was arrested for Fitchburg PC and cited for vehicle violations.
- 09/13/24 – Flock hit on stolen vehicle, located nearby and recovered.
- 10/25/24 – Flock hit on stolen vehicle. Vehicle stopped and determined owner had recovered it from a tow yard earlier in the day.
- 11/07/24 – Flock hit on vehicle stolen in other state during armed carjacking. Vehicle located, pursued until it was no longer seen, pursuit terminated.
- 12/10/24 – Vehicle listed as stolen. Located and determined to be a civil issue.
- 02/03/25 – Flock alerted to a stolen vehicle. The vehicle and driver were located and the driver was arrested on a warrant and OMVWOC.
- 01/21/26 – Alert for a stolen vehicle. Officers checked the area and located the vehicle. Driver was contacted but not arrested at the request of the listing agency. Vehicle recovered and towed.

- 04/10/26 – Vehicle stolen from SP in March, hit on LPR in Maple Bluff and Sun Prairie. Agencies worked together and located the vehicle in Maple Bluff, containing 2 spent and 1 live round. WICAN sent regarding ongoing investigation.
- 04/14/26 – LPR alert for a stolen vehicle. Image showed it on a tow truck. Truck located and stopped. Madison PD contacted for their stolen vehicle.
- 04/30/26 – LPR alert on stolen vehicle. Vehicle located, occupants detained, one subject arrested on several charges, 2nd occupant referred on charges, 3rd occupant cited and released. Vehicle and arrested subject linked to an overdose death being investigated by Madison PD. Arrested subject's phone seized and turned over to Madison PD.
- 05/01/26 – Caller reporting vehicle theft. LPR show vehicle being towed.
- 05/18/26 – LPR hit on stolen vehicle. Vehicle recovered unoccupied and turned over to other agency.
- 05/20/26 (new) – LPR hit on stolen plate. Vehicle located in nearby business parking lot. Driver/RO contacted, she advised she entered the wrong plate as stolen. She was advised to work with MAPD to correct the issue.
- 06/12/26 (new) – LPR used to confirm plate of theft suspect vehicle, obtain RO/suspect info.
- 06/23/26 (new) – Hit on a stolen vehicle, vehicle located unoccupied, turned over to DASO.
- 06/25/26 (new) – Hit on a stolen vehicle, vehicle located, occupants located, determined to be a civil issue, one occupant jailed on a PO hold.
- 07/04/26 (new) – LPR hit on a stolen vehicle, located and recovered. Driver to be referred.
- 07/23/26 (new) – LPR hit on stolen vehicle, located unoccupied. Returned to owner.
- 08/19/26 (new) – LPR hit on stolen vehicle, high risk stop, suspects apprehended and released after investigation. Vehicle returned to listing agency.
- 09/03/26 (new) – LPR hit on stolen vehicle, located by PD. RO had vehicle back already.

Recovered Stolen Property

- 04/12/24 – Recovered a stolen U-Haul after a Flock hit.
- 04/12/24 – Recovered a separate stolen vehicle after a Flock hit.
- 07/24/24 – Plate added to Flock regarding PC for a weapons violation. Within 5 minutes, Maple Bluff had the car stopped when they got an alert on their camera. Suspect and two guns taken into custody from the vehicle.
- 09/04/24 – Strong-armed robbery at a retail store in SP. Suspect plate was entered into Flock and provided a hit. Vehicle was stopped, driver fled on foot then returned and was jailed. 2 guns recovered from vehicle.
- 11/09/24 – Stolen vehicle recovered unoccupied after Flock alert.
- 03/12/25 – Several vehicles stolen from Madison dealerships. An officer searched for matching vehicles, found a Flock read, then located one of the stolen vehicles in Sun Prairie.
- 10/21/25 – Recovered stolen truck located at nearby apartment after Flock hit.
- 01/29/26 – Stolen license plate recovered.
- 04/22/26 – Caller reporting her car stolen. LPR indicates it was towed.

- 06/08/26 (new) – Suspect used the victim's lost credit card. LPR alerted to suspect vehicle in the area, located and stopped, and suspect arrested.

Retail Theft / Strongarm Robbery / Fraud

- 12/04/23 – (day of installation) – Retail theft at TJ Maxx, driver states he drove to Madison and dropped off someone. Flock caught the car passing Main and O'Keeffe immediately after the theft, contradicting the driver's story.
- 01/18/24 – $1400 retail theft at Walmart. Partial IL plate obtained. Plate captured in IL, investigation led to a suspect who is an associate of the RO.
- 02/23/24 – Flock provided the correct plate for a retail theft at Goodwill.
- 03/11/24 – Counterfeit cash and fraudulent return at Target. Plate provided was incorrect. Correct plate was confirmed in Flock.
- 10/16/24 – Retail theft where a plate was obtained. Alert was entered into Flock and DASO stopped the vehicle and obtained IDs.
- 01/09/25 – Suspect arrested for misd. retail theft and drug para. after a Flock hit on his plate. Phone taken as evidence in a burglary.
- 01/09/25 – Suspect arrested for misd. retail theft, felony bail jumping, misd. bail jumping and drug para after a Flock hit on his plate.
- 01/28/25 – Suspect conducts a gift card scam at a local retailer. Flock captures suspect vehicle and helps ID suspect.
- 05/02/25 – Attempted retail theft at Target. Flock IDed the vehicle, supplemental 10-28 query IDed the driver.
- 05/06/25 – Sauk Co. sent out a WICAN regarding a $50K burglary. Det. Ennis was able to locate the vehicle in Flock and provided the plate to Sauk Co.
- 09/16/25 – Officer added a plate to his hotlist and received a hit. Subject arrested for 4 warrants and retail theft charges.
- 09/23/25 – Armed robbery, plate obtained by victim. Vehicle hit on Flock and officers went to the area, located it, conducted a high-risk stop and arrested one subject for armed robbery.
- 11/02/25 – Counterfeit $100 used at local store. Suspect identified through vehicle located with Flock.
- 12/06/25 – $79K ATM jackpotting. LPR camera captured suspect vehicle, allowed detective to conduct offline search, discovered the vehicle was stopped and driver IDed the same night for an unrelated traffic violation. LPR in another jurisdiction alerted our detective, who contacted that agency and they picked up the vehicle.
- 01/15/26 – Retail theft vehicle identified by LPR. One subject referred for theft charges.
- 04/02/26 – Felony retail theft. LPR used to identify plate, vehicle, suspects.
- 04/21/26 – Vehicle used in retail thefts around Dane County, including SP. Plate entered into LPR, located within a few hours based on an alert coming into SP. Suspect cited for retail theft.
- 04/28/26 – Credit card fraud where suspect's card was used, items delivered to his home, then someone came to pick up the items once they were delivered and before caller retrieved them. LPR identified the vehicle and owner. Owner contacted, believed to be an

unwitting participant in a scam/fraud.

- 05/17/26 – LPR used to identify associate of burglary suspect. Associate confirmed the suspect's identity. Suspect arrested and jailed.
- 05/18/26 – Credit card theft and fraudulent use. Suspect plate provided by caller. Plate linked to four other cases: SP26-08962, SP26-0920, SP26-08968, and (DASO) 26-192437.
- 05/28/26 (new) – LPR used to identify a suspect vehicle in a fraud. Case is on-going.
- 05/31/26 (new) – Money taken from local business. LPR identified suspect vehicle, suspect cited.
- 06/16/26 (new) – Retail theft. LPR identified suspect's vehicle.
- 06/19/26 (new) – Retail theft. LPR alert helped locate suspect vehicle. Suspect jailed on theft and bail jumping.
- 08/13/26 (new) – Retail theft/fraud. LPR identified suspect vehicle. Case continues.
- 09/17/26 (new) – Retail theft. Vehicle identified using LPR.

Involving a Suspect or Vehicle Fleeing

- 08/22/23 – Vehicle fled from an officer attempting a traffic stop. Officer captured first 3 letters of plate. Vehicle passed Cottage Grove's camera moments later. Plate determined from first 3 letters and vehicle description.
- 12/20/23 – Suspect fled a SP officer. Plate was entered into our hotlist. Hit on Flock alerted officers that the vehicle was returning to the RO address. Officers waited and apprehended the driver on several warrants and PC.
- 01/19/24 – Fight on Schiller St., vehicle descriptions provided. Flock showed 1 vehicle leaving. RO contacted but he was uncooperative. NFA, NR.
- 01/29/24 – Vehicle fled from an attempted traffic stop at night. The officer was unable to confirm the plate until locating it later in a Flock search.
- 02/10/25 – Reckless driver and fleeing from an attempted stop. Officers used Flock to ID the vehicle, spoke to the RO and ID'd the driver. Driver was jailed for flee/elude.
- 06/11/25 – Hit on vehicle of interest. Occupants fled. One got into an uninvolved occupied vehicle and ordered the driver to drive. He was taken into custody. 2nd suspect was taken into custody after foot pursuit.
- 10/22/25 – Flock utilized in identifying and locating burglary suspect vehicle.
- 11/21/25 – A citizen reported another driver pointed a gun at him. The suspect vehicle fled officers during a pursuit and got away. An officer entered the plate into their hotlist and were alerted to it in SP by a Flock camera. The vehicle was located and witnesses provided information leading to the suspect's arrest.
- 12/05/25 – Officer observed a car speeding on Main St. estimated over 100mph. Vehicle fled and was not initially found. Flock confirmed the vehicle's plate. Vehicle later found in SP and plate matched. Suspect arrested for eluding and reckless driving.
- 12/17/25 – Drug overdose. Subject overdoses and is revived with Narcan. Witness provided a vehicle description from the hand-to-hand deal. Officer used Flock to find a matching vehicle.
- 01/11/26 – LPR alert on vehicle from 2025 case. Suspect located, jailed for weapons violations.

- 01/17/26 – Arrested subject wondering where his car went after his arrest (PD did not remove it). LPR showed it being towed, tow company identified and shared with vehicle owner.
- 02/15/26 – Suspect vehicle in Infiniti theft triggered alert. Officers stopped and IDed occupants for the Infiniti case.
- 03/07/26 – Road rage/CDTP incident. Officers used LPR to identify the vehicle and a temp tag in the window, which helped ID the suspect.
- 03/19/26 – LPR hit on a vehicle regarding Infiniti thefts. Vehicle stopped, PC search located a handgun with an auto-sear. Passenger booked into jail on multiple gun and 961 charges.
- 04/16/26 – Fleeing vehicle identified via LPR. PC for suspect, vehicle later located and impounded. Suspect turned himself in on charges of Flee/Elude.
- 04/25/26 – LPR alert to vehicle operated by wanted subject. Subject located and arrested.
- 08/19/26 (new) – Caller reported another driver pointed a gun at him. LPR provided vehicle plate. Case under investigation.
- 09/11/26 (new) – Suspect threatened a member of LE. Suspect's plate was entered into LPR.
- 09/15/26 (new) – Overdue rental vehicle. Suspect said they moved to Chicago. LPR checked in Sun Prairie and in Chicago and confirms the move to Chicago. Case still pending.

Involving a Hit & Run

- 12/04/23 – (Day of installation) – Pedestrian and his children were almost struck by a car, then driver cursed at the pedestrian. Plate provided was inaccurate. Flock search located the car by make and color.
- 03/13/24 – Hit and run case. Flock photos confirmed the license plate hanging off the suspect vehicle as described by the victim.
- 04/05/24 – Caller reported his vehicle being rear-ended and suspect vehicle fled. Caller provided a description and a plate, but the plate was incorrect. Officer IDed the suspect vehicle using Flock at the nearby intersection.
- 05/12/24 – Hit and run crash. Vehicle was IDed by Flock after the fact. Driver arrested for felony and misdemeanor bail jumping, DA also criminally charged Hit and Run.
- 05/23/24 – Hit and run in DeForest. Officer checked Flock and found the car in the area of the cameras. DeForest declined arrest but information was shared with their PD.
- 06/06/24 – Hit and run to a mailbox. Vehicle IDed through Flock.
- 12/05/25 – Hit and run. Flock was used to confirm plate and determined the plate was not on the proper vehicle, allowing officers to search for the correct vehicle. Vehicle later found and towed.
- 02/14/26 – Suspect vehicle identified for hit and run crash. Driver cited.
- 04/25/26 – Hit and run suspect vehicle identified by LPR. Driver arrested for related domestic and cited for H&R.

Involving a Shooting / Probable Cause / Domestic DC / Warrant

- 12/15/23 – Plate entered for suspect in a domestic with 99's.
- 03/06/24 – Flock alert on a Dane County camera then SP camera for 99 and felony PC, vehicle heading towards SP. Officers located vehicle and arrested the subject and turned her over to DASO.
- 04/22/24 – Suspect in a domestic reportedly back at the victim's apartment, then made threats to harm himself. Flock hit on his vehicle and officers located him and took him into custody.
- 06/14/24 – Vehicle for a subject with PC for arrest hit on Flock, located nearby. Subject contacted and arrested for charges and additional drug charges.
- 07/28/24 – Flock alert on Fitchburg PC. Subject 95 and transported to jail.
- 08/05/24 – Vehicle involved in a shooting in Dane County hit on Flock, located at Woodman's. Involved subject located and taken into custody inside.
- 10/17/24 – Flock hit on suspect in a CDTP case with 99's. Subject jailed.
- 01/11/25 – PC arrest for Recklessly Endangering Safety – Dangerous Weapon after a Flock alert on the driver's vehicle.
- 02/23/25 – Suspect was seen looking into a bathroom stall in a women's bathroom. Plate captured and added to Flock. Flock alert, suspect located and arrested.
- 10/07/25 – Sunfield Shooting, identified rental car leaving the scene which led to suspects being identified.
- 12/09/25 – Stalking/Domestic DC – Caller reported an ex-partner stalking her in her vehicle, crashing into her, repeated unwanted communications. Suspect denied having the vehicle, driving the vehicle, or being in SP. Camera confirmed the time and location the victim described and captured both vehicles. Suspect booked into jail for stalking, DC, reckless driving.
- 12/17/25 – Warrant arrest. An officer had a wanted driver's vehicle plate on a hotlist and received an alert. The officer located the vehicle and arrested the driver for a warrant.
- 03/23/26 – LPR hit on vehicle driven by subject with PC. Subject located, jailed on theft charges.
- 03/29/26 – Warrant arrest after LPR alerted to the vehicle.
- 04/25/26 – Suspect from domestic (DC, battery) taken into custody after alert on vehicle.
- 08/28/26 (new) – LPR hit on a wanted person's vehicle. Subject jailed on the warrant.
- 08/30/26 (new) – LPR hit on suspect in domestic violence case. Suspect located and jailed.
- 09/09/26 (new) – LPR hit on suspect vehicle in Sun Prairie shooting. One suspect taken into custody.

Assistance to Other Agencies / Data Sharing

- 08/22/23 – Vehicle fled from an officer attempting a traffic stop. Officer captured first 3 letters of plate. Vehicle passed Cottage Grove's camera moments later. Plate determined from first 3 letters and vehicle description.
- 08/23/23 – Assist other Agency – group of female shoplifters in Madison, also causing disturbances at stores. Vehicle description and partial plate provided. Vehicle identified through camera data.

- 12/15/23 – WICAN from Verona PD IDed vehicle in a check fraud and receipts from a SP business. Flock hits show the vehicle in SP the same day. Business was contacted and they were also victimized. Info shared with officer.
- 01/21/24 – Female attempted to hit a male with her car then fled. She was uncooperative about turning herself in. Two vehicles put on Flock hotlist. DASO got a hit on one and arrested her for our PC (Recklessly Endangering Safety).
- 03/06/24 – Flock alert on a Dane County camera then SP camera for 99 and felony PC, vehicle heading towards SP. Officers located vehicle and arrested the subject and turned her over to DASO.
- 06/23/24 – Flock alerted to a vehicle associated to a Madison PD homicide suspect. Vehicle located by an officer. SNPD and Madison PD set up surveillance. Madison left to pursue another ATL. SNPD cleared due to low staffing.
- 08/05/24 – Vehicle involved in a shooting in Dane County hit on Flock, located at Woodman's. Involved subject located and taken into custody inside.
- 02/14/25 – Madison PD were investigating a homicide. An SP officer was able to use Flock to ID the vehicle and plate. As the officer was conducting that search, another officer located a suspicious vehicle behind a business and contacted the driver. It was the vehicle just identified by the other officer. Madison PD arrived and took custody of the driver.
- 01/29/26 – Armed carjacking in Madison, victim had ties to Sun Prairie. LPR was utilized to alert PD in case the suspect came to SP to confront the victim. LPR later indicated vehicle was enroute to Chicago.
- 02/22/26 – LPR hit on stolen plate. Vehicle and suspect identified, Madison PD came to interview and issued misdemeanor citation.
- 03/27/26 – Green County had a fatal hit and run with a pedestrian victim. They released a WICAN with plate information. ALPR alerted officers to the vehicle and it was located. Photos of that vehicle were sent to Green County and it was ruled out as the suspect vehicle.
- 05/18/26 – DeForest PD put out a WICAN seeking assistance identifying a felony theft suspect and vehicle. An LPR search identified a possible plate, which led to a previous Sun Prairie case (SP26-08980). The SP officer's arrest report had photos of the suspect that matched the DeForest suspect. Information passed on to DeForest PD.
- 07/20/26 (new) – Middleton PD sent out a WICAN about a stolen vehicle. SNPD received an LPR alert, located the vehicle and suspect, and jailed him on OMVWOC and Threats to LE.
- 07/26/26 (new) – LPR in Sun Prairie and Marshall used during stabbing investigation.

Investigations / Verification of Information

- 01/24/24 – Caller was followed from SP to Madison. Provided vehicle description and timeframe. Suspect vehicle found via Flock.
- 02/01/24 – Flock search located a vehicle en-route to Madison in reference to an infant death. This was prior to obtaining video from the driver's apartment complex showing their departure time.
- 03/14/24 – Caller reported her car possibly stolen. Flock showed it being towed by a tow company.
- 02/15/26 – LPR hit on vehicle regarding Infiniti thefts. Case information obtained.

- 02/21/26 – Caller reporting his vehicle missing. LPR showed it was towed. Information shared with vehicle owner.
- 02/23/26 – LPR utilized to confirm suspect vehicle was in the city on the date and time of a burglary/copper theft.
- 06/25/26 (new) – LPR used in investigation of multiple burglaries, auto thefts. Investigation continues.

Missing Person / Homicide Investigations

- 05/28/24 – Flock hit for a stolen vehicle. Vehicle located unoccupied. Two subjects detained nearby and determined to be related. Stolen gun, gun with auto-sear, MJ, and Rx pills seized, stolen vehicle recovered. Possible link for subjects to a Madison homicide.
- 06/23/24 – Flock alerted to a vehicle associated to a Madison PD homicide suspect. Vehicle located by an officer. SNPD and Madison PD set up surveillance. Madison left to pursue another ATL. SNPD cleared due to low staffing.
- 01/12/25 – Missing person reported. Vehicle of the person last known to be with the missing person captured by Flock on Portage Rd before and after her disappearance. Body later found near Flock cameras. Suspect charged with 1st degree intentional homicide.
- 02/13/26 – Callers concerned about elderly relative who left, has declining mental capabilities. Vehicle located by DCSO after nearby LPR hits. Subject checked on, returned home to family.
- (date partly cut off)/13/26 – LPR hit on a plate for a missing person. Vehicle and person located, welfare checked, reporting party and agency notified.
- 09/__/26 (new) – Attempted homicide in Madison. Involved vehicle hit LPR in Sun Prairie. Sun Prairie Officers located vehicle in Sun Prairie, assisted Madison with taking suspect into custody.

National ALPR Principles (Sept. 23 Senate hearing handout)

Handout from the Sun Prairie Police Department, received at the September 25 meeting. Highlighting is from the original. Part of the page break between the two sheets was not photographed.

09/23/26 Senate Judiciary Subcommittee on Crime and Counterterrorism hearing

- 13 principles released by national law enforcement and public safety organizations (International Association of Chiefs of Police, National Sheriff's Organization, National District Attorneys Association, National Fusion Center Association, and National High Intensity Drug Trafficking Areas, and more)
- Sun Prairie Police Department currently follows all 13 principles.
- **Written policies.** Every law enforcement agency using ALPR systems must adopt and enforce clear written policies governing authorized uses, access, documented queries, verification, retention, sharing, data security, auditing, and accountability.
- **Permitted uses.** ALPR must be used by trained and authorized law enforcement personnel only for legitimate law enforcement and public safety purposes.
- **Authorized access.** System access must be subject to strong controls, routine auditing, and accountability for misuse—and promptly removed when an individual's duties no longer require it.
- **Auditing and accountability.** Agencies must maintain access logs, conduct routine audits, and investigate potential misuse. Policy violations shall result in meaningful discipline, up to and including termination, consistent with applicable due process requirements. Suspected criminal misuse must be referred to the appropriate authorities for investigation and potential prosecution under applicable law.
- **Required training.** Personnel with access to ALPR information shall receive initial and ongoing training on permitted uses, verification requirements, privacy and security protections, and the consequences of misuse.
- **Documented queries.** ALPR queries must be tied to an official case number or another documented law enforcement or public safety purpose, with query and access logs maintained for auditing and accountability.
- **Verification of plate matches.** ALPR information must be appropriately verified before enforcement action is taken. An alert alone does not identify the driver, establish guilt, or replace other investigative work.
- **Confidentiality.** ALPR data collected for law enforcement purposes must remain appropriately protected from public disclosure. Comparable protections must apply when a private company stores or manages the information on behalf of a government agency.
- **Meaningful retention.** Retention policies must preserve information needed for legitimate investigations while protecting privacy and security. The significance of a vehicle may not become apparent until weeks or months after a crime, particularly when a victim's report is delayed or an investigation develops over time. Strong access controls, documented queries, and auditing are more effective safeguards against misuse than destroying potentially important investigative information after an arbitrarily short time

period.

- **Responsible data sharing.** Law enforcement must be able to responsibly share and query ALPR information across jurisdictions because missing people, victims, dangerous offenders, and criminal activity do not stop at jurisdictional boundaries. Sharing by agencies must be limited to legitimate law enforcement and public safety purposes and subject to appropriate controls and oversight. Government agencies must not sell access to ALPR data they collect.
- **Law enforcement access to non-governmental ALPR data.** The same restrictions, safeguards, and accountability requirements must apply to law enforcement's access to and use of ALPR data regardless of whether the data was collected by a government agency, a commercial provider, or another non-governmental entity.
- **Data security.** Law enforcement agencies, technology providers, and other entities that store or manage ALPR information must maintain strong security, access, and disclosure protections.

Flock Safety Contract (2023)

Printed copy of Sun Prairie PD's 2023 Flock Safety contract (DocuSign Envelope ID AF1416CF-A101-46BB-838F-6BB913164F8B). The order form pages are typed out below, followed by the full text of the Master Services Agreement, typed out from photographs of the printed pages (check the original for anything important).

Exhibit A — Order Form

- Customer: WI - Sun Prairie PD
- Legal Entity Name: WI - Sun Prairie PD
- Accounts Payable Email: msteffes@cityofsunprairie.com
- Address: 2598 W Main St, Sun Prairie, Wisconsin 53590
- Initial Term: 24 Months
- Renewal Term: 24 Months
- Payment Terms: Net 30
- Billing Frequency: Annual Plan – First Year Invoiced at Signing
- Retention Period: 30 Days

Hardware and Software Products (annual recurring amounts over subscription term)

- Flock Safety Platform — $15,000.00
- Flock Safety LPR Products: Flock Safety Falcon® — Included, quantity 5

Professional Services and One Time Purchases

- Professional Services – Existing Infrastructure Implementation Fee — $150.00 × 5 = $750.00
- Subtotal Year 1: $15,750.00
- Annual Recurring Subtotal: $15,000.00
- Estimated Tax: $0.00
- Contract Total: $30,750.00

"Taxes shown above are provided as an estimate. Actual taxes are the responsibility of the Customer. This Agreement will automatically renew for successive renewal terms of the greater of one year or the length set forth on the Order Form (each, a 'Renewal Term') unless either Party gives the other Party notice of non-renewal at least thirty (30) days prior to the end of the then-current term."

Billing Schedule

- Year 1, at contract signing: $15,750.00
- Annual recurring after Year 1: $15,000.00
- Contract total: $30,750.00 (tax not included)

Product and Services Description

- Flock Safety Falcon®: An infrastructure-free license plate reader camera that utilizes Vehicle Fingerprint® technology to capture vehicular attributes. The Term shall commence upon first installation and validation of Flock Hardware.
- Installation on existing infrastructure: One-time Professional Services engagement. Includes site & safety assessment, camera setup & testing, and shipping & handling in accordance with the Flock Safety Advanced Implementation Service Brief.
- Professional Services – Standard Implementation Fee: One-time Professional Services engagement. Includes site and safety assessment, camera setup and testing, and shipping and handling in accordance with the Flock Safety Standard Implementation Service Brief.
- Professional Services – Advanced Implementation Fee: One-time Professional Services engagement. Includes site & safety assessment, camera setup & testing, and shipping & handling in accordance with the Flock Safety Advanced Implementation Service Brief.

FlockOS Features (Package: Essentials)

- Community Cameras (Full Access): Access to all privately owned Flock devices within your jurisdiction that have been shared with you.
- Unlimited Users: Unlimited users for FlockOS.
- State Network (LP Lookup Only): Allows agencies to look up license plates on all cameras opted in to the statewide Flock network.
- Nationwide Network (LP Lookup Only): Allows agencies to look up license plates on all cameras opted in to the nationwide Flock network.
- Direct Share – Surrounding Jurisdiction (Full Access): Access to all Flock devices owned by law enforcement that have been directly shared with you. Have ability to search by vehicle fingerprint, receive hot list alerts, and view devices on the map.
- Time & Location Based Search: Search full, partial, and temporary plates by time at particular device locations.
- License Plate Lookup: Look up specific license plate location history captured on Flock devices.
- Vehicle Fingerprint Search: Search footage using Vehicle Fingerprint™ technology. Access vehicle type, make, color, license plate state, missing / covered plates, and other unique features like bumper stickers, decals, and roof racks.
- Flock Insights/Analytics page: Reporting tool to help administrators manage their LPR program with device performance data, user and network audits, plate read reports, hot list alert reports, event logs, and outcome reports.
- ESRI Based Map Interface: Flock Safety's maps are powered by ESRI, which offers the ability for 3D visualization, viewing of floor plans, and layering of external GIS data, such as City infrastructure (i.e., public facilities, transit systems, utilities), Boundary mapping (i.e., precincts, county lines, beat maps), and Interior floor plans (i.e., hospitals, corporate campuses, universities).
- Real-Time NCIC Alerts on Flock ALPR Cameras: Alert sent when a vehicle entered into the NCIC crime database passes by a Flock camera.
- Unlimited Custom Hot Lists: Ability to add a suspect's license plate to a custom list and get alerted when it passes by a Flock camera.

Signatures

"By executing this Order Form, Customer represents and warrants that it has read and agrees to all of the terms and conditions contained in the Master Services Agreement attached."

- Flock Group, Inc.: Mark Smith, General Counsel — 10/6/2023
- Customer, WI - Sun Prairie PD: Michael Steffes, Chief of Police — 10/6/2023

Master Services Agreement

Entered into by Flock Group, Inc. (1170 Howell Mill Road NW Suite 210, Atlanta, GA 30318) and the Customer on September 8, 2023. Key recital: "Pursuant to Flock's standard Retention Period (defined below) Flock deletes all Footage on a rolling thirty (30) day basis, except as otherwise stated on the Order Form." Permitted Purpose: "solely for the awareness, prevention, and prosecution of crime, bona fide investigations and evidence gathering for law enforcement purposes."

Master Services Agreement — full text

Master Services Agreement

This Master Services Agreement (this "Agreement") is entered into by and between Flock Group, Inc. with a place of business at 1170 Howell Mill Road NW Suite 210, Atlanta, GA 30318 ("Flock") and the entity identified in the signature block ("Customer") (each a "Party," and together, the "Parties") on this the 08 day of September 2023. This Agreement is effective on the date of mutual execution ("Effective Date"). Parties will sign an Order Form ("Order Form") which will describe the Flock Services to be performed and the period for performance, attached hereto as Exhibit A. The Parties agree as follows:

RECITALS

WHEREAS, Flock offers a software and hardware situational awareness solution through Flock's technology platform that upon detection is capable of capturing audio, video, image, and recording data and provide notifications to Customer ("Notifications");

WHEREAS, Customer desires access to the Flock Services (defined below) on existing devices, provided by Customer, or Flock provided Flock Hardware (as defined below) in order to create, view, search and archive Footage and receive Notifications, via the Flock Services;

WHEREAS, Customer shall have access to the Footage in Flock Services. Pursuant to Flock's standard Retention Period (defined below) Flock deletes all Footage on a rolling thirty (30) day basis, except as otherwise stated on the Order Form. Customer shall be responsible for extracting, downloading and archiving Footage from the Flock Services on its own storage devices; and

WHEREAS, Flock desires to provide Customer the Flock Services and any access thereto, subject to the terms and conditions of this Agreement, solely for the awareness, prevention, and prosecution of crime, bona fide investigations and evidence gathering for law enforcement purposes, ("Permitted Purpose").

AGREEMENT

NOW, THEREFORE, Flock and Customer agree that this Agreement, and any Order Form, purchase orders, statements of work, product addenda, or the like, attached hereto as exhibits and incorporated by reference, constitute the complete and exclusive statement of the Agreement of the Parties with respect to the subject matter of this Agreement, and replace and supersede all prior agreements, term sheets, purchase orders, correspondence, oral or written communications and negotiations by and between the Parties.

- DEFINITIONS

Certain capitalized terms, not otherwise defined herein, have the meanings set forth or cross-referenced in this Section 1.

1.1 "Anonymized Data" means Customer Data permanently stripped of identifying details and any potential personally identifiable information, by commercially available standards which irreversibly alters data in such a way that a data subject (i.e., individual person or entity) can no longer be identified directly or indirectly.

1.2 "Authorized End User(s)" means any individual employees, agents, or contractors of Customer accessing or using the Services, under the rights granted to Customer pursuant to this Agreement.

1.3 "Customer Data" means the data, media and content provided by Customer through the Services. For the avoidance of doubt, the Customer Data will include the Footage.

1.4. "Customer Hardware" means the third-party camera owned or provided by Customer and any other physical elements that interact with the Embedded Software and the Web Interface to provide the Services.

1.5 "Embedded Software" means the Flock proprietary software and/or firmware integrated with or installed on the Flock Hardware or Customer Hardware.

1.6 "Flock Hardware" means the Flock device(s), which may include the pole, clamps, solar panel, installation components, and any other physical elements that interact with the Embedded Software and the Web Interface, to provide the Flock Services as specifically set forth in the applicable product addenda.

1.7 "Flock IP" means the Services, the Embedded Software, and any intellectual property or proprietary information therein or otherwise provided to Customer and/or its Authorized End Users. Flock IP does not include Footage (as defined below).

1.8 "Flock Network End User(s)" means any user of the Flock Services that Customer authorizes access to or receives data from, pursuant to the licenses granted herein.

1.9 "Flock Services" means the provision of Flock's software and hardware situational awareness solution, via the Web Interface, for automatic license plate detection, alerts, audio detection, searching image records, video and sharing Footage.

1.10 "Footage" means still images, video, audio and other data captured by the Flock Hardware or Customer Hardware in the course of and provided via the Flock Services.

1.11 "Hotlist(s)" means a digital file containing alphanumeric license plate related information pertaining to vehicles of interest, which may include stolen vehicles, stolen vehicle license plates, vehicles owned or associated with wanted or missing person(s), vehicles suspected of being involved with criminal or terrorist activities, and other legitimate

law enforcement purposes. Hotlist also includes, but is not limited to, national data (i.e., NCIC) for similar categories, license plates associated with AMBER Alerts or Missing Persons/Vulnerable Adult Alerts, and includes manually entered license plate information associated with crimes that have occurred in any local jurisdiction.

1.12 "Installation Services" means the services provided by Flock for installation of Flock Services.

1.13 "Retention Period" means the time period that the Customer Data is stored within the cloud storage, as specified in the product addenda.

1.14 "Vehicle Fingerprint™" means the unique vehicular attributes captured through Services such as: type, make, color, state registration, missing/covered plates, bumper stickers, decals, roof racks, and bike racks.

1.15 "Web Interface" means the website(s) or application(s) through which Customer and its Authorized End Users can access the Services.

- SERVICES AND SUPPORT

2.1 Provision of Access. Flock hereby grants to Customer a non-exclusive, non-transferable right to access the features and functions of the Flock Services via the Web Interface during the Term, solely for the Authorized End Users. The Footage will be available for Authorized End Users to access and download via the Web Interface for the data retention time defined on the Order Form ("Retention Period"). Authorized End Users will be required to sign up for an account and select a password and username ("User ID"). Customer shall be responsible for all acts and omissions of Authorized End Users, and any act or omission by an Authorized End User which, including any acts or omissions of authorized End user which would constitute a breach of this agreement if undertaken by customer. Customer shall undertake reasonable efforts to make all Authorized End Users aware of all applicable provisions of this Agreement and shall cause Authorized End Users to comply with such provisions. Flock may use the services of one or more third parties to deliver any part of the Flock Services, (such as using a third party to host the Web Interface for cloud storage or a cell phone provider for wireless cellular coverage).

2.2 Embedded Software License. Flock grants Customer a limited, non-exclusive, non-transferable, non-sublicensable (except to the Authorized End Users), revocable right to use the Embedded Software as it pertains to Flock Services, solely as necessary for Customer to use the Flock Services.

2.3 Support Services. Flock shall monitor the Flock Services, and any applicable device health, in order to improve performance and functionality. Flock will use commercially reasonable efforts to respond to requests for support within seventy-two (72) hours. Flock will provide Customer with reasonable technical and on-site support and maintenance services in-person, via phone or by email at support@flocksafety.com (such services collectively referred to as "Support Services").

2.4 Upgrades to Platform. Flock may make any upgrades to system or platform that it deems necessary or useful to (i) maintain or enhance the quality or delivery of Flock's products or services to its agencies, the competitive strength of, or market for, Flock's products or services, such platform or system's cost efficiency or performance, or (ii) to comply with

applicable law. Parties understand that such upgrades are necessary from time to time and will not diminish the quality of the services or materially change any terms or conditions within this Agreement.

(partially visible adjacent page, upper left, rotated) "...al property or ... thorized End ... orizes"

2.5 Service Interruption. Services may be interrupted in the event that: (a) Flock's provision of the Services to Customer or any Authorized End User is prohibited by applicable law; (b) any third-party services required for Services are interrupted; (c) if Flock reasonably believe Services are being used for malicious, unlawful, or otherwise unauthorized use; (d) there is a threat or attack on any of the Flock IP by a third party; or (e) scheduled or emergency maintenance ("Service Interruption"). Flock will make commercially reasonable efforts to provide written notice of any Service Interruption to Customer, to provide updates, and to resume providing access to Flock Services as soon as reasonably possible after the event giving rise to the Service Interruption is cured. Flock will have no liability for any damage, liabilities, losses (including any loss of data or profits), or any other consequences that Customer or any Authorized End User may incur as a result of a Service Interruption. To the extent that the Service Interruption is not caused by Customer's direct actions or by the actions of parties associated with the Customer, the time will be tolled by the duration of the Service Interruption (for any continuous suspension lasting at least one full day). For example, in the event of a Service Interruption lasting five (5) continuous days, Customer will receive a credit for five (5) free days at the end of the Term.

2.6 Service Suspension. Flock may temporarily suspend Customer's and any Authorized End User's access to any portion or all of the Flock IP or Flock Service if (a) there is a threat or attack on any of the Flock IP by Customer; (b) Customer's or any Authorized End User's use of the Flock IP disrupts or poses a security risk to the Flock IP or any other customer or vendor of Flock; (c) Customer or any Authorized End User is/are using the Flock IP for fraudulent or illegal activities; (d) Customer has violated any term of this provision, including, but not limited to, utilizing Flock Services for anything other than the Permitted Purpose; or (e) any unauthorized access to Flock Services through Customer's account ("Service Suspension"). Customer shall not be entitled to any remedy for the Service Suspension period, including any reimbursement, tolling, or credit. If the Service Suspension was not caused by Customer, the Term will be tolled by the duration of the Service Suspension.

2.7 Hazardous Conditions. Flock Services do not contemplate hazardous materials, or other hazardous conditions, including, without limit, asbestos, lead, toxic or flammable substances. In the event any such hazardous materials are discovered in the designated locations in which Flock is to perform services under this Agreement, Flock shall have the right to cease work immediately.

3. CUSTOMER OBLIGATIONS

3.1 Customer Obligations. Flock will assist Customer Authorized End Users in the creation of a User ID. Authorized End Users agree to provide Flock with accurate, complete, and updated registration information. Authorized End Users may not select as their User ID, a name that they do not have the right to use, or any other name with the intent of impersonation. Customer and Authorized End Users may not transfer their account to anyone else without prior written permission of Flock. Authorized End Users shall not share their account

username or password information and must protect the security of the username and password. Unless otherwise stated and defined in this Agreement, Customer shall not designate Authorized End Users for persons who are not officers, employees, or agents of Customer. Authorized End Users shall only use Customer-issued email addresses for the creation of their User ID. Customer is responsible for any Authorized End User activity associated with its account. Customer shall ensure that Customer provides Flock with up to date contact information at all times during the Term of this agreement. Customer shall be responsible for obtaining and maintaining any equipment and ancillary services needed to connect to, access or otherwise use the Flock Services. Customer shall (at its own expense) provide Flock with reasonable access and use of Customer facilities and Customer personnel in order to enable Flock to perform Services (such obligations of Customer are collectively defined as "Customer Obligations").

3.2 Customer Representations and Warranties. Customer represents, covenants, and warrants that Customer shall use Flock Services only in compliance with this Agreement and all applicable laws and regulations, including but not limited to any laws relating to the recording or sharing of data, video, photo, or audio content.

4. DATA USE AND LICENSING

4.1 Customer Data. As between Flock and Customer, all right, title and interest in the Customer Data, belong to and are retained solely by Customer. Customer hereby grants to Flock a limited, non-exclusive, royalty-free, irrevocable, worldwide license to use the Customer Data and perform all acts as may be necessary for Flock to provide the Flock Services to Customer. [underlined] Flock does not own and shall not sell Customer Data.

4.2 Customer Generated Data. Flock may provide Customer with the opportunity to post, upload, display, publish, distribute, transmit, broadcast, or otherwise make available, messages,

text, illustrations, files, images, graphics, photos, comments, sounds, music, videos, information, content, ratings, reviews, data, questions, suggestions, or other information or materials produced by Customer ("Customer Generated Data"). Customer shall retain whatever legally cognizable right, title, and interest in Customer Generated Data. Customer understands and acknowledges that Flock has no obligation to monitor or enforce Customer's intellectual property rights of Customer Generated Data. Customer grants Flock a non-exclusive, irrevocable, worldwide, royalty-free, license to use the Customer Generated Data for the purpose of providing Flock Services. [underlined] Flock does not own and shall not sell Customer Generated Data.

4.3 Anonymized Data. Flock shall have the right to collect, analyze, and anonymize Customer Data and Customer Generated Data to the extent such anonymization renders the data non-identifiable to create Anonymized Data to use and perform the Services and related systems and technologies, including the training of machine learning algorithms. Customer hereby grants Flock a non-exclusive, worldwide, perpetual, royalty-free right to use and distribute such Anonymized Data to improve and enhance the Services and for other development, diagnostic and corrective purposes, and other Flock offerings. Parties understand that the aforementioned license is required for continuity of Services. [underlined] Flock does not own and shall not sell Anonymized Data.

5. CONFIDENTIALITY; DISCLOSURES

5.1 Confidentiality. To the extent required by any applicable public records requests, each Party (the "Receiving Party") understands that the other Party (the "Disclosing Party") has disclosed or may disclose business, technical or financial information relating to the Disclosing Party's business (hereinafter referred to as "Proprietary Information" of the Disclosing Party). Proprietary Information of Flock includes non-public information regarding features, functionality and performance of the Services. Proprietary Information of Customer includes non-public data provided by Customer to Flock or collected by Flock via Flock Services, which includes but is not limited to geolocation information and environmental data collected by sensors. The Receiving Party agrees: (i) to take the same security precautions to protect against disclosure or unauthorized use of such Proprietary Information that the Party takes with its own proprietary information, but in no event less than commercially reasonable precautions, and (ii) not to use (except in performance of the Services or as otherwise permitted herein) or divulge to any third person any

such Proprietary Information. The Disclosing Party agrees that the foregoing shall not apply with respect to any information that the Receiving Party can document (a) is or becomes generally available to the public; or (b) was in its possession or known by it prior to receipt from the Disclosing Party; or (c) was rightfully disclosed to it without restriction by a third party; or (d) was independently developed without use of any Proprietary Information of the Disclosing Party. Nothing in this Agreement will prevent the Receiving Party from disclosing the Proprietary Information pursuant to any judicial or governmental order, provided that the Receiving Party gives the Disclosing Party reasonable prior notice of such disclosure to contest such order. At the termination of this Agreement, all Proprietary Information will be returned to the Disclosing Party, destroyed or erased (if recorded on an erasable storage medium), together with any copies thereof, when no longer needed for the purposes above, or upon request from the Disclosing Party, and in any case upon termination of the Agreement. Notwithstanding any termination, all confidentiality obligations of Proprietary Information that is trade secret shall continue in perpetuity or until such information is no longer trade secret.

5.2 Usage Restrictions on Flock IP. Flock and its licensors retain all right, title and interest in and to the Flock IP and its components, and Customer acknowledges that it neither owns nor acquires any additional rights in and to the foregoing not expressly granted by this Agreement. Customer further acknowledges that Flock retains the right to use the foregoing for any purpose in Flock's sole discretion. Customer and Authorized End Users shall not: (i) copy or duplicate any of the Flock IP; (ii) decompile, disassemble, reverse engineer, or otherwise attempt to obtain or perceive the source code from which any software component of any of the Flock IP is compiled or interpreted, or apply any other process or procedure to derive the source code of any software included in the Flock IP; (iii) attempt to modify, alter, tamper with or repair any of the Flock IP, or attempt to create any derivative product from any of the foregoing; (iv) interfere or attempt to interfere in any manner with the functionality or proper working of any of the Flock IP; (v) remove, obscure, or alter any notice of any intellectual property or proprietary right appearing on or contained within the Flock Services or Flock IP; (vi) use the Flock Services for anything other than the Permitted Purpose; or (vii) assign, sublicense, sell, resell, lease, rent, or otherwise transfer, convey, pledge as security,

or otherwise encumber, Customer's rights. There are no implied rights.

5.3 Disclosure of Footage. Subject to and during the Retention Period, Flock may access, use, preserve and/or disclose the Footage to law enforcement authorities, government officials, and/or third parties, if legally required to do so or if Flock has a good faith belief that such access, use, preservation or disclosure is reasonably necessary to comply with a legal process, enforce this Agreement, or detect, prevent or otherwise address security, privacy, fraud or technical issues, or emergency situations.

- PAYMENT OF FEES

6.1 Billing and Payment of Fees. Customer shall pay the fees set forth in the applicable Order Form based on the billing structure and payment terms as indicated in the Order Form. If Customer believes that Flock has billed Customer incorrectly, Customer must contact Flock no later than thirty (30) days after the closing date on the first invoice in which the error or problem appeared to receive an adjustment or credit. Customer acknowledges and agrees that a failure to contact Flock within this period will serve as a waiver of any claim. If any undisputed fee is more than thirty (30) days overdue, Flock may, without limiting its other rights and remedies, suspend delivery of its service until such undisputed invoice is paid in full. Flock shall provide at least thirty (30) days' prior written notice to Customer of the payment delinquency before exercising any suspension right.

6.2 Notice of Changes to Fees. Flock reserves the right to change the fees for subsequent Renewal Terms by providing sixty (60) days' notice (which may be sent by email) prior to the end of the Initial Term or Renewal Term (as applicable).

6.3 Late Fees. If payment is not issued to Flock by the due date of the invoice, an interest penalty of 1.0% of any unpaid amount may be added for each month or fraction thereafter, until final payment is made.

6.4 Taxes. Customer is responsible for all taxes, levies, or duties, excluding only taxes based on Flock's net income, imposed by taxing authorities associated with the order. If Flock has the legal obligation to pay or collect taxes, including amount subsequently assessed by a taxing authority, for which Customer is responsible, the appropriate amount shall be invoice to and paid by Customer unless Customer provides Flock a legally sufficient tax exemption certificate and Flock shall not charge customer any taxes from which it is exempt. If any deduction or [Note: photo text is interleaved by line wrap in 6.1 and 6.4; transcribed in logical reading order.]

(partially visible adjacent page, upper right, rotated) "Envelope ID: AF1416CF-A... withholding is req[?] ... amounts necessary ... withholding ... been r[?]" (partially visible handwritten notes, top) "complien[?] / 2009 started / mounts / ... other vendors"

withholding is required by law, Customer shall notify Flock and shall pay Flock any additional amounts necessary to ensure that the net amount that Flock receives, after any deduction and withholding, equals the amount Flock would have received if no deduction or withholding had been required.

7. TERM AND TERMINATION

7.1 Term. The initial term of this Agreement shall be for the period of time set forth on the Order Form (the "Term"). Following the Term, unless otherwise indicated on the Order Form,

this Agreement will automatically renew for successive renewal terms of the greater of one year or the length set forth on the Order Form (each, a "Renewal Term") unless either Party gives the other Party notice of non-renewal at least thirty (30) days prior to the end of the then-current term.

7.2 Termination. Upon termination or expiration of this Agreement, Flock will remove any applicable Flock Hardware at a commercially reasonable time period. In the event of any material breach of this Agreement, the non-breaching Party may terminate this Agreement prior to the end of the Term by giving thirty (30) days prior written notice to the breaching Party; provided, however, that this Agreement will not terminate if the breaching Party has cured the breach prior to the expiration of such thirty (30) day period ("Cure Period"). Either Party may terminate this Agreement (i) upon the institution by or against the other Party of insolvency, receivership or bankruptcy proceedings, (ii) upon the other Party's making an assignment for the benefit of creditors, or (iii) upon the other Party's dissolution or ceasing to do business. In the event of a material breach by Flock, and Flock is unable to cure within the Cure Period, Flock will refund Customer a pro-rata portion of the pre-paid fees for Services not received due to such termination.

7.3 Survival. The following Sections will survive termination: 1, 3, 5, 6, 7, 8.3, 8.4, 9, 11.1 and 11.6.

- REMEDY FOR DEFECT; WARRANTY AND DISCLAIMER

8.1 Manufacturer Defect. Upon a malfunction or failure of Flock Hardware or Embedded Software (a "Defect"), Customer must notify Flock's technical support team. In the event of a Defect, Flock shall make a commercially reasonable attempt to repair or replace the defective Flock Hardware at no additional cost to the Customer. Flock reserves the right, in its sole discretion, to repair or replace such Defect, provided that Flock shall conduct inspection or testing within a commercially reasonable time, but no longer than seven (7) business days after Customer gives notice to Flock.

8.2 Replacements. In the event that Flock Hardware is lost, stolen, or damaged, Customer may request a replacement of Flock Hardware at a fee according to the reinstall fee schedule (https://www.flocksafety.com/reinstall-fee-schedule). In the event that Customer chooses not to replace lost, damaged, or stolen Flock Hardware, Customer understands and agrees that (1) Flock Services will be materially affected, and (2) that Flock shall have no liability to Customer regarding such affected Flock Services, nor shall Customer receive a refund for the lost, damaged, or stolen Flock Hardware.

8.3 Warranty. Flock shall use reasonable efforts consistent with prevailing industry standards to maintain the Services in a manner which minimizes errors and interruptions in the Services and shall perform the Installation Services in a professional and workmanlike manner. Services may be temporarily unavailable for scheduled maintenance or for unscheduled emergency maintenance, either by Flock or by third-party providers, or because of other causes beyond Flock's reasonable control, but Flock shall use reasonable efforts to provide advance notice in writing or by e-mail of any scheduled service disruption.

8.4 Disclaimer. THE REMEDY DESCRIBED IN SECTION 8.1 ABOVE IS CUSTOMER'S SOLE REMEDY, AND FLOCK'S SOLE LIABILITY, WITH RESPECT TO DEFECTS. FLOCK DOES NOT WARRANT THAT THE SERVICES WILL BE UNINTERRUPTED OR ERROR FREE; NOR DOES IT

MAKE ANY WARRANTY AS TO THE RESULTS THAT MAY BE OBTAINED FROM USE OF THE SERVICES. EXCEPT AS EXPRESSLY SET FORTH IN THIS SECTION, THE SERVICES ARE PROVIDED "AS IS" AND FLOCK DISCLAIMS ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A

(partially visible adjacent page: "PARTIC... APPLIES... ME...")

PARTICULAR PURPOSE AND NON-INFRINGEMENT. THIS DISCLAIMER ONLY APPLIES TO THE EXTENT ALLOWED BY THE GOVERNING LAW OF THE STATE MENTIONED IN SECTION 11.6.

8.5 Insurance. Flock will maintain commercial general liability policies as stated in Exhibit B.

8.6 Force Majeure. Parties are not responsible or liable for any delays or failures in performance from any cause beyond their control, including, but not limited to acts of God, changes to law or regulations, embargoes, war, terrorist acts, pandemics (including the spread of variants), issues of national security, acts or omissions of third-party technology providers, riots, fires, earthquakes, floods, power blackouts, strikes, supply chain shortages of equipment or supplies, financial institution crisis, weather conditions or acts of hackers, internet service providers or any other third party acts or omissions.

9. LIMITATION OF LIABILITY; INDEMNITY

9.1 Limitation of Liability. NOTWITHSTANDING ANYTHING TO THE CONTRARY, FLOCK, ITS OFFICERS, AFFILIATES, REPRESENTATIVES, CONTRACTORS AND EMPLOYEES SHALL NOT BE RESPONSIBLE OR LIABLE WITH RESPECT TO ANY SUBJECT MATTER OF THIS AGREEMENT OR TERMS AND CONDITIONS RELATED THERETO UNDER ANY CONTRACT, NEGLIGENCE, STRICT LIABILITY, PRODUCT LIABILITY, OR OTHER THEORY: (A) FOR LOSS OF REVENUE, BUSINESS OR BUSINESS INTERRUPTION; (B) INCOMPLETE, CORRUPT, OR INACCURATE DATA; (C) COST OF PROCUREMENT OF SUBSTITUTE GOODS, SERVICES OR TECHNOLOGY; (D) FOR ANY INDIRECT, EXEMPLARY, INCIDENTAL, SPECIAL OR CONSEQUENTIAL DAMAGES; (E) FOR ANY MATTER BEYOND FLOCK'S ACTUAL KNOWLEDGE OR REASONABLE CONTROL INCLUDING REPEAT CRIMINAL ACTIVITY OR INABILITY TO CAPTURE FOOTAGE; OR (F) FOR ANY AMOUNTS THAT, TOGETHER WITH AMOUNTS ASSOCIATED WITH ALL OTHER CLAIMS, EXCEED THE FEES PAID AND/OR PAYABLE BY CUSTOMER TO FLOCK FOR THE SERVICES UNDER THIS AGREEMENT IN THE TWELVE (12) MONTHS PRIOR TO THE ACT OR OMISSION THAT GAVE RISE TO THE LIABILITY, IN EACH CASE, WHETHER OR NOT FLOCK HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. THIS LIMITATION OF

LIABILITY OF SECTION ONLY APPLIES TO THE EXTENT ALLOWED BY THE GOVERNING LAW OF THE STATE REFERENCED IN SECTION 10.6. NOTWITHSTANDING ANYTHING TO THE CONTRARY, THE FOREGOING LIMITATIONS OF LIABILITY SHALL NOT APPLY (I) IN THE EVENT OF GROSS NEGLIGENCE OR WILLFUL MISCONDUCT, OR (II) INDEMNIFICATION OBLIGATIONS.

9.2 Responsibility. Each Party to this Agreement shall assume the responsibility and liability for the the acts and omissions of its own employees, officers, or agents, in connection with the performance of their official duties under this Agreement. Each Party to this Agreement shall be liable for the torts of its own officers, agents, or employees.

9.3 Flock Indemnity. Flock shall indemnify and hold harmless Customer, its agents and employees, from liability of any kind, including claims, costs (including defense) and

expenses, on account of: (i) any copyrighted material, patented or unpatented invention, articles, device or appliance manufactured or used in the performance of this Agreement; or (ii) any damage or injury to property or person directly caused by Flock's installation of Flock Hardware, except for where such damage or injury was caused solely by the negligence of the Customer or its agents, officers or employees. Flock's performance of this indemnity obligation shall not exceed the fees paid and/or payable for the services rendered under this Agreement in the preceding twelve (12) months.

10. INSTALLATION SERVICES AND OBLIGATIONS

10.1 Ownership of Hardware. Flock Hardware is owned and shall remain the exclusive property of Flock. Title to any Flock Hardware shall not pass to Customer upon execution of this Agreement, except as otherwise specifically set forth in this Agreement. Except as otherwise expressly stated in this Agreement, Customer is not permitted to remove, reposition, re-install, tamper with, alter, adjust or otherwise take possession or control of Flock Hardware. Customer agrees and understands that in the event Customer is found to engage in any of the foregoing restricted actions, all warranties herein shall be null and void, and this Agreement shall be subject to immediate termination for material breach by Customer. Customer shall not perform any acts which would interfere with the retention of title of the Flock Hardware by Flock. Should Customer default on any payment of the Flock Services, Flock may remove Flock Hardware at

Flock's discretion. Such removal, if made by Flock, shall not be deemed a waiver of Flock's rights to any damages Flock may sustain as a result of Customer's default and Flock shall have the right to enforce any other legal remedy or right.

10.2 Deployment Plan. Flock shall advise Customer on the location and positioning of the Flock Hardware for optimal product functionality, as conditions and locations allow. Flock will collaborate with Customer to design the strategic geographic mapping of the location(s) and implementation of Flock Hardware to create a deployment plan ("Deployment Plan"). In the event that Flock determines that Flock Hardware will not achieve optimal functionality at a designated location, Flock shall have final discretion to veto a specific location, and will provide alternative options to Customer.

10.3 Changes to Deployment Plan. After installation of Flock Hardware, any subsequent requested changes to the Deployment Plan, including, but not limited to, relocating, re-positioning, adjusting of the mounting, removing foliage, replacement, changes to heights of poles will incur a fee according to the reinstall fee schedule located at (https://www.flocksafety.com/reinstall-fee-schedule). Customer will receive prior notice and confirm approval of any such fees.

10.4 Customer Installation Obligations. Customer is responsible for any applicable supplementary cost as described in the Customer Implementation Guide, attached hereto as Exhibit C ("Customer Obligations"). Customer represents and warrants that it has, or shall lawfully obtain, all necessary right title and authority and hereby authorizes Flock to install the Flock Hardware at the designated locations and to make any necessary inspections or maintenance in connection with such installation.

10.5 Flock's Obligations. Installation of any Flock Hardware shall be installed in a professional manner within a commercially reasonable time from the Effective Date of this Agreement.

Upon removal of Flock Hardware, Flock shall restore the location to its original condition, ordinary wear and tear excepted. Flock will continue to monitor the performance of Flock Hardware for the length of the Term. Flock may use a subcontractor or third party to perform certain obligations under this agreement, provided that Flock's use of such subcontractor or third party shall not release Flock from any duty or liability to fulfill Flock's obligations under this Agreement.

- MISCELLANEOUS

11.1 Compliance With Laws. Parties shall comply with all applicable local, state and federal laws, regulations, policies and ordinances and their associated record retention schedules, including responding to any subpoena request(s).

11.2 Severability. If any provision of this Agreement is found to be unenforceable or invalid, that provision will be limited or eliminated to the minimum extent necessary so that this Agreement will otherwise remain in full force and effect.

11.3 Assignment. This Agreement is not assignable, transferable or sublicensable by either Party, without prior consent. Notwithstanding the foregoing, either Party may assign this Agreement, without the other Party's consent, (i) to any parent, subsidiary, or affiliate entity, or (ii) to any purchaser of all or substantially all of such Party's assets or to any successor by way of merger, consolidation or similar transaction.

11.4 Entire Agreement. This Agreement, together with the Order Form(s), the reinstall fee schedule (https://www.flocksafety.com/reinstall-fee-schedule), and any attached exhibits are the complete and exclusive statement of the mutual understanding of the Parties and supersedes and cancels all previous or contemporaneous negotiations, discussions or agreements, whether written and oral , communications and other understandings relating to the subject matter of this Agreement, and that all waivers and modifications must be in a writing signed by both Parties, except as otherwise provided herein. None of Customer's purchase orders, authorizations or similar documents will alter the terms of this Agreement, and any such conflicting terms are expressly rejected. Any mutually agreed upon future purchase order is subject to these legal terms and does not alter the rights and obligations under this Agreement, except that future purchase orders may outline additional products, services, quantities and billing terms to be mutually accepted by Parties. In the event of any conflict of terms found in this Agreement or any other terms and conditions, the terms of this Agreement shall prevail. Customer agrees that Customer's purchase is neither contingent upon the delivery of any future functionality or features nor dependent upon any oral or written comments made by Flock with respect to future functionality or feature.

11.5 Relationship. No agency, partnership, joint venture, or employment is created as a result of this Agreement and Parties do not have any authority of any kind to bind each other in any respect whatsoever. Flock shall at all times be and act as an independent contractor to Customer.

11.6 Governing Law; Venue. This Agreement shall be governed by the laws of the state in which the Customer is located. The Parties hereto agree that venue would be proper in the chosen courts of the State of which the Customer is located. The Parties agree that the United Nations Convention for the International Sale of Goods is excluded in its entirety from this Agreement.

11.7 Special Terms. Flock may offer certain special terms which are indicated in the proposal and will become part of this Agreement, [underlined: upon Customer's prior written consent and the mutual execution by authorized representatives] ("Special Terms"). To the extent that any terms of this Agreement are inconsistent or conflict with the Special Terms, the Special Terms shall control.

11.8 Publicity. Flock has the right to reference and use Customer's name and trademarks and disclose the nature of the Services in business and development and marketing efforts.

11.9 Feedback. If Customer or Authorized End User provides any suggestions, ideas, enhancement requests, feedback, recommendations or other information relating to the subject matter hereunder, Agency or Authorized End User hereby assigns to Flock all right, title and interest (including intellectual property rights) with respect to or resulting from any of the foregoing.

11.10 Export. Customer may not remove or export from the United States or allow the export or re-export of the Flock IP or anything related thereto, or any direct product thereof in violation of any restrictions, laws or regulations of the United States Department of Commerce, the United States Department of Treasury Office of Foreign Assets Control, or any other United States or foreign Customer or authority. As defined in Federal Acquisition Regulation ("FAR"), section 2.101, the Services, the Flock Hardware and Documentation are "commercial items" and according to the Department of Defense Federal Acquisition Regulation ("DFAR") section 252.2277014(a)(1) and are deemed to be "commercial computer software" and "commercial computer software documentation." Flock is compliant with FAR Section 889 and does not contract or do business with, use any equipment, system, or service that uses the enumerated banned Chinese telecommunication companies, equipment or services as a substantial or essential component of any system, or as critical technology as part of any Flock system. Consistent with DFAR section 227.7202 and FAR section 12.212, any use, modification, reproduction, release, performance, display, or disclosure of such commercial software or commercial software documentation by the U.S. Government will be governed solely by the terms of this Agreement and will be prohibited except to the extent expressly permitted by the terms of this Agreement.

(partially visible handwritten notebook edge, top-left: "...endors...")

11.11 Headings. The headings are merely for organization and should not be construed as adding meaning to the Agreement or interpreting the associated sections.

11.12 Authority. Each of the below signers of this Agreement represent that they understand this Agreement and have the authority to sign on behalf of and bind the Parties they are representing.

11.13 Conflict. In the event there is a conflict between this Agreement and any applicable statement of work, or Customer purchase order, this Agreement controls unless explicitly stated otherwise.

11.14 Morality. In the event Customer or its agents become the subject of an indictment, contempt, scandal, crime of moral turpitude or similar event that would negatively impact or tarnish Flock's reputation, Flock shall have the option to terminate this Agreement upon prior written notice to Customer.

11.15 Notices. All notices under this Agreement will be in writing and will be deemed to have been duly given when received, if personally delivered; when receipt is electronically confirmed, if transmitted by email; the day after it is sent, if sent for next day delivery by recognized overnight delivery service; and upon receipt to the address listed on the Order Form (or, if different, below), if sent by certified or registered mail, return receipt requested.

11.16 Non-Appropriation. Notwithstanding any other provision of this Agreement, all obligations of the Customer under this Agreement which require the expenditure of funds are conditioned on the availability of funds appropriated for that purpose. Customer shall have the right to terminate this Agreement for non appropriation with thirty (30) days written notice without penalty or other cost.

EXHIBIT B INSURANCE

Required Coverage. Flock shall procure and maintain for the duration of this Agreement insurance against claims for injuries to persons or damages to property that may arise from or in connection with the performance of the services under this Agreement and the results of that work by Flock or its agents, representatives, employees or subcontractors. Insurance shall be placed with insurers with a current A. M. Best rating of no less than "A" and "VII". Flock shall obtain and, during the term of this Agreement, shall maintain policies of professional liability (errors and omissions), automobile liability, and general liability insurance for insurable amounts of not less than the limits listed herein. The insurance policies shall provide that the policies shall remain in full force during the life of the Agreement. Flock shall procure and shall maintain during the life of this Agreement Worker's Compensation insurance as required by applicable State law for all Flock employees.

Types and Amounts Required. Flock shall maintain, at minimum, the following insurance coverage for the duration of this Agreement: (i) Commercial General Liability insurance written on an occurrence basis with minimum limits of One Million Dollars ($1,000,000) per occurrence and Two Million Dollars ($2,000,000) in the aggregate for bodily injury, death, and property damage, including personal injury, contractual liability, independent contractors, broad-form property damage, and product and completed operations coverage; (ii) Umbrella or Excess Liability insurance written on an occurrence basis with minimum limits of Ten Million Dollars ($10,000,000) per occurrence and Ten Million Dollars ($10,000,000) in the aggregate; (iii) Professional Liability/Errors and Omissions insurance with minimum limits of Five Million Dollars ($5,000,000) per occurrence and Five Million Dollars ($5,000,000) in the aggregate; (iv) Commercial Automobile Liability insurance with a minimum combined single limit of One Million Dollars ($1,000,000) per occurrence for bodily injury, death, and property coverage, including owned and non-owned and hired automobile coverage; and

(v) Cyber Liability insurance written on an occurrence basis with minimum limits of Five Million Dollars ($5,000,000).

Axon ALPR Brief

Axon ALPR program brief (vendor document, current as of September 2026).

Axon ALPR is built around agency control, system safeguards, and an audit record the agency can review and share to meet the expectations of the communities it serves.

What Sets Us Apart

- Purpose-built security: For nearly 2 decades, Axon has securely managed agencies' most sensitive data, from body camera footage to public safety records.
- Agencies own and control their data: Agencies own their data outright, including how it's accessed and exported. Data stays with each agency, with access granted only at their explicit direction.
- Built responsibly, from the start: Axon engages with stakeholders from the earliest stages of product design, including its Ethics & Equity Advisory Council, public safety professionals, academic researchers, and community voices.
- Federal access: There is no automatic, standing or built-in federal access to agency ALPR data through Axon.
- Lawful requests: If Axon receives a lawful request, it directs the request to the agency as the data owner.
- Access control: Recipient agencies' access to data they receive does not include the ability to extend that access to others. The originating agency retains full control over who can access its data.
- Data security: Axon does not access agency data, other than for support requests, which are time-boxed, logged, and revoked once resolved.
- Agency ownership: Agencies own all hardware, from poles, to permits, to cameras. Switching providers or adding other vendors' equipment to that infrastructure is entirely the agency's call.

Key Safeguards

- Plates, not people: Axon ALPR captures license plates, not identities — no facial recognition, no biometric matching, no profiles of people or owners. Each detection logs a plate image, a vehicle context image, basic attributes (color, make, type), and time/location, checked only against hotlists an agency has authorized.
- Access permissions and search controls: Separate permissions control who can search detections and hits, manage hotlists and administer the system. Every ALPR search requires a stated reason and an offense category the agency has authorized, and each agency can choose whether to require a case number.
- Agency-configured access & retention: Every data search is subject to the originating agency's authorized offense categories, and recipients see only detections matching their own hotlists. Agencies set retention independently for detections and hits, and data is automatically removed when the retention period expires.
- Audit logs and reporting: Agencies can generate and export audit reports covering ALPR activity, data use, access controlled relationships and hotlist changes.

- Public transparency: Agencies can publish aggregate ALPR information, including hit-alert counts and current data partnerships. The portal does not publish plate numbers, images, individual records or camera locations.
- CJIS compliance & data security: Axon Cloud Services meet the FBI's CJIS Security Policy across all 13 policy areas, with tamper-proof audit trails on every evidence access, and controls independently validated each year via SOC 2 Type 2 with CJIS validation.

Ongoing Enhancements

- Additional access controls: requiring a full plate or case number before a search proceeds, plus other field-level requirements agencies can define.
- Automated anomaly flagging and reporting: flags unusual search patterns, such as the same plate searched repeatedly or under different case numbers, for administrative review, and adds a recurring audit digest.
- Outcome reporting: records outcomes from ALPR searches and hotlist follow-ups into standardized audit and transparency reporting.

Axon says it is committed to continuing to invest in additional safeguards, and that its platform helps operationalize compliance with federal, state, and local policy by automating retention schedules and generating audit-ready reports.

Public Safety Committee Agenda (October 7)

OFFICE OF THE CITY CLERK — City of Sun Prairie. 300 East Main Street, Sun Prairie, WI 53590-2227. (608) 837-2511. FAX (608) 825-6879. www.cityofsunprairie.com

Public Notice of the City of Sun Prairie, pursuant to Section 19.84, Wisconsin Statutes, is hereby given to the public and to the news media, that the following meeting will be held:

PUBLIC SAFETY COMMITTEE MEETING — Wednesday, October 07, 2026, 7:00 PM — City Hall Council Chambers / Zoom available, 300 East Main Street, Sun Prairie, WI 53590

How to participate

1. Written comments: send comments on agenda items to sschmidt@cityofsunprairie.com
2. Watch the meeting: Roku, Amazon Fire TV, Apple TV, channel 983 on Charter, or channels 983 and 1983 on TDS; stream at sunprairiemediacenter.com or the Sun Prairie Media Center app; webinar https://us02web.zoom.us/j/86846685875

Public comments: register through the electronic submission system at https://cityofsunprairie.com/Comments/publicsafetycommittee. The survey closes for public comment 30 minutes before the meeting.

Agenda

1. Call to order and roll call
2. Approval of minutes — A. Approval of minutes from the July 15, 2026 meeting
3. Citizen appearances / public comment
4. Staff updates — A. Fire/EMS Chief's update – Chris Garrison. B. Police Chief's update – Kevin Warych
5. Unfinished business
6. New business
   - A. Consideration, discussion, and possible action on Ordinance repealing and recreating Ch. 5.40 regulating massage establishments. – LT Ray Thomson
   - B. Consideration, discussion, and possible action on amending City Ordinance Chapter 10.24 – Enforcement and Penalties. – Assistant Chief Ryan Cox
   - C. Chief report on Axon Outpost as the police department's Automated License Plate Reader (ALPR) technology moving forward. – Chief of Police Kevin Warych
   - D. Consideration, discussion, and possible action on Police Department Toy Drive Fundraiser. – Detective Jeremy Rademacher
7. Referrals
8. Announcements
9. Adjournment

Posted October 2, 2026 at Sun Prairie City Hall (300 East Main Street), Sun Prairie Public Library (1350 Linnerud Drive), and www.cityofsunprairie.com.

Note: Upon reasonable notice, efforts will be made to accommodate the needs of disabled individuals through appropriate aids and services. Contact the City Clerk's Office, 300 East Main Street, Sun Prairie WI 53590, (608) 837-2511. A quorum of other governmental bodies may attend to gather information; no action will be taken by any body other than the one named in this notice.

Axon Price Estimate

Public Safety Committee mini-packets (October 7, 2026 meeting)

Mini-packet 1 — Item 4B, Police Chief's update – Kevin Warych.

Mini-packet 2 — Item 6C, Chief report on Axon Outpost as the police department's ALPR technology moving forward – Chief of Police Kevin Warych. It contains the Axon quote below plus a copy of the Axon ALPR program brief (reproduced earlier in this section).

Axon Non-Binding Budgetary Estimate — Quote Q-932192-001 (DRAFT)

Account 127301. Issued Sep 22, 2026; expires Nov 30, 2026. Payment terms N30. Delivery AUTO-GND. Currency USD.

- Ship to / Bill to: Sun Prairie Police Department – WI, 300 E Main St, Sun Prairie, WI 53590-2227

- Sales representative: Brandon Jones, brjones@axon.com
- Primary contact: Kevin Warych, (608) 825-1153, kwarych@cityofsunprairie.com

Quote summary

- Program length: 120 months (Contract start May 1, 2027 — end Apr 30, 2037)
- Net total: $235,388.97. Est. tax $0.00. Total contract value $235,388.97
- MSRP $384,137.10; total savings $148,748.13

Payment schedule

- Apr 1, 2027 — $23,538.87
- Apr 1 each year 2028 through 2036 — $23,538.90 per year
- Total — $235,388.97

Pricing

- B00076 Outpost TAP Plan — qty 3, 120 months from 5/2027 — unbundled list $355.66, list $264.97, net $217.95 — subtotal $78,462.99
- B00076 Outpost TAP Plan — qty 6, 120 months from 5/2027 — unbundled list $355.66, list $264.97, net $217.95 — subtotal $156,925.98

Delivery schedule

Estimated ship Apr 1, 2027 to 300 E Main St:

- Hardware (9 each): Outpost Battery & Charger Enclosure – Extended; Outpost Camera; Outpost Pole – Standard; Outpost Solar Panel – 100W; Outpost Standard Solar Hardware Kit; Outpost Top Mount End Cap – Standard
- Services (9 each): Outpost Standard Installation; Outpost Upgrade Installation
- Warranties (9 each): Outpost Extended Warranty – Camera; Outpost Maintenance

Estimated ship May 1, 2027: Software — Axon Vehicle Intelligence ALPR License (9)
Estimated ship Apr 1, 2032: TAP Refresh One — Battery Enclosure Extended (9); Camera (9)
Estimated ship Apr 1, 2037: TAP Refresh Two — Battery Enclosure Extended (9); Camera (9)

Terms & conditions

This Rough Order of Magnitude estimate is provided for budgetary and planning purposes only. It is non-binding and is not a contractable offer for sale. Tax is estimated and subject to change. Exceptions: (1) Estimated amounts under existing or terminated contracts, including transfer balances, are estimates and may be adjusted if new contracts are not executed on anticipated dates. (2) TAP refresh prior to renewal: Axon may ship refresh hardware under the existing contract while renewal agreements are in progress. (3) Shipment variance: estimated ship dates are not guarantees.

Axon Enterprise, Inc., 17800 N 85th St, Scottsdale, Arizona 85255. (800) 978-2737.

SPPD ALPR Frequently Asked Questions (October 2026)

Sent by Chief Kevin Warych on October 16, 2026, in reply to Zackary's Oct. 6 follow-up questions.

Automated License Plate Reader (ALPR) Technology: Frequently Asked Questions

The Sun Prairie Police Department (SNPD) is committed to using technology responsibly to enhance public safety while respecting the privacy and rights of our community members.

As the department transitions from Flock Safety to Axon automated license plate reader (ALPR) technology, we recognize that residents may have questions about how the system works, what information is collected, who can access it, and how that information is protected.

The following frequently asked questions explain the technology, its intended use, and the safeguards in place to promote transparency, accountability, and responsible data management.

Understanding the Technology

What is an Automated License Plate Reader (ALPR)?

An Automated License Plate Reader (ALPR) is a camera-based technology that captures images of vehicles and their license plates as they pass a specific location.

ALPR technology provides law enforcement with an additional investigative tool to help identify vehicles associated with criminal activity, locate missing persons, and support other legitimate public safety investigations.

The cameras capture information at a specific point in time. They do not provide continuous, real-time tracking of vehicles or individuals.

What information do ALPR cameras collect?

The Axon ALPR system captures:

- An image of the vehicle's license plate.
- A broader image of the vehicle and its surroundings.
- Basic visible vehicle characteristics, such as color, make, and vehicle type.
- The date, time, and location where the vehicle was photographed.

Because the cameras capture images of the surrounding area, photographs may incidentally include nearby people, signs, buildings, or other objects.

However, the system does not use facial recognition technology or analyze images to identify pedestrians or vehicle occupants.

Can the cameras identify drivers, passengers, or pedestrians?

No. The ALPR system is designed to identify license plates and capture basic vehicle information—not to identify individuals.

Although a person may incidentally appear in a photograph, the system does not perform facial recognition or use those images to identify drivers, passengers, or pedestrians.

The system also does not automatically retrieve registered vehicle owner information or create profiles of vehicle owners.

Can ALPR cameras be used to monitor speeding or issue traffic citations?

No. Neither the department's current Flock cameras nor the planned Axon ALPR cameras measure vehicle speed.

The Axon ALPR system does not currently have speed-detection capabilities, and there are no current or near-term plans to introduce them.

Why does the Sun Prairie Police Department use ALPR technology?

ALPR technology is one of several investigative tools used by the Sun Prairie Police Department to help protect the community.

It can assist officers with:

- Identifying vehicles associated with criminal investigations.
- Locating stolen vehicles.
- Supporting investigations involving missing or endangered persons.
- Developing investigative leads.
- Identifying vehicles connected to serious incidents.
- Helping investigators use available resources more efficiently.

ALPR technology does not replace traditional police work or independent investigative judgment. It provides additional information that may help officers investigate incidents and respond to public safety concerns.

Has ALPR technology made a difference in Sun Prairie?

The Sun Prairie Police Department has experienced meaningful investigative benefits from its use of ALPR technology.

The system has assisted officers in identifying vehicles of interest, developing investigative leads, and supporting criminal investigations.

The department has shared examples of successful ALPR-assisted investigations with the Public Safety Committee and Common Council.

While individual investigative successes do not independently establish that ALPR technology reduces overall crime rates, they demonstrate how the technology can support local law enforcement efforts.

Why is the department transitioning to Axon?

The transition to Axon provides an opportunity for the department to continue using ALPR technology while strengthening its approach to data management, information sharing, and accountability.

Key considerations include:

- Greater control over which agencies can access Sun Prairie's information.
- Formal data-sharing agreements.
- Restrictions on federal agency access.
- Detailed audit records of system activity.
- Continued City ownership of ALPR data.
- An opportunity to establish a shorter data retention period.

The department's goal is to maintain a useful investigative tool while implementing safeguards that reflect the community's expectations regarding privacy, transparency, and responsible use.

Data Ownership, Storage & Retention

Who owns the information collected by ALPR cameras?

The City of Sun Prairie owns and controls the information collected by its ALPR cameras.

This includes license plate images, vehicle photographs, associated data, and information generated through the system.

Axon does not acquire ownership rights to the City's ALPR data.

How long is ALPR information stored?

The Sun Prairie Police Department currently retains ALPR information for 30 days.

The final retention period for the Axon system has not yet been established. As part of the transition to Axon, the department is evaluating a shorter retention period that balances investigative needs with community privacy considerations.

Once the established retention period expires, the system automatically deletes the information in accordance with its retention settings.

What happens to the data if the City ends its contract with Axon?

If the City terminates its agreement with Axon, the Police Department will no longer be able to use the technology or access its data through the system.

The City retains ownership of its information and has 90 days following termination to retrieve its data. After that period, the data is deleted. The City can also export audit and activity reports for its records.

Who pays to store the information?

The City pays a fee for each ALPR camera, which includes the cost of data storage.

The system automatically deletes information after the established retention period. This prevents the indefinite accumulation of data and helps maintain predictable storage

requirements.

The City's data is not sold to third parties to offset storage costs.

Can Axon sell ALPR information to insurance companies or other businesses?

No. Axon cannot sell the City's ALPR data to insurance companies, private businesses, or other third parties.

The City owns and controls the information collected by its cameras.

The information is not collected for commercial purposes and is not available for sale.

Data Access, Security & Accountability

Who can access Sun Prairie's ALPR information?

Access is restricted to authorized Sun Prairie Police Department employees, including sworn personnel and dispatchers, whose responsibilities require use of the system.

Access may also be granted to specifically approved state or local law enforcement agencies through a formal agreement with the City.

Each user receives access based on their assigned role and responsibilities.

Can Axon employees access the City's ALPR information?

Axon employees do not have unrestricted or ongoing access to the City's ALPR data.

Access may be temporarily authorized when the Police Department requests technical assistance. Any such access must be:

- Specifically approved by the department.
- Limited to the purpose of the support request.
- Restricted to the time necessary to complete that request.
- Logged and available for audit.

How is the information protected from unauthorized access?

The ALPR system incorporates multiple security safeguards, including:

- Role-Based Access: Users can access only the features and information authorized for their assigned responsibilities.
- Multi-Factor Authentication (MFA): Users must complete an additional identity verification step when accessing the system.
- CJIS Compliance: The system meets applicable Criminal Justice Information Services (CJIS) security requirements used to protect sensitive law enforcement information.
- Audit Logs: System activity is recorded so the department can review how the technology is being used.

These safeguards help protect information from unauthorized access and support accountability.

Who is authorized to search the ALPR database?

Authorized Police Department employees, including sworn officers and dispatchers, may conduct searches for legitimate law enforcement purposes.

Access to the system does not mean an employee has unlimited authority to search the database.

All searches must comply with department policies and established restrictions.

What is required to conduct an ALPR search?

Every ALPR search must be connected to an authorized law enforcement purpose.

Before conducting a search, users must enter:

1. An authorized offense category.
2. A specific reason for the search.

The department determines which offense categories are permitted.

If a user selects an offense category that has not been authorized by the department, the system will not return ALPR data.

The offense category and stated reason are recorded in the system's audit history.

Are all searches logged?

Yes. Every search is logged.

Audit records allow the department to review system activity, including who conducted a search and the reason provided. This includes searches performed by users with administrative privileges.

Can employees or administrators delete their search history?

No. Users cannot delete or modify their search history.

System administrators can review audit records but cannot alter or erase searches from the audit log.

This safeguard helps ensure accountability and supports the investigation of potential misuse.

What prevents an employee from using the system for personal reasons?

The department has established safeguards to help prevent and detect unauthorized use.

Every search requires a stated law enforcement purpose and is associated with an identifiable user.

Because searches are logged and cannot be deleted by users or administrators, the department can review activity and investigate potential misuse.

Using ALPR information for personal reasons—such as monitoring a former partner, acquaintance, or other individual without a legitimate law enforcement purpose—would be an unauthorized use of the system.

Information Sharing with Other Agencies

Does the Sun Prairie Police Department share ALPR information with other law enforcement agencies?

Yes, but sharing will be limited, controlled, and subject to formal agreements.

Under the planned Axon system, the department intends to establish a more restrictive approach to information sharing than was available through its previous Flock system.

Information will be shared only with approved state and local law enforcement agencies that have entered into a formal Memorandum of Understanding (MOU) with the City.

There will be no blanket sharing of ALPR information.

Will federal agencies have access to Sun Prairie's ALPR database?

No. The department will not share ALPR database access with federal agencies.

Axon's ALPR sharing system does not provide built-in or automatic federal agency access.

The Sun Prairie Police Department will also prohibit ALPR data-sharing agreements with agencies participating in the federal 287(g) immigration enforcement program.

This restriction is intended to ensure that access remains consistent with the City's established public safety priorities and data-sharing requirements.

Can another agency share Sun Prairie's ALPR information with additional agencies?

No. The Axon system is designed to prevent agencies from redistributing ALPR data that they do not own.

The system uses a method known as federated sharing, which allows an approved agency to access authorized information without receiving ownership of a separate copy of the database.

An agency can share only ALPR data that it owns.

Can another agency use Sun Prairie's ALPR information to investigate crimes outside Wisconsin?

Potentially, yes, provided the search meets the requirements established in the formal data-sharing agreement.

Each participating agency must agree to the authorized uses of the information.

The City will not permit its ALPR data to be used for purposes that violate the agreement or fall outside the approved law enforcement objectives.

If an agency violates the terms of its agreement, the City will discontinue sharing ALPR information with that agency.

What happens if another agency requests ALPR information for an unauthorized purpose?

The department will not authorize database access for purposes outside its approved policies and data-sharing agreements.

Formal agreements will identify the expectations and limitations governing access.

Requests made through legal processes will be reviewed by the City and its legal counsel, as appropriate.

If Axon receives a legal request for the City's data, the company directs the request to the City as the data owner and discloses information only when legally required.

Privacy & Community Concerns

Are ALPR cameras used to continuously track people?

No. ALPR cameras do not provide a continuous live feed of an individual's location or follow vehicles as they travel.

Instead, each camera captures a vehicle and license plate when the vehicle passes that specific location.

During an authorized investigation, law enforcement personnel may search previously collected records to determine when and where a particular license plate was photographed.

These searches are limited to information available within the department's established retention period.

Could ALPR cameras be used to monitor visits to medical facilities or other sensitive locations?

The department recognizes concerns about the potential misuse of ALPR technology, particularly regarding visits to medical facilities, reproductive health providers, or other sensitive locations.

The ALPR system does not identify why a person visits a particular location or monitor an individual's activities.

However, a license plate search may reveal that a vehicle was photographed at a particular location and time.

For this reason, access to ALPR information is restricted to authorized law enforcement purposes, and searches are subject to audit and oversight.

The department's data-sharing agreements will also establish restrictions intended to prevent other agencies from using Sun Prairie's information for unauthorized purposes.

What safeguards prevent ALPR information from being used for activities that are not crimes in Wisconsin?

The department will establish formal data-sharing agreements defining how its ALPR information may be used.

These agreements will identify authorized purposes and prohibit uses that fall outside those requirements.

For example, the department does not intend to permit another agency to use Sun Prairie's ALPR database to investigate conduct that is lawful in Wisconsin solely because it is prohibited in another jurisdiction.

Agencies that violate the terms of their agreements will lose access to Sun Prairie's ALPR information.

Does the system create profiles of residents or their travel habits?

The Axon ALPR system does not automatically create behavioral profiles of individuals or registered vehicle owners.

It collects individual vehicle detections at specific locations and times.

Authorized law enforcement personnel may search historical detections associated with a particular license plate for an approved investigative purpose.

Those searches are logged and subject to department oversight.

Our Commitment to the Community

The Sun Prairie Police Department recognizes that public trust is essential to effective law enforcement.

We are committed to using ALPR technology in a manner that supports public safety while protecting individual privacy and promoting accountability.

Our guiding principles are straightforward:

- **Public Safety:** Use technology to support legitimate law enforcement investigations and protect the community.
- **Privacy:** Limit the collection, retention, access, and sharing of information.
- **Accountability:** Maintain auditable records of system activity and establish clear expectations for authorized use.
- **Transparency:** Provide residents with understandable information about how the technology works and the safeguards governing its use.

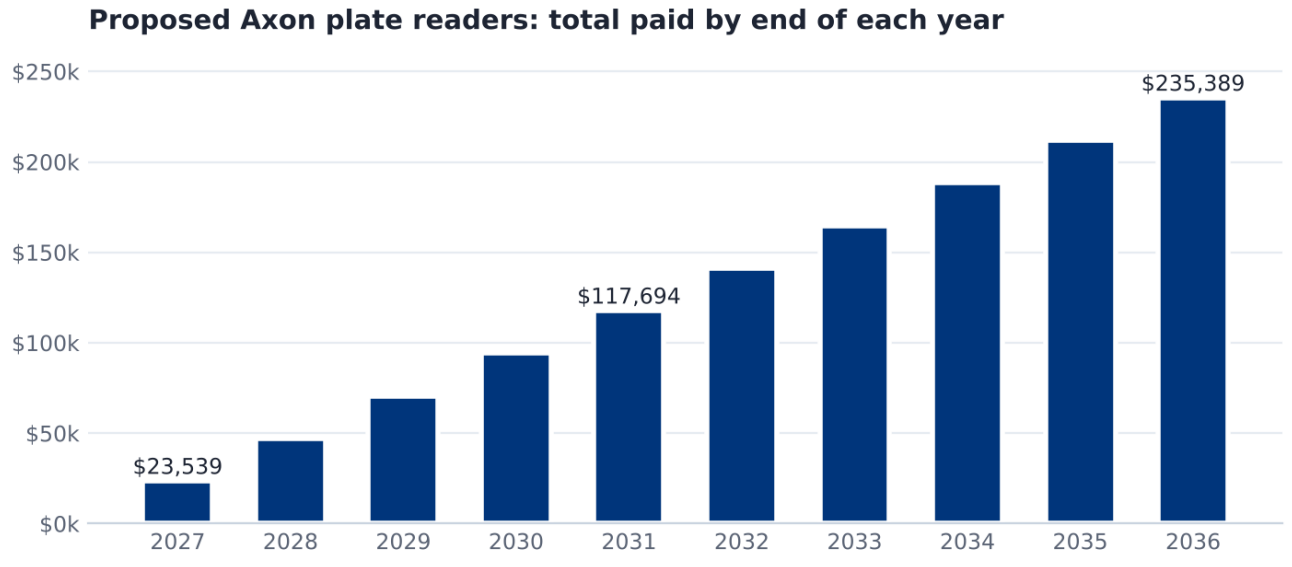

We welcome community questions and remain committed to evaluating our practices as technology, legal requirements, and community expectations evolve.

— Kevin Warych, Chief of Police, Sun Prairie Police Department

Flock vs. Axon, Side by Side

What the current Flock contract says next to what is known about the proposed Axon system. Axon figures come from a draft, non-binding estimate and from the Chief's written statements; none of them are contract terms yet.

	Flock (2023 contract)	Axon (proposed)
Cameras	5 Falcon cameras in the 2023 order form; 9 in use by 2026 (6 city-owned, 3 donated by Woodman's)	9 Outpost solar cameras
Cost	$15,000 a year platform fee; $30,750 for the first 2-year term	$235,388.97 over 10 years, about $23,539 a year (draft estimate, expires Nov 30, 2026)
Term	24 months, auto-renewing	120 months, May 1, 2027 to Apr 30, 2037
Data retention	30 days (order form)	14-day trial for 3 months, then 14 or 21 days (Chief, Oct 27)
Livestreaming	Not addressed in the order form	None, per the Chief (Oct 27)
Search audits	Not specified in the order form	Monthly, by a Detective Sergeant (Chief, Oct 27)
Data ownership and sharing	See the Master Services Agreement text in this part	City owns the data; no federal access; no 287(g) sharing (SPPD FAQ, Oct 16); data-sharing MOU to be made public after signing
Written policy	Policy F-18	F-18 to be posted on the SPPD website if approved
Status	In use	Moving with the city budget; Council's final budget vote Nov 17

Source: Axon draft estimate Q-932192-001 (non-binding; expires Nov 30, 2026). One payment per year, 2027–2036.

Cumulative cost of the proposed Axon system, 2027–2036

What Other Wisconsin Cities Decided

Sun Prairie isn't the only Wisconsin community rethinking Flock. These are headlines found in November 2026; read the articles for details.
