Flock Camera Concerns (June–July)

E-141 · Concerns Regarding the Use of Flock Safety Cameras in Sun Prairie

From Zackary Mark <zackarymark160@gmail.com>

To sschmidt@cityofsunprairie.com, tveith@cityofsunprairie.com, Alder Rex Owens <rowens@cityofsunprairie.com>, Mayor <mayor@cityofsunprairie.com>, Chief Kevin Warych <kwarych@cityofsunprairie.com>, rsilva@cityofsunprairie.com

Date Jun 21, 2026, 4:50 PM

Dear Sun Prairie City Council Members, Public Safety Committee Members, and Chief Warych,

I am writing to express my concerns regarding the use and potential expansion of Flock Safety cameras within the City of Sun Prairie.

First, I want to acknowledge that I understand the purpose of these cameras. I recognize that the Sun Prairie Police Department controls access to the system and that the cameras are intended to assist with criminal investigations, locate stolen vehicles, and improve public safety. I appreciate the efforts of our law enforcement officers to keep our community safe and understand why some community members support the technology.

However, I remain concerned about the broader implications of these cameras, particularly regarding privacy, transparency, community trust, and immigration-related enforcement.

While Sun Prairie may not currently use Flock cameras for immigration enforcement purposes, there is documented evidence from across the country showing that Flock data has been accessed and used in immigration-related investigations through partnerships between local law enforcement agencies and federal authorities. Reports have shown that immigration officials have requested assistance from local agencies with access to Flock systems, raising concerns about how data collected for local public safety purposes could potentially be used beyond its original intent.

Even if these concerns do not currently apply to Sun Prairie, the existence of these documented cases creates understandable fear and uncertainty among immigrant families and community members. Residents deserve confidence that data collected within our city will not be used, directly or indirectly, to support immigration enforcement activities.

I also recognize that Sun Prairie currently has a relatively small number of Flock cameras, with reports indicating approximately six cameras throughout the city. While this number may seem limited, my concern is not simply the number of cameras but the precedent they establish. Even a small surveillance network can collect significant amounts of data on residents and visitors over time. As these systems become more integrated into law enforcement operations, it is important to consider their long-term impact on privacy, public trust, and the possibility of future expansion.

I am also concerned about transparency and community trust. Many residents are told that these cameras are being used solely for public safety purposes, yet questions remain regarding data retention, information sharing, oversight, and future uses of the technology. When residents are uncertain about how their information may be accessed, shared, or utilized, trust in local

government and law enforcement can be weakened.

Public safety and civil liberties should not be viewed as opposing goals. A truly safe community is one where residents feel protected from crime while also feeling confident that their privacy and rights are being respected. Before any future expansion of Flock cameras is considered, I encourage the City Council to establish clear safeguards, strengthen transparency measures, limit data sharing, and provide strong assurances that information collected through these systems will not be used for immigration enforcement purposes.

I would also appreciate clarification regarding whether Sun Prairie has policies in place that prohibit Flock camera data from being shared for immigration enforcement purposes, either directly or indirectly through requests from federal agencies. If such policies exist, I believe they should be made clear and readily accessible to the public. If they do not exist, I encourage the City to consider adopting them in order to strengthen community trust and provide residents with greater confidence in how their data is protected.

As a Sun Prairie resident, student at Sun Prairie West High School, and student advocate who has worked with local leaders on issues affecting our community, I care deeply about maintaining both public safety and public trust. I believe transparency, accountability, and community engagement are essential when implementing technologies that have the potential to impact the privacy and rights of residents.

I respectfully urge the City to carefully consider these concerns and engage the community in an open discussion about the future of surveillance technology in Sun Prairie.

Thank you for your time and consideration. I look forward to your response regarding the City's policies and safeguards related to the use of Flock camera data.

Sincerely,

Zackary Mark Sun Prairie Resident Sun Prairie West High School (608) 940 7356 zackarymark160@gmail.com

Mr. Mark,

Thank you for your email and for taking the time to share your concerns regarding license plate reader (LPR) technology. To avoid a walking quorum, I blind copied to city council and public safety as they were referenced in your initial email. First and foremost, I want you to know that I am always open to meeting in person and would be happy to sit down with you to discuss these issues further. Email can be helpful for exchanging information, but it does not always provide the full context needed for topics as nuanced and important as this one. Please consider this a standing invitation, not only for you, but for anyone in our community who would like to discuss license plate readers or any other public safety issue.

To answer your initial question, the Sun Prairie Police Department currently has a total of nine license plate readers. Six of these cameras are funded directly by the department, while three others were obtained through donations. Currently, the department has no intention of expanding the number of cameras, nor are there any plans under development to do so. I would like to address your concerns by category to ensure I provide a complete response.

Privacy and Constitutional Considerations I appreciate that privacy is one of the most significant concerns surrounding license plate reader technology. Frankly, I believe these concerns are reasonable and deserve thoughtful discussion. Public trust is not built by dismissing concerns, but rather by listening to them, being transparent, and explaining how decisions are made.

From a legal perspective, courts have consistently recognized that there is generally no reasonable expectation of privacy in a license plate that is displayed in plain view on a vehicle traveling on public roadways. In Katz v. United States (1967), the United States Supreme Court established the "reasonable expectation of privacy" test and held that what an individual knowingly exposes to the public is generally not protected by the Fourth Amendment.

In United States v. Knotts (1983), the Court further held that "a person traveling in an automobile on public thoroughfares has no reasonable expectation of privacy in his movements from one place to another," as those movements are voluntarily exposed to public observation.

Similarly, in New York v. Class (1986), the Court found that individuals do not have a reasonable expectation of privacy in information that is required by law to be displayed on a vehicle and visible to the public, such as a Vehicle Identification Number (VIN). This same rationale has been applied by courts to license plates displayed on public roads.

More recently, courts reviewing Automated License Plate Reader technology have generally concluded that the capture of a license plate and vehicle image at a point in time, visible to anyone traveling on a public roadway, does not by itself constitute an unreasonable search under the Fourth Amendment.

I recognize there is an ongoing national discussion regarding how emerging technologies should be used and what safeguards should exist. I know people disagree about these issues, and I respect those differing viewpoints. My goal is not to persuade you one way or the other, but rather to provide the facts and explain how the Sun Prairie Police Department approaches the use of this

technology.

It is also worth noting that many businesses, convenience stores, and shopping centers utilize security cameras that capture considerably more information than a license plate and vehicle. Nonetheless, I understand that concerns regarding government use of technology are different and deserve additional scrutiny and discussion.

Transparency The Sun Prairie Police Department prioritizes transparency in everything we do. This commitment is reflected in our regular news releases, weekly police blotters, public safety messaging, and our willingness to discuss our policies openly with the community.

With regard to license plate readers specifically, we strive to be as transparent as possible while complying with Wisconsin's Open Records laws. These laws are important because they balance an individual's privacy interests with the public's right to know.

We have been open about incidents in which license plate readers have assisted in solving crimes, locating suspects involved in violent crimes, recovering stolen vehicles, and otherwise improving public safety in Sun Prairie If there were ever an incident that jeopardized community trust, (if the system were used improperly), we have accountability measures in place to investigate and address that conduct.

I understand why people may be skeptical, particularly given examples from other parts of the country where officers and or specific license plate vendors were not transparent and damaged public trust. That is something I take very seriously because public trust is foundational to effective policing. Without it, we cannot do our job.

Community Trust and Police Legitimacy Everything we do at the Sun Prairie Police Department revolves around community trust. Every call for service, traffic stop, investigation, and community interaction depends on maintaining that trust. Our residents deserve nothing less. For me, the more important question is not whether technology exists, but whether it is used in a manner that is lawful, transparent, and deserving of the public's trust.

The department's support for license plate reader technology is not based on a vendor, a product, or a business relationship. Our support is based on the public safety outcomes we have seen and the belief that, when appropriately governed, this technology can assist in locating stolen vehicles, identifying suspects involved in violent crimes, locating missing persons, and providing investigative leads that help protect our community. Using technology to our benefit is more important than ever given our tight budgets.

Equally important are the safeguards surrounding its use. The department has an established policy governing license plate reader technology, which I have attached per your request. Officers are trained in the lawful and ethical use of the technology, and every search conducted within the system is auditable. The technology shall only be used for lawful law enforcement purposes. If it were ever used improperly, I can assure you it would be addressed through our accountability processes.

Police legitimacy is not achieved simply because something is legal. It is earned through transparency, accountability, procedural justice, and maintaining the confidence of the people we serve. I recognize that some members of the community remain skeptical of this technology, and I respect that perspective. My responsibility as Chief is to ensure that if we use a tool, we do so in a way that is constitutional, transparent, and consistent with the values of Character, Competence, and Leadership that guide our department.

Ultimately, I support license plate reader technology because I believe it can enhance public safety while operating within clearly defined legal and ethical boundaries. At the same time, I remain committed to ongoing dialogue with our community to ensure that trust and legitimacy remain at

the center of everything we do.

Immigration-Related Enforcement The Sun Prairie Police Department does not have authority to enforce federal immigration law. I have issued directives to ensure our officers act within their constitutional authority and clearly understand the limitations of our role. More importantly, we do not share our license plate reader data with Federal authorities nor for immigration enforcement purposes, and the system has been configured to prevent its use for immigration enforcement by federal authorities. Please see attached screenshots regarding this.

I understand there are concerns that agencies with whom data is shared could potentially misuse information. While I cannot speak for every agency, the license plate reader system requires specific investigative criteria and documented reasons for searches. This creates an audit trail and provides accountability should questions ever arise regarding how data was accessed or used.

This aspect of the technology is admittedly difficult to explain fully over email, which is one reason I would welcome an in-person discussion. I have attached several screenshots that may help provide additional perspective on how the system functions, as well as the department's policy regarding license plate readers.

My goal is not to convince you to agree with the technology, but rather to ensure you have accurate information and understand the safeguards we have in place. I hope this email addresses your questions and concerns. If not, I would be more than happy to continue the conversation in person. Thank you again for reaching out and for your interest in public safety in our community.

Respectfully,

Kevin Warych Chief of Police

Sun Prairie Police Department 2598 W Main Street | Sun Prairie, WI Office: 608.825.1153 Email: kwarych@cityofsunprairie.com Website: www.cityofsunprairie.com(http://www.cityofsunprairie.com/)

Dear Chief Warych,

Thank you for taking the time to provide such a detailed response to my questions and concerns regarding license plate reader technology. I appreciate the thorough explanation, the attached materials, and your willingness to engage in an open dialogue with members of the community.

Your response answered several of my questions, particularly regarding the number of cameras currently in use, the department's policies surrounding immigration enforcement, and the safeguards in place to promote accountability and transparency. After reviewing your email, I still have a few questions that I hope you may be able to clarify.

First, you mentioned that the system is configured to prevent its use for immigration enforcement by federal authorities. Could you explain how that restriction works in practice? Is the restriction applied only to federal agencies, or are there also safeguards regarding agencies that may cooperate with federal immigration enforcement efforts?

Second, which law enforcement agencies currently have access to Sun Prairie's license plate reader data, and under what circumstances is data shared with outside agencies?

Third, how long is license plate reader data retained before it is automatically deleted, and has that retention period changed since the cameras were first implemented?

I am also curious about the auditing process. How often are audits conducted, who reviews them, and have there been any instances in which the system was found to have been accessed or used improperly?

Finally, has the department evaluated the effectiveness of the cameras? For example, are there statistics regarding stolen vehicles recovered, crimes solved, missing persons located, or other measurable public safety outcomes associated with the technology?

I ask these questions because I believe transparency and public understanding are essential when discussing technologies that impact both public safety and privacy. I appreciate your willingness to answer questions and engage with residents, and I look forward to learning more about how these systems operate within Sun Prairie.

Thank you again for your time and for your service to our community.

Respectfully,

Zackary Mark Sun Prairie Resident Sun Prairie West High School (608) 940 7356 zackarymark160@gmail.com

Good Morning Zach

I hope this information helps. I want to reiterate the standing invite to meet on this. I am happy to take time and provide context this. I separated your email into your questions and addressed each one. I hope you find this helpful

First, you mentioned that the system is configured to prevent its use for immigration enforcement by federal authorities. Could you explain how that restriction works in practice?

Currently, the Sun Prairie Police Department utilizes Automated License Plate Reader (ALPR) technology through the Flock Safety platform. Within the system, the department has intentionally configured search settings to prohibit searches related to immigration status and reproductive health matters. As a result, department personnel are not authorized to use the system for those purposes. This expectation is reinforced through departmental directives and policy. Additionally, the Sun Prairie Police Department does not share its ALPR data with federal agencies.

Is the restriction applied only to federal agencies, or are there also safeguards regarding agencies that may cooperate with federal immigration enforcement efforts?

The restrictions on prohibited search purposes apply to all users of the system, regardless of agency affiliation. When conducting a search, officers are required to select an offense category from a predefined list, which is intended to ensure that searches are narrowly tailored and consistent with authorized law enforcement purposes. These are the screen shots I included in the previous email.

In the interest of transparency, it is important to acknowledge that no technology can completely eliminate the possibility of misuse. An individual could potentially select an incorrect offense category when conducting a search. As with many law enforcement systems, the department relies on a combination of policy, supervision, and auditing to promote compliance and accountability. The department remains committed to monitoring system use and addressing any concerns that may arise to maintain community trust.

Second, which law enforcement agencies currently have access to Sun Prairie's license plate reader data, and under what circumstances is data shared with outside agencies?

The Sun Prairie Police Department shares ALPR data with law enforcement agencies in neighboring states and Indiana, consistent with legal guidance. This network includes approximately 200 participating agencies.

The purpose of this data sharing is to assist in legitimate criminal investigations and public safety efforts. Importantly, the Sun Prairie Police Department does not share its ALPR data with federal agencies. As far as data sharing, we share if the agency requests and are also using Flock.

Third, how long is license plate reader data retained before it is automatically deleted, and has that retention period changed since the cameras were first implemented?

The department's ALPR policy provides specific guidance regarding data retention. Currently, ALPR data is retained for 30 days before being automatically deleted. This retention period has remained unchanged since the system was initially implemented.

I am also curious about the auditing process. How often are audits conducted, who reviews them, and have there been any instances in which the system was found to have been accessed or used improperly?

The department has established a formal audit procedure for ALPR use, which is outlined in the attached procedure. This procedure was developed in 2025 and updated again in April in response to community feedback and reflects the department's commitment to transparency, accountability, and responsible use of technology.

Later in 2025, Flock Safety updated its platform to require users to select an offense category before conducting a search, providing an additional layer of accountability and documentation. Prior to that enhancement, the department reviewed searches and followed up with agencies when search justifications were incomplete or did not appear to align with approved criteria.

To date, the department has not identified intentional misuse of the system by Sun Prairie personnel. Nonetheless, audits remain an important safeguard, and the department is committed to continuously reviewing system use, strengthening oversight, and maintaining the community's trust through transparent practices and responsible stewardship of this technology.

Finally, has the department evaluated the effectiveness of the cameras? For example, are there statistics regarding stolen vehicles recovered, crimes solved, missing persons located, or other measurable public safety outcomes associated with the technology?

Yes, we have maintained a list of success stories. It is just the successes of ALPR and how it has helped public safety in Sun Prairie. It does not contain statistics. This list has been shared with Council President Owens. Out of respect to the council, I want to make sure they have had a chance to review this before I share with you. I will be sharing this again in the budget meetings in July.

I hope this helps. If you would like to meet, please let me know.

Kevin Warych

Dear Chief Warych,

Thank you again for taking the time to provide such detailed responses to my questions. I appreciate your willingness to engage in this discussion and your transparency regarding the department's policies, safeguards, and use of ALPR technology.

After reviewing your responses, I would like to take you up on your offer to meet in person. While your emails have been very informative, I believe a face-to-face conversation would help me better understand the technology, the policies governing its use, and the considerations that went into the department's decision-making process.

As a student interested in public policy, government, education, and community engagement, I value opportunities to learn directly from public officials and gain a deeper understanding of how these issues are evaluated in practice. Through my work with the Sun Prairie Area School District on student engagement, trust, and community feedback initiatives, I have developed a strong interest in how public institutions balance transparency, accountability, public safety, and community concerns when making policy decisions.

While I may still have questions and concerns regarding certain aspects of ALPR technology, I believe constructive dialogue is the best way to develop a more informed perspective. I appreciate the professionalism and openness you have shown throughout this conversation, and I would welcome the opportunity to continue it in person.

If you are still willing to meet, I would be happy to work around your schedule. Please let me know what dates and times might be convenient for you.

Thank you again for your time, your thoughtful responses, and your commitment to engaging with members of the community.

Respectfully,

Zackary Mark Sun Prairie Resident Sun Prairie West High School (608) 940 7356 zackarymark160@gmail.com

Subject: Community Safety and Police Transparency

Hi Chief Warych,

I hope you are doing well. Thank you again for taking the time to meet with me previously to discuss Flock ALPR technology and how the Sun Prairie Police Department approaches public safety, privacy, and accountability.

I am continuing to learn more about issues affecting the Sun Prairie community and would appreciate the opportunity to meet again to discuss broader public safety topics. Specifically, I am interested in learning more about:

- Police transparency and accountability practices
- Current staffing levels, recruitment, and retention efforts
- How the department evaluates community safety needs
- Future priorities and challenges facing the department

My goal is to better understand how the department balances effective policing, community trust, and the evolving needs of Sun Prairie residents.

For organization purposes, I maintain a separate record of my community engagement correspondence, including emails and meeting notes, to ensure conversations and information are accurately documented and not lost over time.

Thank you for considering my request. I appreciate the department's willingness to engage with community members and help me better understand these issues.

Thank you, Zackary Mark, +1 (608) 940 7356, zackarymark160@gmail.com

Date Aug 3, 2026, 7:00 PM

Hello Michelle, Thank you for reaching out.

Unfortunately, I'll be out of town next week, so I won't be available to meet then. My schedule opens up beginning the week of August 17. My availability is as follows:

- Monday, August 17: 8:00 a.m. to 12:00 p.m.
- Tuesday, August 18: 8:00 a.m. to 2:00 p.m.
- Wednesday, August 19: 8:00 a.m. to 2:00 p.m.
- Thursday, August 20: 8:00 a.m. to 2:00 p.m.
- Friday, August 21: 8:00 a.m. to 2:00 p.m.

If possible, I would appreciate 45 minutes to an hour with Chief Warych. However, I completely understand if his schedule only allows for a shorter meeting, and I'm happy to work around his availability. Thank you again for coordinating this. Best, Zackary Mark

E-160 · Meet w/Zackary Mark

From Michelle Garrison <mgarrison@cityofsunprairie.com>

To Chief Warych, Zackary Mark <zackarymark160@gmail.com>

Date Aug 4, 2026

Calendar invite: Meet w/Zackary Mark. Monday, August 17, 2026, 11:00 AM – 12:00 PM, Sun Prairie Police Department, 2598 W Main Street.

District Budget, Mental Health & Cell Phones (August)

E-161 · Request for Guidance on Districtwide Discussion Topics

From Zackary Mark <zackarymark160@gmail.com>

To Karen Richmond <krrichm@sunprairieschools.org>

Date Aug 4, 2026, 8:00 AM

Hi Karen, I hope you are doing well. I am reaching out because I am interested in continuing my engagement with the Sun Prairie Area School District and learning more about several districtwide topics that impact students, staff, and the broader community.

I would appreciate your guidance on who the appropriate district leaders would be to speak with regarding these areas:

- District budget and long-term financial planning
- Student mental health supports and resources
- Cell phone policies and their impact on the learning environment

Rather than reaching out to multiple people without knowing the best point of contact, I was hoping you could help direct me to the appropriate administrators for these conversations.

My goal is to better understand the district's priorities, challenges, and decision-making processes while continuing to have constructive conversations about issues affecting students and the community.

For organization purposes, I maintain a separate record of my community engagement correspondence, including emails and meeting notes, to ensure information and conversations are accurately documented and not lost over time.

Thank you for your help and for pointing me in the right direction. Thank you, Zackary Mark

---

E-162 · Re: Request for Guidance on Districtwide Discussion Topics

From Karen Richmond <krrichm@sunprairieschools.org>

To Zackary Mark <zackarymark160@gmail.com>

Date Aug 4, 2026, 11:07 AM

Hi Zachary, Thank you for reaching out with your questions. Below are the district leaders that would best be able to answer your questions.

- District budget and long-term financial planning: Matt Clark, Director of Finance and Business Services, or Jewel Mucklin, Assistant Superintendent of Operations
- Student mental health supports and resources: Jennifer Apodaca or Janet Thomas, Directors of Student Services
- Cell phone policies and their impact on the learning environment: Dr. Turner, Assistant Superintendent of Teaching Learning and Equity

Please feel free to reach out with any other questions. Thank you, Karen Karen Richmond, Executive Assistant to Superintendent and Board Leadership, (608) 834-6502, krrichm@sunprairieschools.org, 501 S. Bird Street, Sun Prairie, WI 53590

E-163 · District Budget and Long-Term Financial Planning

From Zackary Mark <zackarymark160@gmail.com>
To Matt Clark <mpclark@sunprairieschools.org>
Date Aug 4, 2026, 5:00 PM

Hello Mr. Clark, I hope you are doing well. Karen Richmond suggested that I reach out to you regarding the district budget and long-term financial planning.

I have been working to better understand how district-level decisions are made and would appreciate the opportunity to meet with you to learn more about the district's budgeting process, long-term financial priorities, current challenges, and how financial decisions support students and staff across the district.

As part of my ongoing community engagement, I keep a dedicated record of my correspondence, meeting notes, and other communications related to district and community conversations. Doing so helps ensure that information is accurately documented and preserved over time.

If you have time in the coming weeks, I would greatly appreciate the opportunity to meet at a time that works best for you. Thank you for your time and consideration. Sincerely, Zackary Mark

To Matt Clark <mpclark@sunprairieschools.org>
Date Aug 6, 2026, 6:14 PM

Hi Mr. Clark, Thank you for getting back to me. Unfortunately, I'll be out of town next week, so I won't be available to meet then. My schedule opens up beginning the week of August 17:

- Monday, August 17: 8:00 a.m. to 10:00 a.m.
- Tuesday, August 18: 8:00 a.m. to 2:00 p.m.
- Wednesday, August 19: 8:00 a.m. to 2:00 p.m.
- Thursday, August 20: 8:00 a.m. to 2:00 p.m.
- Friday, August 21: 8:00 a.m. to 2:00 p.m.

I'd prefer to meet in person if that works for you. If possible, I would appreciate 45 minutes to an hour, but I completely understand if your schedule only allows for a shorter meeting. Thank you

again, and I look forward to meeting with you and learning more about the district's budgeting process and long-term financial planning. Best, Zackary Mark

You have been invited by Matthew Clark to attend an event named Budget Conversation on Tuesday Aug 18, 2026, 11:30am – 12:15pm (Central Time – Chicago).

E-168 · District Cell Phone Policy

From Zackary Mark <zackarymark160@gmail.com>

To Dr. Turner (trturne@sunprairieschools.org)

Date Aug 4, 2026, 5:00 PM

Hello Dr. Turner, I hope you are doing well. Karen Richmond suggested that I reach out to you regarding the district's cell phone policies and their impact on the learning environment.

I would appreciate the opportunity to meet with you to better understand the district's philosophy behind its cell phone policies, how those decisions are made, the feedback the district has received, and how the district evaluates the impact these policies have on student learning and classroom environments.

As part of my ongoing community engagement, I keep a dedicated record of my correspondence, meeting notes, and other communications related to district and community conversations. This allows me to accurately document information that is shared and ensure conversations are not lost over time.

If you have time in the coming weeks, I would greatly appreciate the opportunity to meet whenever your schedule allows. Thank you for your time and consideration. Sincerely, Zackary Mark

---

Meeting with Janet Thomas & Dr. Turner (August)

E-169 ·

From Zackary Mark <zackarymark160@gmail.com>

To Ms. Apodaca (jjapoda@sunprairieschools.org)

Date Aug 4, 2026, 5:00 PM

Subject: Student Mental Health Supports

Hello Ms. Apodaca, I hope you are doing well.

Karen Richmond recommended that I contact you regarding student mental health supports and resources within the Sun Prairie Area School District.

I would appreciate the opportunity to meet with you to learn more about the district's approach to supporting student mental health, the resources currently available to students and families, ongoing initiatives, and the challenges the district is working to address.

As part of my ongoing community engagement, I keep a dedicated record of my correspondence, meeting notes, and other communications related to district and community conversations. This helps ensure that information is accurately documented and available for future reference.

If you have availability in the coming weeks, I would be grateful for the opportunity to meet whenever it is convenient for you. Thank you for your time and for all you do to support students.

Sincerely, Zackary Mark

Dear Ms. Thomas, Thank you for your response. I truly appreciate your willingness to meet with me. I also appreciate Dr. Turner's willingness to join the conversation. I look forward to learning more about the district's approach to student mental health, the supports currently available, and the work being done to address students' needs.

Unfortunately, I will be unavailable next week, but I would be happy to meet during the week of August 17. My availability:

- Monday, August 17: 8:00 a.m. to 10:00 a.m.
- Tuesday, August 18: 8:00 a.m. to 2:00 p.m.
- Wednesday, August 19: 8:00 a.m. to 2:00 p.m.
- Thursday, August 20: 8:00 a.m. to 2:00 p.m.
- Friday, August 21: 8:00 a.m. to 2:00 p.m.

If possible, I would appreciate 45 minutes to an hour for the meeting. However, I completely understand if Dr. Turner's schedule only allows for a shorter conversation, and I am happy to work around the availability. Thank you again for coordinating this. Sincerely, Zackary Mark

To Janet Thomas <jathoma@sunprairieschools.org>

Date Aug 12, 2026, 5:52 PM

Hi Janet, Thank you for getting back to me and for working with Dr. Turner to find a time. Thursday, August 27 from 11:00–1:00 works best for me.

For the agenda, I'm thinking of keeping the conversation fairly broad, with a focus on district-level issues and opportunities for student engagement. My rough topics are:

- Student voice and meaningful student involvement in district decision-making
- Opportunities to strengthen student leadership and advocacy across SPASD

- Student engagement and communication between students, administrators, and the Board
- Follow-up and next steps from the Student Senate/student engagement work
- District-wide programs, policies, and initiatives that could be improved through greater student input
- Ways students can contribute to discussions around school climate, belonging, safety, and trust
- Opportunities for continued collaboration between students and district leadership

I'm happy to keep this as a working agenda and adjust based on what you and Dr. Turner think would be most useful to discuss. Thank you again, and I look forward to meeting with you both on August 27. Best, Zackary

To	Joshua Clements <jclements@cityofsunprairie.com>
Date	Aug 5, 2026, 8:00 AM

Subject: Downtown Development and Housing Planning

Hi Josh, I hope you are doing well. I am reaching out because I am interested in learning more about the future planning and development of the Sun Prairie community.

I would appreciate the opportunity to meet with you to discuss several topics related to planning and community development, including:

- Downtown redevelopment and the city's long-term vision for the downtown area
- Supporting local businesses and creating a strong community gathering space
- Housing affordability and how the city balances continued growth with the needs of current and future residents
- How planning decisions are made to ensure infrastructure, services, and community needs keep pace with development

My goal is to better understand the opportunities and challenges facing Sun Prairie as the community continues to grow, and to learn how the city approaches long-term planning decisions.

For organization purposes, I maintain a separate record of my community engagement correspondence, including emails and meeting notes, to ensure information and conversations are accurately documented and not lost over time.

Thank you for considering my request. I appreciate your time and the opportunity to learn more about the work being done to shape Sun Prairie's future. Thank you, Zackary Mark

E-186 · Solar Energy Opportunities in Sun Prairie

From Zackary Mark <zackarymark160@gmail.com>
To John Brimmer (jrbrimmer@cityofsunprairie.com)
Date Aug 6, 2026, 8:00 AM

Hi John, I hope you are doing well. I am reaching out because I am interested in learning more about opportunities for expanding solar energy use within the City of Sun Prairie.

I would appreciate the opportunity to meet and discuss the potential for solar energy projects on public buildings and facilities, including:

- The feasibility of installing solar panels on city-owned buildings
- Potential long-term cost savings and financial benefits
- How the city evaluates sustainability projects and infrastructure investments
- Possible grants, incentives, or partnerships that could support renewable energy projects
- The role solar energy could play in Sun Prairie's long-term planning goals

My goal is to better understand how the city balances upfront costs with long-term savings, environmental benefits, and responsible use of public resources.

For organization purposes, I maintain a separate record of my community engagement correspondence, including emails and meeting notes, to ensure information and conversations are accurately documented and not lost over time.

Thank you for considering my request. I appreciate your time and the opportunity to learn more about the city's approach to sustainability and future investments. Thank you, Zackary Mark

E-188 · Student Request to Discuss Education Policy

From Zackary Mark <zackarymark160@gmail.com>
To Representative Francesca Hong (info@francescahong.com)
Date Aug 12, 2026, 5:43 PM

Dear Representative Hong,

My name is Zackary Mark, and I am a Wisconsin high school student from Sun Prairie with a strong interest in education, public policy, and student advocacy.

I followed your campaign for governor and was particularly interested in your focus on education and the role that students, educators, and communities should play in shaping Wisconsin's education system.

Through my own involvement in student advocacy at my school, I have been developing ideas related to student voice, school leadership, career and technical education, dual-credit opportunities, and preparing students for life after high school. I am also interested in pursuing education and political science after graduation.

Although the gubernatorial primary has concluded, I would greatly appreciate the opportunity to speak with you for 20–30 minutes about the education policies and ideas you developed during your campaign. I would especially value hearing your perspective on what Wisconsin could realistically do to improve opportunities for students.

I understand you have a busy schedule, so I would also be grateful for the opportunity to speak with a member of your policy team if a meeting with you is not possible.

Thank you for your time and for the work you have done advocating for Wisconsin students and education. Sincerely, Zackary Mark

---

E-189 · Student Request to Discuss Wisconsin Education Policy

From Zackary Mark <zackarymark160@gmail.com>

To David Crowley campaign (info@crowleyforwi.com)

Date Aug 12, 2026, 5:39 PM

Dear Mr. Crowley,

My name is Zackary Mark, and I am a Wisconsin high school student from Sun Prairie with a strong interest in education, public policy, and student advocacy.

Through my involvement in student advocacy at my school, I have been working on ideas related to student voice, school leadership, career and technical education, and ways Wisconsin can better prepare students for life after high school. I am also interested in pursuing education and political science after graduation.

I would greatly appreciate the opportunity to meet with you or a member of your education-policy team for 20–30 minutes to discuss these ideas and hear your vision for the future of education in Wisconsin. I would especially value the opportunity to share the perspective of a Wisconsin student who is actively involved in education and school-policy issues.

I understand your campaign schedule is extremely busy, so I would be happy to meet with a senior member of your policy team if meeting with you personally is not possible.

Thank you for your time and consideration. I appreciate your work serving Milwaukee County and would be grateful for the opportunity to have a substantive conversation about how Wisconsin can strengthen education and expand opportunities for students. Sincerely, Zackary Mark

E-192 · Re: Thanks for contacting us - a few questions to help connect you

From Zackary Mark <zackarymark160@gmail.com>
To Neera Islam (Axon) <nislam@axon.com>
Date Sep 29, 2026, 2:33 PM

Hello Neera, Thank you for getting back to me and for offering to connect me with the appropriate person.

I'm reaching out as a student and community researcher looking into automated license plate reader (ALPR) technology and public safety technology used or considered by local law enforcement agencies. I'm particularly interested in learning more about Axon's ALPR-related products and programs, including Axon Outpost, and how they compare with other ALPR systems such as Flock Safety.

- Solution(s) I'm interested in: Axon Outpost and Axon's ALPR/public safety technology
- Official agency name: Not representing an agency. I am contacting you independently as a student/community researcher.
- Job title: Student / Community Researcher
- City and state: Sun Prairie, Wisconsin

- Reason for contact: I am researching ALPR technology, including how these systems are deployed, what information they collect and retain, how data is accessed and shared, privacy and security safeguards, costs and contracts, and how Axon's approach compares with other ALPR providers.

I am also interested in learning more about Axon Outpost specifically, including its intended use cases, data practices, retention policies, agency controls, interoperability with other Axon products, and any relevant policies or documentation that would help me accurately understand the system.

I appreciate your help in connecting me with someone who can answer these questions or provide relevant documentation. Thank you, Zack

---

E-193 · Request for a Meeting About Civic Issues in Sun Prairie

From	Zackary Mark <zackarymark160@gmail.com>
To	Mayor Stocker (mayor@cityofsunprairie.com)
Date	Oct 2, 2026, 1:00 PM

Dear Mayor Stocker,

My name is Zackary Mark, and I am a student in the Sun Prairie Area School District who has become increasingly involved in student voice, community advocacy, and local government issues. I'm reaching out because I would like to request a meeting with you to discuss some of the work I have been doing and several issues affecting the Sun Prairie community.

Over the past year, I have spent a significant amount of time learning about how local government operates and speaking with students, school district leaders, and community officials. Through my work with student voice in the Sun Prairie Area School District, I have focused on understanding the concerns students have, improving communication, and finding practical ways for students to contribute to conversations about issues that affect them.

I have also started becoming more involved with city and public safety issues. I recently had the opportunity to meet with Sun Prairie Police Chief Kevin Warych to discuss the city's use of automatic license plate reader technology. We discussed questions surrounding privacy, transparency, data retention, access to information, data sharing, and public trust in law enforcement technology.

That conversation gave me a better understanding of how complicated local policy decisions can be. It also reinforced my interest in having conversations directly with the people responsible for making and implementing those decisions. I think there is value in being willing to ask difficult questions while also taking the time to understand the reasoning and constraints behind the answers.

I would like to have a similar conversation with you about the city as a whole. I'm particularly interested in how Sun Prairie approaches transparency, public participation, communication with residents, public safety, development and growth, and the relationship between city government and the students and families who live here.

Sun Prairie is continuing to grow, and decisions being made now will have long-term effects on the community. As a student who lives here and is already becoming involved in these conversations, I would like to better understand how those decisions are made, what challenges city leadership is currently dealing with, and where residents can have the most constructive impact.

I also have some ideas of my own that I would like to share. Some involve improving how young residents learn about and interact with local government, while others are based on things I have heard directly from students and community members. I'm not approaching this as though I have all the answers. I'm interested in hearing your perspective, discussing the practical limitations the city faces, and seeing where there may be opportunities to improve.

I think conversations like this are particularly valuable because local government has a direct effect on people's everyday lives, yet it can sometimes feel distant from the people it serves. I would like to better understand that process and contribute where I can.

I would appreciate the opportunity to meet with you at a time that works with your schedule. I am happy to meet at City Hall or another location that is convenient for you. Thank you for taking the time to read my message and consider my request. I appreciate your service to Sun Prairie, and I would value the opportunity to speak with you directly.

Sincerely, Zackary Mark — Student Advocate, Sun Prairie West High School

E-194 · Follow-Up: ALPR Report, Axon Outpost, and Additional Questions

From	Zackary Mark <zackarymark160@gmail.com>
To	Chief Kevin Warych <kwarych@cityofsunprairie.com>
Date	Oct 6, 2026, 7:42 PM
Attachments	sun-prairie-alpr-report-6.pdf

Chief Warych,

I wanted to follow up with you regarding our conversation about Sun Prairie's ALPR program and share a report I recently put together on the system, its policies, the Flock contract, and the city's planned transition to Axon.

I've attached my independent community report, "Automated License Plate Readers in Sun Prairie." The report is not affiliated with the City or SPPD, and I tried to distinguish between information I was able to verify through public records and information that came directly from department or vendor materials. I also included a disclaimer explaining the use of AI assistance in researching and organizing the report.

Since our conversation on September 25th, I've continued looking into the transition from Flock to Axon Outpost, and I have a few additional questions I was hoping you could help clarify before the Axon proposal moves forward.

First, regarding the Axon Outpost system itself:

- How many Axon Outpost cameras is SPPD currently planning to purchase or deploy, and are the proposed locations already determined?
- Will Sun Prairie be using Outpost strictly for automated license plate recognition, or will other capabilities such as live video streaming and vehicle-attribute recognition be enabled?
- Is Axon Fusus included as part of the proposed contract? If so, what exactly would SPPD be able to connect to or access through Fusus?
- If vehicle-attribute recognition is enabled, would officers be able to search for vehicles based on characteristics such as color, make, model, roof racks, bumper stickers, or other attributes without already knowing a license plate?

- Would Policy F-18 automatically apply to those additional capabilities, or would SPPD need to update the policy before using them?

I also have some questions about data and the transition away from Flock:

- What will happen to Sun Prairie's historical Flock data once the current cameras are removed? Will it be transferred to the city, exported, deleted, or remain with Flock?
- Will the city continue to have access to historical Flock data after the Flock contracts expire?
- What will the exact retention period be under the Axon contract for plate reads, vehicle attributes, video, and audit logs?
- Who will have access to the new Axon data, including other law-enforcement agencies, federal agencies, Axon employees, or subcontractors?
- Will all searches and accesses be logged in a way that SPPD can audit?
- Will the Axon contract prohibit Axon from using Sun Prairie data, including de-identified data, for product development or AI training?

One of the biggest things I'm trying to understand is how much of the existing Flock policy framework will carry over to Axon. The current SPPD policy has specific requirements for documented searches, verification, retention, auditing, privacy, and restrictions on federal access. I'm interested in whether those same protections will be written into the new contract and policy rather than simply relying on Axon's own policies or marketing materials.

I also want to make clear that these questions aren't intended as an accusation against SPPD or Axon. I think the ALPR system has provided legitimate investigative benefits, particularly in stolen-vehicle and missing-person cases, and I appreciate the information you previously provided to me. My goal is to understand the new system and make sure residents have a clear picture of what is changing before the city moves from one vendor to another.

I've tried to approach this as an independent community research project rather than taking a predetermined position for or against ALPR technology. I would also appreciate any corrections if I have misunderstood something in the report or if information has changed since September 29.

Thank you again for taking the time to speak with me previously. I appreciate your willingness to answer my questions and explain how the department actually uses the technology.

Best, Zackary Mark — Student Advocate, Sun Prairie West High School

Hi Zach.

I am sorry for the delay. I have been so busy lately, its hard to find time. I am working on putting together a FAQ sheet that will address a lot of your questions. When I am done, I will send it.

Also, at last week's Public Safety Committee meeting, a lot of these topics were discussed. I encourage you to watch that recording. I hope this helps.

Ill send the FAQ once it is done.

Kevin Warych Chief of Police, Sun Prairie Police Department 2598 W Main Street, Sun Prairie, WI | Office: 608.825.1153

Hi Zack

I hope the attached document answers a lot of your questions. My time is limited this week, so I hope this helps. Between this document and the public safety committee meeting all your questions hopefully will be answered.

Have a great weekend.

Kevin Warych Chief of Police, Sun Prairie Police Department

E-197 · Thank you for the FAQ, and a few follow-up questions

From	Zackary Mark <zackarymark160@gmail.com>
To	Chief Kevin Warych <kwarych@cityofsunprairie.com>
Date	Oct 27, 2026, 7:45 PM

Hi Chief Warych,

Thank you for sending the written FAQ on October 16. It answered a lot, and I've added it to my independent community page so people can read what the department has said.

A few things the FAQ doesn't cover, and I want to make sure I describe them accurately:

1. Fusus and livestreaming. Will either be turned on with the Axon cameras, and if so, under what rules?
2. The old Flock data. When the Flock cameras come out, what happens to the data that's already stored?
3. Retention. The FAQ says the Axon period isn't set yet. Is there a target, and who will decide it?
4. Audits. How often will searches be audited, and who reviews them?
5. Policy F-18. Will it be rewritten for Axon, and will the new version be public before the contract is signed?
6. The contract. Will the promises in the FAQ (city ownership of the data, no federal access, no sharing with 287(g) agencies, logged searches) be written into the agreement itself, and will the contract be published?
7. Timing. Do you know when this will go to the committee and Council for action?

I'll describe anything you tell me as the department's statement, not as a contract term. If you'd rather talk it through, I'm glad to stop by.

Thanks again for your time.

Zack Mark — Student Advocate, Sun Prairie West High School

E-198 · RE: Thank you for the FAQ, and a few follow-up questions

From Chief Kevin Warych <kwarych@cityofsunprairie.com>
To Zackary Mark <zackarymark160@gmail.com>
Date Oct 27, 2026, 8:18 PM

Hi Zach. I am currently at a budget work session. Please see my response below

Kevin

The Chief answered inline under each question (shown in red in the original email). His answers, copied as written:

1. Fusus and livestreaming: There will be no livestreaming. We did not pay for that nor do I want that.

2. The old Flock data: After 30 days, this data will be deleted. The one question I have to follow up on is the audit logs, as those are kept for transparency efforts.

3. Retention: I/PD decides this. The retention period for Axon will be 14 days as a trial period for three months. In those three months, I will ask my staff to determine if any investigations are being affected, if no investigations are affected, it will remain at 14. If this is problematic it will be moved to 21.

4. Audits: Detective Sgt reviews them. And this will be done monthly. However, knowing the Sgt, the audit may be done more frequently.

5. Policy F-18: Policies are always up for evaluation. Though we do not write policies specific vendor. We right it to the technology. I will work to get that policy on our website if approved.

6. The contract: Since the city owns the data we control who we share with. The master agreement is subject to open record. If ALPR is approved, the legal department has to review the contract and send to Axon. Once the agreement is signed then the appropriate next step is to develop an MOU on the sharing of data. I will make this a public facing document.

7. Timing: This is at committee now. The city has budget work sessions tonight (currently at the meeting), next week Tuesday the 3rd 10th, with the final approval of the budget on Nov 17th.

E-199 · FW: Thank you for the FAQ, and a few follow-up questions

From Chief Kevin Warych <kwarych@cityofsunprairie.com>
To Zackary Mark <zackarymark160@gmail.com>
Date Oct 28, 2026, 1:43 PM

Correction. There is no meetings on November 3rd. Have a great day

Kevin

What the Chief's Oct 27 answers add, as department statements (not contract terms):

- No livestreaming with Axon.
- Stored Flock data is deleted after 30 days; whether Flock audit logs are kept is still being followed up on.
- Axon retention starts at 14 days as a three-month trial, set by the Chief/SPPD, moving to 21 days if investigations are affected.

- Searches audited monthly by a Detective Sergeant.
- The ALPR policy (F-18) is written to the technology, not the vendor; the Chief will work to post it on the SPPD website if approved.
- The master agreement is subject to open records. After signing, a data-sharing MOU will be developed and made public.
- Timing: at committee now, tied to city budget work sessions; final budget approval Nov 17 (the Nov 3 session was corrected: no meeting that day).

E-200 · Please put these ALPR terms in writing before the vote

From	Zackary Mark
To	Mayor Stocker; Shabnam Schmidt, City of Sun Prairie
Date	Nov 6, 2026, 1:30 PM

Hello,

I am following the plan to move the city's license plate readers from Flock to Axon. I have met with Chief Warych several times and appreciate his written answers. I am not writing to ask you to approve or reject the plan. I am asking that these terms be written into the contract or a written policy before any vote:

1. Put the retention period in the contract or a written policy.
2. Ban livestreaming in writing.
3. Require every search to be logged with a reason that cannot be deleted.
4. Require a monthly audit, with the results made public.
5. Publish the data-sharing agreement before the vote.
6. Spell out how cameras are removed and data is deleted if the contract ends.

Could you tell me whether these will be part of the contract, whether the Nov. 17 budget vote includes it, and when residents can comment?

Thank you, Zack Mark

E-201 · A quarterly ALPR transparency report?

From	Zackary Mark
To	Chief Kevin Warych
Date	Nov 6, 2026, 1:30 PM
Attachments	ALPR transparency report template (PDF)

Hello Chief Warych,

Thank you again for answering my questions recently. I had one more idea I wanted to run by you.

Many of the questions I get from people come down to numbers: how many searches, how many hits, how many cases, and what the monthly audits find. I put together a one-page template for a quarterly ALPR transparency report that lists those measures. It is attached. It is only a suggestion, and I would be glad to change it based on what the department can realistically track.

Would the department consider publishing something like this once the new system is in place? If there are measures on the list that aren't tracked, I would like to know which ones. If it helps, I can

share the template with the council as a starting point.

Thank you, Zack Mark

E-202 · Following up: a youth seat on a city committee

From Zackary Mark
To Mayor Stocker
Date Nov 6, 2026, 1:30 PM

Dear Mayor Stocker,

I'm following up on my October 2 request to meet. I'd still welcome 20 minutes to talk about how young residents can take part in city decisions.

Communities around the country give young people a formal seat at the table. Many states allow student members on school boards, and some cities add non-voting youth members to committees. Would the City consider one non-voting youth seat on a committee that affects young people, such as Parks or Public Safety, or a yearly youth listening session? I've seen how much students have to offer through SPASD Student Voice, and I think the city could benefit the same way.

I'd be glad to help draft how it could work. I'm flexible on time and place. Thank you for considering it.

Respectfully, Zack Mark

E-203 · RE: A quarterly ALPR transparency report?

From Chief Kevin Warych
To Zackary Mark
Date Nov 9, 2026, 9:10 AM

Hi Zach.

I would be open to a report similar to this. I hope all these analytics are available but I need to confirm. I will investigate this further once ALPR is approved and we move to the on-boarding phase.

Kevin

E-204 · Public records request: Axon ALPR contract, policy and audits

From Zackary Mark
To Sun Prairie City Clerk
Date Nov 9, 2026, 8:00 AM

To the City Clerk:

Under Wisconsin's public records law, I request copies of the following records for the period January 1, 2026 to today:

1. Any contract, quote, estimate, proposal or agreement between the City of Sun Prairie or the Sun Prairie Police Department and Axon Enterprise relating to automated license plate readers

or Axon Outpost cameras, including the estimate dated September 22, 2026.

2. The current version of Police Department Policy F-18, and any draft revisions.
3. Any memorandum of understanding or other agreement governing the sharing of license plate reader data with other agencies.
4. Any records of audits or reviews of license plate reader searches, including the dates they were done and any findings.
5. Records showing the number of Flock license plate reader cameras the department currently operates.

Please send the records electronically if possible. If you deny any part of this request, please explain the reasons in writing. If any part is redacted, please release the rest.

Thank you, Zack Mark

E-205 · RE: Public records request: Axon ALPR contract, policy and audits

From Rachel Packard, Customer Service Specialist, City Clerk's Office
To Zackary Mark
Cc Megan Meyer
Date Nov 9, 2026, 9:21 AM

Thank you for your request. Please use the following link to enter your request for Police records: sunprairiewi.justfoia.com (Police records request form).

The request was then filed through the city's online records portal on November 9 (reference PD-2399-2026).

E-206 · Letter to the editor: Sun Prairie's plate readers

From Zackary Mark
To Editor, Hometown News Group (Sun Prairie Star)
Date Nov 9, 2026, 8:00 AM

Sun Prairie is considering switching its license plate readers from Flock to Axon. Whatever you think of the technology, one fact deserves attention: so far, the rules are mostly promises.

The Chief has said there would be no livestreaming, that data would be kept 14 days during a trial, and that a Detective Sergeant would review searches monthly. I appreciate that. But I have not seen a contract, and a promise only binds anyone once it is written down.

Other cities show why it matters. Cedar Rapids, Iowa switched from Flock to Axon under a 164-page contract. Henrico County, Virginia ended its program and removed more than 120 cameras. Bloomington, Indiana banned plate readers.

My request is simple. Put the retention period, the livestreaming rule and the audit schedule in writing, and publish the data-sharing agreement before the council votes. Then residents can judge the actual rules, not just the intentions.
